

2021 Annual Report

March 2022

TABLE OF CONTENTS

1.	DESCRIPTION OF THE NORTH AMERICAN NUMBERING PLAN AND THE NORTH AMERICAN NUMBERING PLAN ADMINISTRATOR	3
2.	NANPA 2021 HIGHLIGHTS.....	6
3.	DESCRIPTION AND STATUS OF NUMBERING PLAN AREAS (NPAS).....	17
4.	DESCRIPTION AND STATUS OF GEOGRAPHIC RESOURCES ACTIVITY	33
5.	FORECAST RESULTS AND REVIEW OF FORECASTS VERSUS ACTUAL THOUSANDS-BLOCK ASSIGNMENTS.....	57
6.	DESCRIPTION AND STATUS OF NON-GEOGRAPHIC RESOURCES ACTIVITY	71
7.	DESCRIPTION AND STATUS OF P-ANI ADMINISTRATION	79
8.	NUMBERING RESOURCE UTILIZATION/FORECAST.....	82
9.	DESCRIPTION AND STATUS OF NPA RELIEF PLANNING	85
10.	SYSTEMS AND PERFORMANCE METRICS	93
11.	STATUS OF REQUIRED TRANSFERABLE PROPERTY	99
12.	INDUSTRY ISSUE IDENTIFICATION/FEEDBACK	100
13.	VOLUME OF REPORTS PRODUCED IN 2021 AGGREGATED BY REGULATORY AGENCY, NANC, NANPA/PA, AND SERVICE PROVIDERS OR OTHER ASSIGNEES	105
14.	HISTORICAL TRENDS FROM 2017 THROUGH 2021	108
15.	ADDITIONAL INFORMATIONAL OFFERINGS	123
	ATTACHMENT 1: NPAS IN SERVICE – BY LOCATION	129
	ATTACHMENT 2: NPAS IN SERVICE - SORTED BY NPA.....	139
	ATTACHMENT 3: NON-GEOGRAPHIC NPAS IN SERVICE	150
	ATTACHMENT 4: NPA DIALING PLANS.....	152
	ATTACHMENT 5: AGGREGATED TOTAL BY POOL OF THE SERVICE PROVIDERS PARTICIPATING IN THE POOLED AREAS.....	163
	ATTACHMENT 6: NATIONAL ROUTING NUMBER ADMINISTRATION 2021 P-ANI ACTIVITY AND PROJECTED EXHAUST REPORT	167
	ATTACHMENT 7: 2021 NPA EXHAUST PROJECTIONS.....	193
	ATTACHMENT 8: 2021 NANP EXHAUST ANALYSES	215
	ATTACHMENT 9: 2021 NANP EXHAUST ANALYSES	218

1 DESCRIPTION OF THE NORTH AMERICAN NUMBERING PLAN AND THE NORTH AMERICAN NUMBERING PLAN ADMINISTRATOR

1.1 NANP History

The North American Numbering Plan (“NANP”) was developed by AT&T in 1947 to simplify and facilitate direct dialing of long-distance calls. NANP telephone numbers are ten-digit numbers consisting of a three-digit Numbering Plan Area (“NPA”) code, commonly called an area code, followed by a seven-digit local number.

The NANP is an integrated numbering plan serving 20 North American countries that share its resources. Regulatory authorities in each participating country have plenary authority over numbering resources, but all participating countries, implicitly or explicitly, share numbering resources cooperatively.

1.2 North American Numbering Plan Administration (NANPA)

AT&T administered shared numbering resources such as area codes until divestiture of the Bell System in 1984, when these functions were transferred to Bellcore under the *Plan of Reorganization*. On October 9, 1997, the FCC, acting on a recommendation of the North American Numbering Council (“NANC”), named Lockheed Martin to serve as administrator of the NANP. In December 1999, the North American Numbering Plan Administrator (“NANPA”) transitioned from Lockheed Martin to Neustar. Neustar continued to serve as the NANPA through 2018 as a result of two competitive bidding processes.

Thousands-block number pooling, which permits service providers to request their numbers in blocks of one-thousand rather than through use of an entire Central Office (“CO”) code, was first implemented as a trial in the Illinois 847 NPA in June 1998. The process was backed by the Federal Communications Commission (“FCC”) in its Memorandum Opinion and Order on Reconsideration, CC 96-98, FCC 98-224, known as “the Pennsylvania Order.” In the Pennsylvania Order, the FCC granted limited authority to continue the Illinois pooling trial and encouraged other states to seek delegated authority to implement other pooling trials. Shortly thereafter, New York implemented a pooling trial in the 212 NPA. By the beginning of national pooling, in March 2002, the Pooling Administrator (“PA”) was managing 22 state pooling trials in 83 NPAs. On June 15, 2001, the FCC awarded a federal contract for pooling administration to Neustar who remained as such through December 31, 2018 via a competitive bidding process.

On October 5, 2018, the FCC awarded contract number 273FCC19C0002, a one-year bridge contract for NANPA, PA, and Routing Number Administrator (“RNA”) services, to Somos, Inc. The NANPA and PA transitioned the NANPA Administration System (“NAS”), Pooling Administration System (“PAS”), and Routing Number Administration System (“RNAS”), as well as personnel from both organizations, seamlessly to Somos, maintaining continuity of service. On November 1, 2019, the FCC extended the bridge contract for 6-months with two additional 3-month options. The FCC exercised a total of three extensions and the bridge contract expired on November 30, 2020.

On December 1, 2020, through a competitive bidding process, the FCC awarded to SomosGov, Inc., a wholly-owned direct subsidiary of Somos, Inc., the contract (No. 273FCC21C0003) which combined the NANPA, PA, and RNA into a single organization known

as NANPA. That contract also includes the newly created Reassigned Numbers Database (RND) organization. This contract is for a base period of five-years with three additional one-year options.

Regulatory authorities in various NANP countries have named national administrators to oversee the numbering resources assigned by NANPA for use within their countries. The NANPA is the national administrator for the United States (U.S.) and its territories (Puerto Rico, American Samoa, Guam, Commonwealth of Northern Mariana Islands, US Virgin Islands). The Canadian Numbering Administrator (CNA) is responsible for administration of telephone numbers and other telecommunications codes in Canada. In other participating countries, regulatory authorities either serve as the national administrator or delegate the responsibility to the dominant carrier. NANPA, in its overall coordinating role, consults with and assists those regulatory authorities and national administrators to ensure that numbering resources are used in the best interest of all participants in the NANP.

1.3 NANPA Neutrality

In accordance with FCC regulations,¹ the NANPA is a non-governmental entity that is impartial and not aligned with any particular telecommunications Industry segment. Accordingly, while conducting its operations, the NANPA may not be an affiliate of any telecommunications service provider(s) as defined in the Telecommunications Act of 1996. “Affiliate” is a person who controls, is controlled by, or is under the direct or indirect common control with another person. Further, the NANPA and any affiliate thereof, may not issue a majority of its debt to, nor may it derive a majority of its revenues from, any telecommunications service provider. “Majority” shall mean greater than 50 percent, and “debt” shall mean stocks, bonds, securities, notes, loans, or any other instrument of indebtedness.

1.4 Description of the NANPA

NANPA is not a policy-making entity. In reaching assignment decisions, NANPA follows regulatory directives and Industry-developed guidelines. The NANC provides continuous oversight of NANPA and evaluates NANPA’s performance each year.

NANPA has three core responsibilities: administration of NANP resources, coordination of area code relief activities, and collection of utilization and forecast data from service providers.

The NANPA performs the day-to-day number resource assignment and administrative activities with a long-term focus, which includes maintaining the NAS, PAS and RNAS to support all day-to-day and long-term resource assignment functions.

Some functions of the NANPA include:

- Managing geographic and non-geographic resource administration, including:
 - Receiving and processing applications for CO code and thousands-block assignments
 - Reclaiming CO codes and thousands-blocks that are not placed into service
 - Updating information associated with assigned CO codes and thousands-blocks and keeping the Industry informed as the supply of available CO codes approach exhaust

¹ 47 C.F.R. § 52.12

- Other Resource Administration including 5XX-NXX, 900-NXX, N11, Carrier Identification Codes (CICs), ANI II (Automatic Number Identification Information Integers digits), and Vertical Service codes
- NPA relief planning, including:
 - Initiating NPA (also known as area code) relief planning 36 months prior to forecasted exhaust and developing an Industry consensus plan for introducing a new area code
 - Filing relief plans on behalf of the Industry with appropriate state regulatory authorities for their review and approval
 - Initiating the first meeting of the Industry to begin implementation of the approved NPA relief plan
 - Monitoring CO code assignments and its impact on area code exhaust between cycles, releasing updated exhaust projections (aka “Delta NRUFs”) or declaring a jeopardy condition to preserve enough CO code inventory to last until a new NPA can be implemented
 - Working with state regulators on an ongoing basis before and during NPA relief.
- Numbering Resource Utilization/Forecast (NRUF) Report processing, including:
 - Semi-annual reporting of utilization and forecast data by all service providers during the reporting cycles of February 1 (July 1 - Dec. 31) and August 1 (Jan. 1 - June 30)
 - Processing NRUF submissions and responding with confirmation or error notifications (sent within 7 calendar days of submission)
 - Initiating an email notification identifying the errors upon submission of a Form 502
 - Sending missing utilization notifications to service providers that submitted an NRUF but failed to report utilization on assigned CO codes and/or thousands-blocks
 - Sending anomalous notifications to service providers who have numbering resources assigned and have not filed an NRUF for the current reporting cycle.
- Managing p-ANI resource administration, including:
 - Managing and assigning non-dialable p-ANIs, which are used to support the routing of wireless and VoIP 9-1-1 calls, from the 211 and 511 NXXs
 - Performing the day-to-day p-ANI assignment and administrative activities with a long-term focus
 - Providing processes for a standardized application of all administrative p-ANI guidelines
 - Maintaining and planning for adequate p-ANI inventory

For questions about the *2021 NANPA Annual Report*, please contact Florence Weber, Sr. Director-NANPA, by email at fweber@nanpa.com or by phone at 925-420-0340.

2 NANPA 2021 HIGHLIGHTS

2.1 OVERALL 2021 PERFORMANCE SUMMARY:

- The NANPA met all performance measurements for the reporting period for the year.²
- NANPA also combined the NANPA, PA, and Routing Numbering Administrator (RNA) organizations, including the following:
 - Changed email addresses for all NANPA personnel from @somos.com to @nanpa.com
 - Changed the support email addresses for NANPA, PA and RNA to support@nanpa.com
 - Changed the support telephone numbers for NANPA, PA, and RNA to 1-866-623-2282
 - Lead the effort to change the existing INC forms as NANPA moves to a new consolidated NANP Administration System
 - Reduced processing time for pooled code requests between NAS and PAS to seven calendar days from 14 calendar days

2.1.1 NUMBERING RESOURCES (GEOGRAPHIC) PERFORMANCE MEASUREMENTS:

- ★ NANPA met 100% of geographic resource processing measurements. For further details on geographic resource performance, see Section 4

KEY 2021 GEOGRAPHIC RESOURCE PROCESSING ACCOMPLISHMENTS
Assigned 6,970 CO codes in 2021 compared to 4,895 codes in 2020
Issued 35,773 Part 3s in 2021 compared to 14,679 in 2020
Of the 35,773 applications processed, 24,934 CO Code Applications were passed through to NAS from PAS as compared to 10,526 in 2020
Issued 340,814 Part 3As in 2021 compared to 210,009 in 2020
Opened 5,767 codes for pool replenishment in 2021 compared to 4,152 in 2020
Managed jeopardy procedures in 13 NPAs

² Details in the summaries contained herein

▪ **CO CODE INFORMATION:**

**Table 2-1
 2021 CO Code Performance Measurements**

PERFORMANCE MEASUREMENTS	TOTAL
Quantity of applications processed	35,773
Quantity of applications not processed in 7 calendar days	0
Quantity of CO codes assignments made	6,970
Quantity of change requests to CO codes	27,297
Quantity of CO codes returned	263
Quantity of CO codes reclaimed	0
Quantity of CO code reservation requests	0
Quantity of CO code requests suspended	364
Quantity of CO code requests withdrawn	109
Quantity of CO code requests denied	835

▪ **THOUSANDS-BLOCK INFORMATION:**

**Table 2-2
 2021 Thousands-Block Performance Measurements**

PERFORMANCE MEASUREMENTS	TOTAL
Quantity of applications (Part 3As) processed	340,814
Quantity of applications not processed in 7 calendar days	0
Quantity of thousands-block assignments made	102,837
Quantity of change requests to existing thousands-blocks	180,004
Quantity of requests to cancel or withdraw	1,327
Quantity of thousands-block disconnect requests	17,941
Quantity of thousands-block requests denied	6,408
Quantity of thousands-block requests suspended	32,278
Quantity of thousand-block reservation requests	13
Quantity of thousand-blocks reclaimed	9
Quantity of new blocks on reclamation list	2,170
Total Quantity of blocks on reclamation list	5,669
Quantity of rate center status changes	134
Quantity of RCs with < 6 months inventory based on forecast	23,642
Quantity of RCs < 6 mos inv based on forecast and zero blocks	12,083
Quantity of RCs with blocks in pending status	13,345
Quantity of codes opened for pool replenishment	5,767

▪ **MANAGING JEOPARDY NPAS:**

NANPA declared nine NPAs to be in jeopardy in 2021 (Virginia 540 and 757, Pennsylvania 484/610, Ohio 513, Florida 305/786, 561, and 813, Missouri 314, and New York 516) and rescinded jeopardy in three NPAs (Illinois 217, District of Columbia 202, and Florida 813) due to implementation of the relief NPA. See Section 4.3.5 for details.

▪ **p-ANI INFORMATION:**

- ★ NANPA met 100% of p-ANI performance measurements.
For further details on p-ANI performance, see Section 7

Table 2-3
P-ANI Resources Performance Measurements

PERFORMANCE MEASUREMENTS	TOTAL
Quantity of applications processed	3,647
Quantity of approved applications processed	3,638
Quantity of suspended applications processed	0
Quantity of withdrawn applications processed	8
Quantity of denied applications processed	1
Quantity of applications not processed within 5 business days	0
Percentage of applications not processed within 5 business days	0%
Quantity of p-ANIs requested	26,506
Quantity of p-ANIs assigned	26,286
Quantity of change requests	9
Quantity of p-ANIs returned	2,014
Quantity of requests to cancel	1

▪ **Other RNA Activities:**

- Worked with carriers to resolve data discrepancies
- Continued working on reconciling duplicate assignment issues
- Processed carriers' annual reports and semi-annual forecasts
- Completed and posted the P-ANI Activity and Projected Exhaust Report
- Worked with carriers on supporting documentation issues.

2.1.2 NUMBERING RESOURCES (NON-GEOGRAPHIC) PERFORMANCE MEASUREMENTS:

- ★ NANPA met 100% of Non-Geographic processing performance measurements.
For further details on non-geographic resource performance, see Section 6.

**Table 2-4
Non-Geographic Resources Performance Measurements**

PERFORMANCE MEASUREMENTS	TOTAL
CIC applications processed within 10 business days (%)	100%
5XX applications processed within 14 calendar days (%)	100%
900 applications processed within 10 business days (%)	N/A
VSC applications processed within 10 business days (%)	N/A
Assignments	
CICs	2
5XX	1,582
900	0
VSC	0
Changes	
CICs	47
5XX	574
900	0
VSC	0
Denials	
CICs	4
5XX	4
900	0
VSC	0
Reclamations - Returns	
CICs	27
5XX	214
900	0
VSC	0
Withdrawn	
CICs	5
5XX	0
900	0
VSC	0
Total Processed	2,459

2.1.3 NRUF PERFORMANCE MEASUREMENTS:

★ NANPA met 100% of NRUF performance measurements in 2021. For further details on NRUF performance, see Section 8.

**Table 2-5
 NRUF Quantitative Measurements**

QUANTITATIVE MEASUREMENTS	TOTAL
Form 502 Email Submissions	6,247
Form 502 FTP Submissions	1,912
Form 502 Web Submissions	4,441
Error Notifications Sent	1,435
Missing Utilization Notifications Sent	541
Anomalous Notifications Sent	634
Confirmation Notifications Sent	6,703
State Reports Created	32

**Table 2-6
 NRUF Performance Measurements**

PERFORMANCE MEASUREMENTS	TOTAL
Percentage of Form 502 Processed w/in 7 days	100%
Number of Form 502 Processed after 7 days	0
Percentage of Missing Utilization Sent w/in 45 days	100%
Number of Missing Utilization Not Sent w/in 45 days	0
Percentage of Anomalous Notifications Sent w/in 90 days	100%
Number of Anomalous Notifications Not Sent w/in 90 days	0

2.1.4 NPA RELIEF PLANNING PERFORMANCE MEASUREMENTS:

- ★ NANPA met 100% of NPA relief performance measurements
For further details on NPA Relief performance, see Section 9.

Table 2-7
NPA Relief Planning Performance Measurements

PERFORMANCE MEASUREMENTS	EVENTS	%MET
1. Initiate relief 36 mo. prior to exhaust or max 8 weeks after new forecast if < 36 mos.	10	100%
2. 8-week, 3 wks. or 2 mo. initial meeting notification	10	100%
3. 4-week IPD distribution prior to meeting	6	100%
4. 2-week distribution of meeting minutes	32	100%
5. Minutes review 3-weeks after meeting	6	100%
6. 6-week filing of Industry relief plan	11	100%
7. NPA assignment request 1 week after regulatory approval	4	100%
8. Issue press release within 2 weeks after NPA assignment	N/A	N/A
9. Hold initial implementation meeting within 45 calendar days after NPA assignment	7	100%
10. Post PL on website 3 weeks after the initial implementation meeting	6	100%
11. Post PL or notice of Industry meeting on website 10 business days after date of regulatory changes to previously issued PL for NPA relief	1	100%
12. Hold jeopardy meeting within 30 calendar days after jeopardy declaration	7	100%
13. Distribute meeting minutes within 15 business days of jeopardy meeting.	9	100%
14. Distribute IPD 4 weeks after date jeopardy was declared, if relief planning has not been initiated	3	100%
15. Hold Industry relief planning meeting 8 weeks after date jeopardy was declared, if relief planning has not been initiated	3	100%
Totals	115	100%
Average days PMs missed	0	0

2.2 STATUS OF NPA CODES AS OF DECEMBER 31, 2021:

Of a possible 800 combinations:

- 121 NPAs are not Available for Assignment³
- 679 NPAs are assignable:
 - 450 are currently assigned
 - 426 are in service of which 401 are geographic and 25 are non-Geographic⁴
 - 24 are awaiting Implementation⁵
- 288 are currently unassigned
 - 188 are general purpose of which 143 are reserved⁶ and 45 are available
 - 41 are Easily Recognizable Codes (ERCs) of which 5 are reserved⁷ and 36 are available

3 OTHER PERFORMANCE METRICS (TRD SECTIONS 11.11, 11.12, 13.3.1, 13.3.2 AND 13.3.3):

▪ SYSTEMS PERFORMANCE MEASUREMENTS:

- ★ NAS, PAS and RNAS met systems performance measurements.
 For further details on systems performance, see Section 10 of this report.

**Table 2-8
 Systems Performance Measurements**

SYSTEMS	2021 AVAILABILITY AVERAGE
Percentage NAS Scheduled (NAS)	100%
Percentage PAS Scheduled uptime	99.99% ⁸
Percentage RNAS Scheduled uptime	100%

○ SYSTEMS MAINTENANCE:

- Maintenance was performed on NAS, PAS and RNAS on May 6, using none of the FCC-approved downtime and with no disruption of customer accessibility

³ 121 unavailable NPAs include the following: 80 (NANP expansion), 8 (N11 codes), 2 (555 and 950), 20 (37X and 96X), 9 (880 – 887 and 889), 1 (456 which will be made available in 2022) and 1 (988).

⁴ In-service non-geographic NPAs include 500, 521, 522, 523, 524, 525, 526, 527, 533, 544, 566, 577, 588, 600, 622, 700, 710, 800, 833, 844, 855, 866, 877, 888, and 900.

⁵ NPA awaiting implementation is one toll-free NPA (822). Remaining 23 NPAs are geographic NPAs and are listed in Table 3-4.

⁶ 20 reserved 5XX resources included in General Purpose (528, 529, 532, 538, 542, 543, 545, 547, 549, 552, 553, 554, 556, 569, 578, 589, 550, 535, 546, and 558)

⁷ Reserved ERCs include five Canadian NPAs (633, 644, 655, 677 and 688).

⁸ Includes 43 minutes of unscheduled down time on April 27, 2021.

▪ **OTHER PERFORMANCE MEASUREMENTS:**

○ **TROUBLE TICKETS:**

- Opened no trouble tickets.

○ **COMMUNICATIONS:**

- Total Phone Calls: 1,213
- Help Desk Calls: 1,541
- Total: 2,754

○ **CHANGE ORDERS:**

- NANPA submitted no change orders.

○ **AD HOC REPORTS:**

- NANPA provided 133 Ad Hoc Reports
 - 12 FCC reports
 - 58 service provider reports
 - 63 state reports

4 NPA RELIEF PLANNING:

KEY 2021 NPA RELIEF PLANNING ACCOMPLISHMENTS
Managed 30 active NPA relief projects compared to 17 in 2020
Initiated nine relief projects in 2021 compared to six in 2020
Completed implementation for seven NPAs in 2021 compared to three in 2020
Made 14 regulatory filings in 2021 compared to four in 2020
Published eight Planning Letters
Declared a jeopardy condition in nine NPAs compared to two in 2020
Managed jeopardy procedures in 13 NPAs
Posted the new exhaust projections to the website on April 21 and October 14.

○ **NPA Relief Planning Highlights:**

- Worked on 30 active relief projects in 2021
- Ended 2021 with one relief project for which an Industry meeting notice to begin relief planning was sent, eight NPA relief projects with filings pending at the state, 20 relief projects in the implementation process
- Implemented seven new NPAs in service
- Completed 22 regulatory submissions, 14 of which were petitions or applications
- Facilitated a total of 38 Industry meetings, via a web meeting, compared to 18 Industry meetings facilitated in 2020
- Attended 77 Industry NPA relief committee meetings, providing status

- updates as needed
 - Attended and participated in a webcast recording for the California 209 NPA in April and the California 707 NPA in June
 - Attended and participated in virtual public meeting in November relating to the Florida 561 NPA relief project, and a virtual public meeting in December relating to the Florida 305/786 NPA relief project
 - Attended two virtual public hearings relating to the New York 516 NPA relief project
- **Exhaust Projections:**
 - **NPA Exhaust Projections:**
 - NANPA completed two cycles of 2021 NPA exhaust projections in April and October
 - Upon approval by the FCC, the new exhaust projections were posted to the website on April 21 and October 14
 - **Delta NRUF NPA Exhaust Projections:**
 - NANPA issued four Delta NRUF projected NPA exhaust projections in 2021 for a total of 11 NPAs

5 REGULATORY:

- Provided state-specific numbering educational presentations for 13 states, conducting approximately 90-minute meetings with regulatory staff
- Sent 12 notifications to states seeking approval to disconnect a code where no service provider with blocks or ports on the code have agreed to take over the code. Block or port holders took over all of the codes to prevent disconnection

6 INDUSTRY SUPPORT:

- Participated in 177 Industry meetings either in-person or by conference call.
- Industry Meetings:
 - Industry Numbering Committee (INC):
 - Submitted 21 new issues and 45 new contributions at the INC
 - Common Interest Group on Rating and Routing (CIGRR):
 - Submitted two new issues and 45 new contributions at CIGRR
 - Attended meetings of the North American Numbering Council (NANC), Next Generation Interconnection Interoperability Forum (NGIIF), Number Portability Industry Forum (NPIF), and Telecom Management and Operations Committee (TMOC) as well as NPA Relief Industry committee meetings
- Worked closely with service providers to process three requests for expedites related to COVID-19
- Made 134 changes to rate center information in 55 NPAs and 40 states
- Met monthly with the Number Administration Oversight Working Group (“NAOWG”):
 - Noted a total of 177 significant NANPA customer focus items
- Assisted service providers and state regulators with finding and completing CO codes transfers for LRN codes:
 - Of the 161 requests to seek a possible transfer of CO codes, NANPA is aware of approximately 100 CO codes that were saved from being assigned

- Continued sending NANPA and RNA Tips-of-the-Quarter
- Received no formal complaints relating to NANPA

7 REPORTING:

- Produced a total of 647 reports for the FCC, state regulators, the NANC, service providers, and other.
- Submitted all 174 required Contract Data Requirements List (CDRL) and Technical Requirements Document (“TRD”) reports on time and if required, posted it to the website.
 - Out of the 174 reports, 133 were ad hoc reports that were produced within three business days.
- Submitted 10 Contract Data Requirements List (CDRL) Plans to the FCC on time.

8 OTHER NANPA PERFORMANCE ACTIVITIES:

Find more details on these activities in Section 4.

- **Reclamation:**
 - **CO Codes:**
 - There was a total of 497 CO Codes on the reclamation list, with 103 of those being new
 - NANPA reclaimed no CO Codes
 - **Thousands-Blocks:**
 - There was a total of 5,669 thousands-blocks on the reclamation list, with 2,170 being new
 - NANPA reclaimed nine thousands-blocks
- **Support for Interconnected VoIP Providers:**
 - Continued to support the 98 authorized interconnected VoIP (iVoIP) providers
 - Continued daily monitoring of the FCC website for any new iVoIP applications, docket filings, public notices, or orders
 - Continued to notify the states whenever there is a filing, notice, order and LRN or multiple code requests
 - Continued responding to iVoIP providers and state regulatory staff inquiries on application processing requirements, proper supporting documentation, 30-day notification letters and adherence to state-specific requirements
- **Seeking Voluntary Disconnects (initiated by NANPA):**

During 2021, NANPA attempted to secure voluntary thousands-block disconnects (formerly known as “donations”) for 40 rate centers being changed from Excluded to Optional. NANPA was able to obtain disconnects for seven of those rate centers, thereby potentially saving the opening of seven CO codes.

- **Seeking Voluntary Disconnects (initiated by service providers):**

NANPA was asked by service providers to request voluntary thousands-block disconnects in 82 Optional pooling rate centers that did not have any available thousands-blocks. NANPA requested and received disconnects for 30 of the rate centers which saved 30 CO codes from being opened.

- **Abandoned Codes/Thousands-blocks (initiated by NANPA):**

The following is a summary of abandoned CO code/thousands-block activity in 2021:

- 26 companies in 15 states had abandoned CO codes and/or thousands-blocks
- 62 CO codes were transferred to new code holders
- One thousands-block was transferred to a new thousands-block holder
- 51 CO codes and 268 thousands-blocks were made available

3 DESCRIPTION AND STATUS OF NUMBERING PLAN AREAS (NPAs)

3.1 RESOURCE REPORT— NPAS

NPAs, also known as “Area Codes,” are the first three digits of the 10-digit telephone number. NPAs are in NXX format, where N is any digit from 2 through 9 and X is any digit from 0 through 9.

Most NPAs designate specific geographic areas; for example, the 406 NPA serves the entire state of Montana while the 806 NPA covers a portion of northwest Texas. NPAs used in this manner are called geographic NPA codes.

As shown in Table 3-1, there were 401 geographic NPA codes in service as of December 31, 2021. Of these, 335 serve the U.S. and its territories, 43 serve Canada, and the remaining 23 serve Bermuda and the Caribbean countries participating in the NANP.

**Table 3-1
 Status of NPA Codes**

	December 31, 2021
Possible Combinations	800
NPAs not Available for Assignment ⁹	121
Assignable NPAs	679
Currently Assigned	450
In Service	426
Geographic	401
Non-Geographic ¹⁰	25
Awaiting Implementation ¹¹	24
Currently Unassigned	228
General Purpose	188
Reserved ¹²	143
Available	45
ERCs	41
Reserved ¹³	5
Available	36

⁹ 121 unavailable NPAs include the following: 80 (NANP expansion), 8 (N11 codes), 2 (555 and 950), 20 (37X and 96X), 9 (880 – 887 and 889), 1 (456 which will be made available in 2022) and 1 (988).

¹⁰ In-service non-geographic NPAs include 500, 521, 522, 523, 524, 525, 526, 527, 533, 544, 566, 577, 588, 600, 622, 700, 710, 800, 833, 844, 855, 866, 877, 888, and 900.

¹¹ NPA awaiting implementation is one toll-free NPA (822). Remaining 23 NPAs are geographic NPAs and are listed in Table 3-4.

¹² 20 reserved 5XX resources included in General Purpose including 528, 529, 532, 538, 542, 543, 545, 547, 549, 552, 553, 554, 556, 569, 578, 589, 550, 535, 546, and 558.

¹³ Reserved ERCs include five Canadian NPAs (633, 644, 655, 677, and 688).

Attachments 1 and 2 are tables of geographic NPA codes currently in use, sorted by location and numerically.

Other NPAs designate special services such as toll-free calling rather than geographic areas. These NPAs are non-geographic codes. Information relating to Non-Geographic Resources can be found in Section 5. Attachment 3 lists the non-geographic NPAs currently in service.

Introduction of a new geographic NPA follows a specific plan and schedule approved by regulatory authorities. The plan is summarized in one or more *Planning Letters* on the NANPA website. Once an NPA is assigned for a geographic area, an implementation period follows. The most visible implementation activities include preparing the network to accept the new NPA, introducing any required changes to the dialing plan and informing the public about how the new NPA is to be used. The new NPA is said to be “in service” when it becomes dialable.

3.1.1 2021 NPA ACTIVITIES

Nine new geographic and two non-geographic NPAs went into service in 2021, as shown in Table 3.2 below:

**Table 3-2
 NPAs Introduced in 2021**

NPA	IN-SERVICE DATE	LOCATION	OVERLAY?	PARENT NPA	PLANNING LETTER (PL) NUMBER	NPA OVERLAY COMPLEX
945	1/15/21	TEXAS	Yes	214	537	214/469/945/972
526	1/28/21	NON-GEOGRAPHIC	No		558, 554	500/533/544/566/577/588/522/523/524/525/526
840	2/23/21	CALIFORNIA	Yes	909	529	840/909

448	6/22/21	FLORIDA	Yes	850	551,534	448/850
527	9/29/21	NON-GEOGRAPHIC	No		566,564	500/533/544/566/577/588/522/523/524/525/526/527
474	10/2/21	SASKATCHEWAN	Yes	639	530	306/474/639
742	10/16/21	ONTARIO	Yes	905	561,550	289/365/742/905
771	11/9/21	DISTRICT OF COLUMBIA	Yes	202	547	202/771

Seven geographic NPAs and one non-geographic NPA were assigned this past year, as shown in the Table 3.3 below:

**Table 3.3
NPAs Assigned in 2021**

NPA	ASSIGNMENT DATE	LOCATION	OVERLAY?	PARENT NPA	PLANNING LETTER NUMBER	NPA OVERLAY COMPLEX
983	5/27/21	COLORADO	Yes	303	563	303/720
472	6/28/21	NORTH CAROLINA	Yes	910	569,565	472/910
527	8/12/21	NON-GEOGRAPHIC	No		566, 564	500/533/544/566/577/ 588/522/523/524/ 525/526
263	11/10/21	CANADA	Yes	514	572	438/514
683	11/10/21	CANADA	Yes	613	570	249/705
861	11/19/21	ILLINOIS	Yes	309	543,540	309/861
468	12/1/21	CANADA	Yes	819	575	819/873
835	12/2/21	PENNSYLVANIA	Yes	610	547	484/610

At year end, 24 previously-assigned NPAs remained to be introduced, as shown in Table 3-4. The “status” column provides the key to understanding the table. Most of the projects listed below are considered to be “Active,” which means the NPA is in a phase of NPA relief planning. A status of “Suspended” indicates that the regulatory authority has placed the plan for introducing the new NPA on hold, which that plan may be canceled, revised, or implemented in the future.

**Table 3-4
NPAs planned but not yet introduced (as of December 31, 2021)**

3.1.2 OVERLAYS

In an overlay, two or more NPAs serve all or part of the same geographic area. The term “overlay complex” describes the list of NPAs included in the overlay. All of the overlays in service today are all-services distributed overlays; that is, numbers in the overlay NPA(s) are not restricted to any specific service or services.

Table 3-5 shows the overlay complexes in service as of December 31, 2021. The seven overlay NPAs that were placed in service in 2021 are labeled with an asterisk (*).

3.2 DIALING PLANS

Each NPA has a basic dialing plan, which indicates the dialing pattern to be used for various types of calls originating in that NPA. In the U.S., dialing plans may vary from state to state and from NPA to NPA.

Key variables in determining a dialing pattern are:

- Whether or not the call originates and terminates within the same NPA (home NPA)
- Whether the call is a local or toll call
- Whether the call requires special handling (e.g., credit card, third-party billing, or operator assistance)

Dialing patterns in the U.S. have been largely standardized. Local calls originating and terminating within the same NPA are usually dialed on a seven-digit basis, omitting the area code, except in overlay areas where the NPA must be dialed. Some states permit individual providers to use 1+10 digit dialing for local calls. Toll calls originating in one NPA and terminating in another NPA are usually dialed with a prefix “1” followed by the 10-digit number. Special handling calls are always dialed with a prefix “0” followed by the 10-digit number.

Most of the variations in basic dialing plans involve toll calls originating and terminating within the same NPA (home-NPA toll calls) and local calls originating in one NPA and terminating in another NPA (foreign-NPA local calls). In states where the prefix “1” is considered to be a toll indicator, home NPA toll calls are usually dialed as “1” followed by the 10-digit number, and foreign NPA local calls are dialed using the 10-digit number without a prefix. In states where the prefix “1” is used to indicate that a 10-digit number will follow, home-NPA toll calls are dialed using just the seven-digit number and foreign-NPA local calls are dialed as “1” followed by the 10-digit number.

Dialing patterns within an NPA also may vary according to service provider capabilities. In addition, in many areas where NPA boundaries split local calling areas, state regulatory commissions and service provider tariffs allow seven-digit dialing across NPA boundaries, including across state lines.

Basic dialing plans for U.S. NPAs are listed in Attachment 4.

3.3 IMPLEMENTATION OF 10-DIGIT LOCAL DIALING FOR THE THREE-DIGIT 988 ABBREVIATED CODE FOR THE NATIONAL SUICIDE PREVENTION LIFELINE:

On July 16, 2020, the FCC adopted Report and Order FCC 20-100 (“Order”), designating 988 as the 3-digit number to reach the Suicide Prevention Lifeline. The Order required NANPA to develop, based upon input from covered service providers, an implementation schedule, for those NPAs

where 988 is a working prefix and local calls are dialed with seven-digits to transition to 10-digit local dialing as a result of the designation of 988 as the three-digit abbreviated dialing code to access the National Suicide Prevention Lifeline. NANPA worked with the FCC prior to the release of the Order by providing information on the assignment status of 988 as a CO code throughout the country. As a result of the Order, local calls will require 10-digit or 11-digit dialing in 36 states and 82 NPAs. Table 3-6 lists the affected states and NPAs.

¹⁴ Some area codes may require 1+10 digits for local dialing.

STATE	NPA's
VIRGINIA	276, 804
WASHINGTON	509
WISCONSIN	262, 414, 608, 920

The North Dakota 701 NPA was initially included as an NPA that would be required to transition to 10-digit local dialing, but the North Dakota Public Service Commission was able to arrange for the 988 NXX to be returned to NANPA and made unavailable for use. NANPA released PL-556 on January 8, updating PL-544, to remove the 701 NPA from the list of NPAs required to transition to 10-digit local dialing.

At the start of the transition in 2020, the Industry and NANPA developed key milestones that would be required to successfully complete the steps and timeframes necessary to successfully complete the transition on time. NANPA continued facilitating this transition throughout 2021 by meeting monthly with service providers and regulators to review progress on milestones. NANPA created an area on the NANPA website dedicated solely to providing information on the transition including fact sheets, Frequently Asked Questions (FAQs), special letter samples for both permissive and mandatory dialing, sample press releases for permissive and mandatory dialing, and the *Progress on 988 Milestone* tracking sheet. On a weekly basis, NANPA updates the *Progress by State/Area Code* spreadsheet provided on the website for milestones where service providers are required to report completion. NANPA also sent courtesy reminders on milestone reporting deadlines and the need to program mandatory 10-digit (or 1+10-digit) local dialing no earlier than October 24, 2021, and no later than July 15, 2022.

NANPA facilitated 12 virtual meetings from January through December which were attended by Industry members and regulators. At these meetings, NANPA reviewed the milestones for which NANPA expected compliance reporting, responded to questions asked by the participants, and provided minutes from each meeting. NANPA also provided compliance reports to state regulators when requested.

In an effort to simplify the reporting requirements for service providers, NANPA developed a *988 Milestone Confirmation Template* which provides a simplified reporting format and is available on the website. All 988-related documents can be found at: [https://www.nationalnanpa.com/transition to 10 digit dialing for 988/index.html](https://www.nationalnanpa.com/transition%20to%2010%20digit%20dialing%20for%20988/index.html).

NANPA also drafted and sent special informational letters for both permissive and mandatory dialing periods to national and state directory publishers, burglar and fire alarm associations, payphone providers, telecom associations, 911 state/county coordinators & PSAPs, highway call box agencies, tribal agencies, elevator regulatory agencies, TTY providers, parole board agencies, and senior organizations. NANPA sent hundreds of emails to these groups in March, June, and August,¹⁵ responded to questions, and continually updated the contact lists to keep them current.

NANPA provided contact lists to service providers so they can contact each other as needed to troubleshoot any 10-digit dialing issues per Milestone 14 in April and per Milestone 26 in October. Additionally, in an effort to provide the most up-to-date information to service providers after the mandatory dialing period began on October 24, 2021, NANPA sent two contact list updates, on October 17 and October 22. Of the 33 total milestones, NANPA was responsible for completing

¹⁵ Some emails included hundreds of recipients.

13, 9 of which were timely completed in 2021. Table 3-7 lists all of the milestones NANPA completed in 2021.¹⁶

**Table 3-7
Milestones Completed by NANPA in 2021**

MILESTONE NUMBER	DESCRIPTION	DEADLINE	DATE COMPLETED
5	Develop and supply verbiage for a press release to announce the permissive and mandatory 10-digit dialing effective dates. Provide verbiage to Industry, FCC so they can issue press releases as well, as needed.	2/23/21	2/11/21
7	Send second round of "special letters" again to Directory Publishers, Coin Operated Payphone Providers, Alarm Associations, Highway Call Box Operators, and 911 State/County Coordinators & PSAPs, reminding them of the permissive dialing effective date and the mandatory dialing effective date, and what each of these types of groups need to do to prep for mandatory 10DD. Supply these templates to Industry as well in case carriers want to use them to supplement their own customer notifications.	3/10/21	3/10/21
12	Issue first press release	4/19/21	3/29/21
14	Distribute carrier contact list to carriers so they can contact each other as needed to troubleshoot any permissive 10-digit dialing issues	4/24/21	4/23/21
18	Develop and send second round of "special letters" to Directory Publishers, Coin Operated Payphone Providers, Alarm Associations, Highway Call Box Operators, and 911 State/County Coordinators & PSAPs reminding them of the mandatory dialing effective date, and what each of these types of groups need to do to prep for mandatory 10DD. Supply these templates to Industry as well in case carriers want to use them to supplement their own customer notifications.	6/26/21	6/26/21
20	Develop and supply verbiage for a second Press Release to announce the mandatory 10-digit dialing effective date. Provide verbiage to Industry, FCC and state commissions so they can issue press releases as well, as needed.	7/26/21	6/10/21
21	Send second round of "special letters" again to Directory Publishers, Coin Operated Payphone Providers, Alarm Associations, Highway Call Box Operators, and 911 State/County Coordinators & PSAPs, reminding them of the mandatory dialing effective date, and what each of these types of groups need to do to prep for mandatory 10DD. Supply these templates to Industry as well in case carriers want to use them to supplement their own customer notifications.	9/9/21	9/9/21
26	Distribute carrier contact list to carriers so they can contact each other as needed to troubleshoot any mandatory 10-digit dialing issues	10/17/21	10/15/21 ¹⁷
27	Issue second Press Release	10/19/21	10/19/21

¹⁶ Milestone 17, while due in 2021, was completed in 2020 and is not reflected in Table 3-7.

¹⁷ NANPA continued to receive updates after the deadline so updated the contact list and sent the revised list on 10/22/21.

3.4 RESERVED NPAS

NANPA reserves certain NPAs for future use. Table 3-8 lists the currently reserved NPAs.

4 DESCRIPTION AND STATUS OF GEOGRAPHIC RESOURCES ACTIVITY

Geographic Resources include Central Office codes (“CO codes”), Thousands-Blocks (“blocks”), and Pseudo-Automatic Number Identification numbers (“p-ANIs”). This section will focus on 2021 activities relating to processing CO code and block applications for assignment, details associated with specific types of resource processing, reclamation of resources that are not placed into service, and other activities performed by the Resource Administrators (“RAs”). Details about Routing Number/p-ANI Administration activities can be found in Section 6.

Because the new contract combines the NANPA and PA organizations, NANPA reduced the processing time of pooled CO code applications from 14 calendar days to seven calendar days. Previously the PA was required to process CO code and block requests that came through PAS within seven calendar days. The PA then forwarded the CO code requests to NAS for an additional seven calendar days of processing time, creating a 14 calendar day timeline.

While the organizations are now combined and the application timeframe is compressed for pooled CO code applications, NANPA is still using two systems for processing applications, NAS and PAS. Since implementing the compressed timeframe, NANPA has processed all applications within seven calendar days.

In addition to processing, as a routine part of their job performance, NANPA RAs also:

- Respond to questions and requests for assistance from service providers,
- Review documentation to verify eligibility for requested thousands-blocks and CO codes,
- Interact with state commission staff on issues relating to certification and answer numbering related questions,
- Assist service providers with questions relating to the systems,
- Educate new users on the application process,
- Search for new thousands-block holders for thousands-blocks being returned with greater than 10% contamination,
- Search for new code holders for pooled codes being returned with thousands-blocks assigned, and
- Work closely with the NPAC to ensure that block requests are handled in accordance with Industry guidelines.

4.1 STATUS OF CENTRAL OFFICE CODE (“CODES”) PRODUCTIVITY

NANPA administers all geographic CO codes (also known as prefixes, exchanges, or NXX codes) in the U.S. and its territories utilizing NAS and PAS. The Canadian Numbering Administrator (CNA) performs this function in Canada. In the remaining NANP countries, regulatory authorities play an active role in central office code administration.

CO codes are digits four through six of the 10-digit telephone number. The following information addresses CO codes within geographic NPAs.

Each CO code contains 10,000 numbers for use in the rate center the CO code serves. Service providers (SPs) apply for CO codes through NAS and PAS in order to:

- Request assignment of a CO code in a non-pooling rate center,
- Request the assignment of a CO code for Location Routing Number (LRN) purposes,
- Request a CO code to replenish the inventory pool, or
- Request a CO code to meet a service provider's need for a dedicated customer (10,000 consecutive telephone numbers for a single customer).

As of the end of 2021, NANPA manages 180,625 assigned CO codes in the U.S. and its territories.

The process for applying for a CO code assignment is based on FCC rules and regulations as specified in guidelines developed by the Industry. The latest version of the guidelines, entitled *Thousands-Block (NPA-NXX- X) & Central Office Code (NPA-NXX) Administration Guidelines (TBCOCAG)*, ATIS-030019, can be found at the Alliance for Telecommunications Industry Solutions (ATIS) website at http://www.atis.org/01_committ_forums/INC/documents/.

Monthly CO code application and assignment activities during 2021 are shown in Table 4-1. The rows in the table are defined as follows:

- Quantity of applications processed—Total quantity of CO code applications processed.
- Quantity of applications not processed in seven calendar days - Total quantity of CO code applications not processed within seven calendar days.
- Quantity of CO code assignments made—Applications that resulted in the assignment of a new CO code.
- Quantity of change requests to CO codes —Applications that resulted in a change to the information associated with an existing CO code assignment, for example, a change to the OCN or switch.
- Quantity of CO codes returned—Applications requesting the return of an assigned CO code.
- Quantity of CO codes reclaimed- CO codes reclaimed at the direction of the appropriate regulatory authority.
- Quantity of CO code reservation requests—Applications requesting and receiving a CO code reservation.
- Quantity of CO codes suspended- Applications suspended pending further action such as a lottery drawing for jeopardy NPAs.
- Quantity of CO code requests withdrawn —Applications withdrawn by the applicant.
- Quantity of CO code requests denied —Applications denied for not meeting the criteria for assignment as prescribed by the FCC and Industry guidelines.

**Table 4-1
2021 Monthly CO Code Activity**

	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC	TOTAL
Quantity of applications processed	1,816	2,578	3,541	1,777	2,109	2,075	3,340	9,843	2,705	1,759	1,974	2,256	35,773
Quantity of applications not processed in 7 calendar days	0	0	0	0	0	0	0	0	0	0	0	0	0
Quantity of CO codes assignments made	694	503	655	843	539	582	560	461	682	504	478	469	6,970
Quantity of change requests to CO codes	1,004	1,938	2,795	816	1,476	1,375	2,688	9,265	1,884	1,047	1,341	1,623	27,297
Quantity of CO codes returned	19	29	11	25	21	15	17	13	36	23	29	25	263
Quantity of CO codes reclaimed	0	0	0	0	0	0	0	0	0	0	0	0	0
Quantity of CO code reservation requests	0	0	0	0	0	0	0	0	0	0	0	0	0
Quantity of CO code requests suspended	27	20	17	24	19	21	28	14	64	36	43	51	364
Quantity of CO code requests withdrawn	25	16	9	15	4	0	2	10	2	5	8	13	109
Quantity of CO code requests denied	47	72	54	54	50	82	65	80	37	144	75	75	835

NANPA processed 35,773 requests in 2021 compared to 14,679 requests in 2020, which represents a 144% increase. A total of 6,970 CO code assignments were made in 2021 as compared to 4,895 in 2020, which represents a 42% increase.

The majority of assignments were for pool replenishment. Following are the assignment totals by type:

- 5,767 for Pool Replenishment (83%),
- 1,124 for LRNs (16%),
- 58 for Dedicated Customers (1%),
- 21 for Non-Pooled CO Codes (<1%).

Of the 35,773 applications processed, 24,934 CO Code Applications were passed through to NAS from PAS as compared to 10,526 in 2020. A total of 27,297 change requests were processed in 2021 compared to 7,353 changes in 2020. These includes transfers to other service providers, switch changes, tandem changes, OCN changes due to mergers/acquisitions, and effective date changes. A total of 263 return requests were approved in 2021 as compared to 238 returns in 2020. A total of 109 applications were withdrawn, as compared to 19 withdrawals in 2020.

4.2 STATUS OF THOUSANDS-BLOCK PRODUCTIVITY

This section describes in detail thousands-block pooling processing activity in 2021, including information about applications processed, thousands-blocks assigned, and CO codes opened. Productivity statistics for the past five years can be found in Section 12, *Historical Trends Since 2017*.

NANPA administers all thousands-blocks utilizing PAS. NANPA continued its high level of performance in 2021 despite the challenges of handling an all-time record number of applications, including processing pooled CO code requests within seven calendar days versus 14 calendar days, without missing a performance measurement. NANPA processed a record 340,814 Part 3As. The previous highest annual total was in 2020, with 210,009. In addition, NANPA saw a one-month high total of 69,923 in August. The previous highest monthly total was 33,302 in August 2020.

Table 4-2 identifies areas of thousands-block processing activity:

**Table 4-2
Thousands-Block Activity**

	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC	TOTAL
Quantity of applications (Part 3As) processed	22,519	26,415	28,496	21,861	24,057	24,309	26,709	69,922	29,014	19,424	22,388	25,700	340,814

TOTALS	300,856	6,408	32,223	1,327	340,814

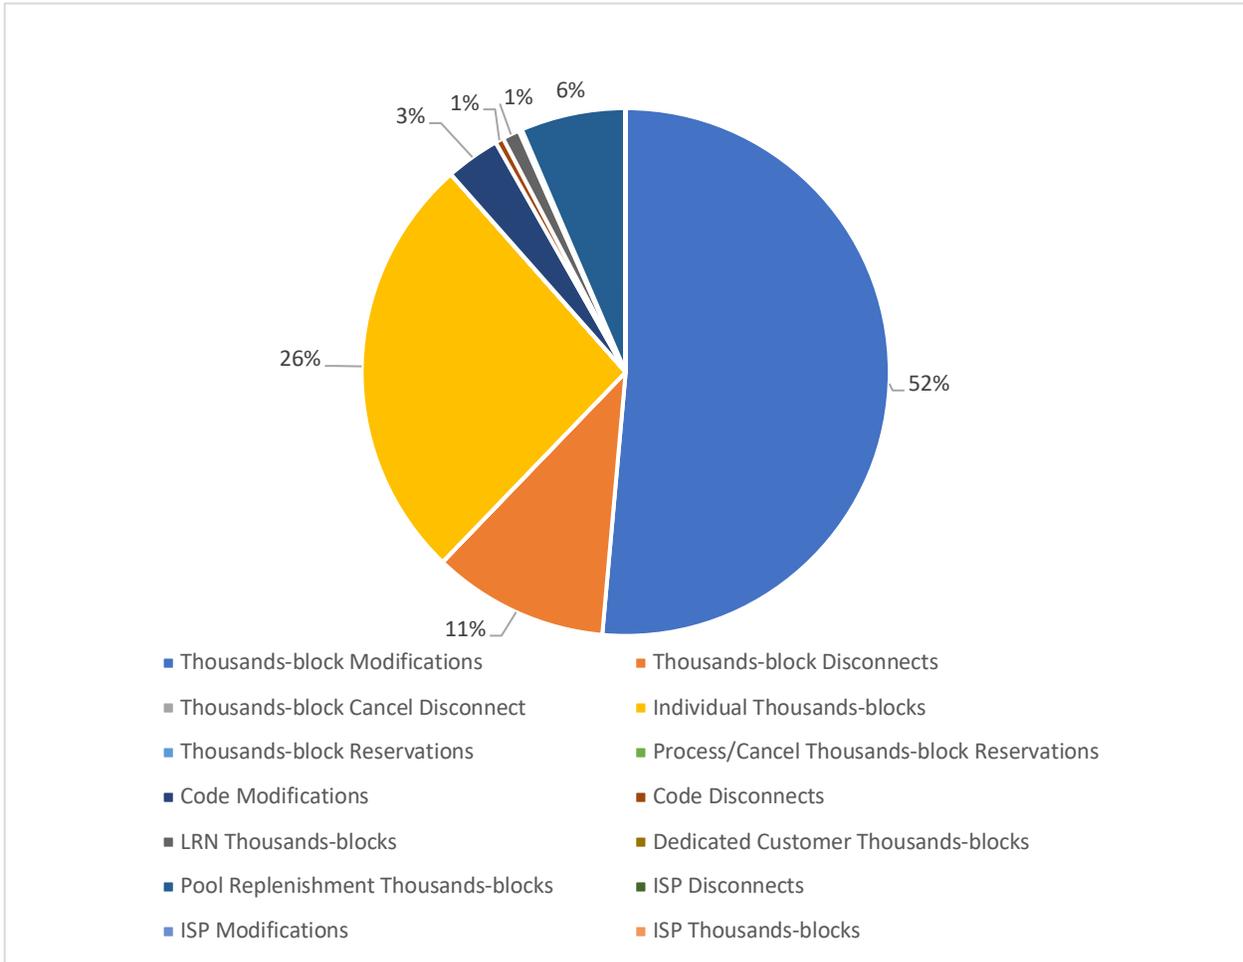

Figure 1: 2021 Pooling Applications by Type

NANPA also issued 18,050 Part 5s for thousands-block disconnects, reclamations, and exchanges during 2021, of which 17,793 were actual thousands-block disconnects.

NANPA processed 100% of the 340,814 applications (Part 3As) within seven calendar days, which exceeds the performance metric of 99%.

There were 797,535 assigned thousands-blocks in PAS at the end of 2021, an increase of 86,426 from 2020.

Figure 2 below depicts the monthly thousands-block assignments made by the NANPA during each month in 2021.

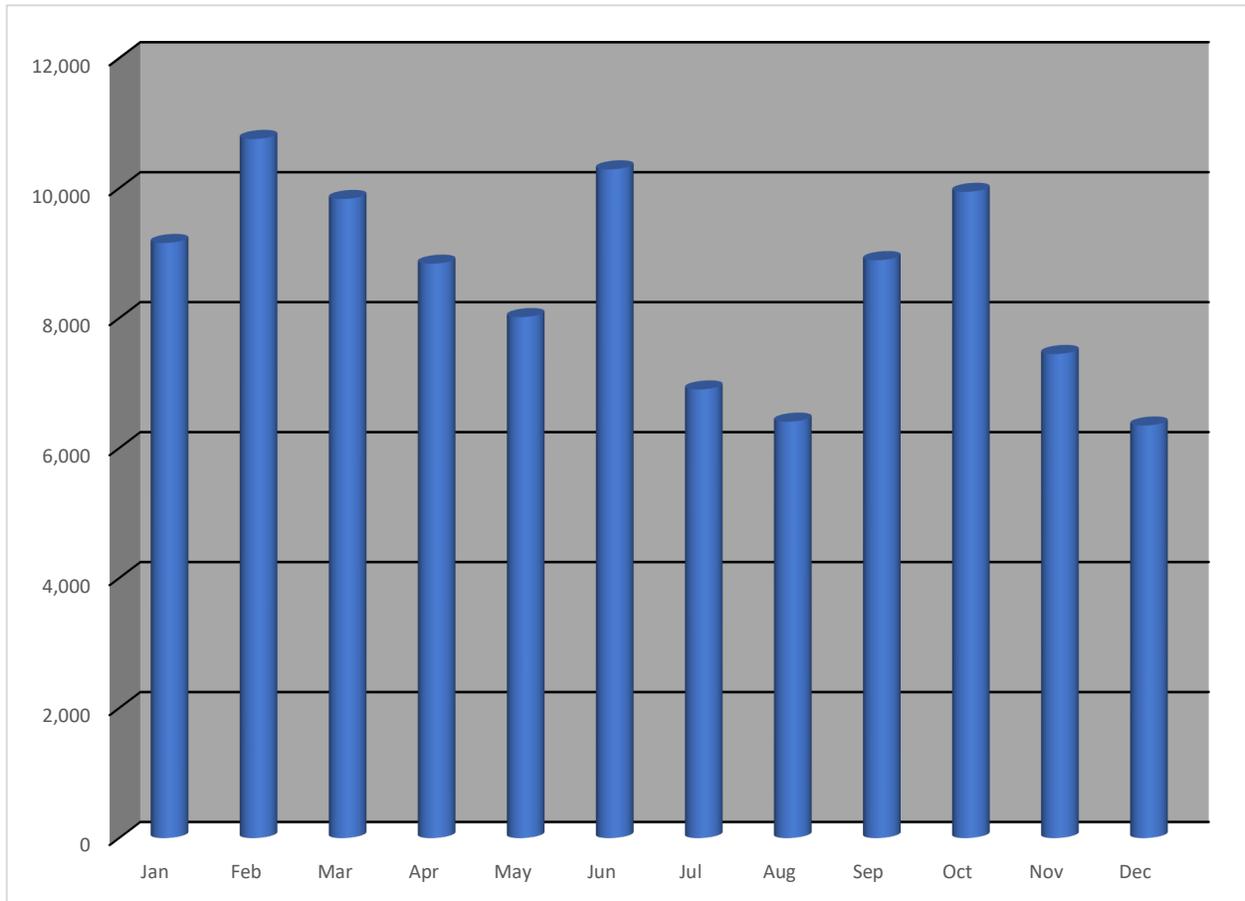

Figure 2: Thousands-blocks Assigned by NANPA in Each Month in 2021

The total number of applications (Part 3As) processed is a measure of the actual processing work performed by the Resource Administrators (RAs), because not every application results in the immediate assignment of a thousands-block. Although a large majority of applications for numbering resources are processed and approved immediately, some are suspended for future action, and some are denied or withdrawn entirely. Each of these actions requires work on the part of the RA and generates a Part 3A.

Figure 3 below provides a complete overview of all applications processed in PAS for 2021, including approvals, denials, withdrawals, and suspended applications.

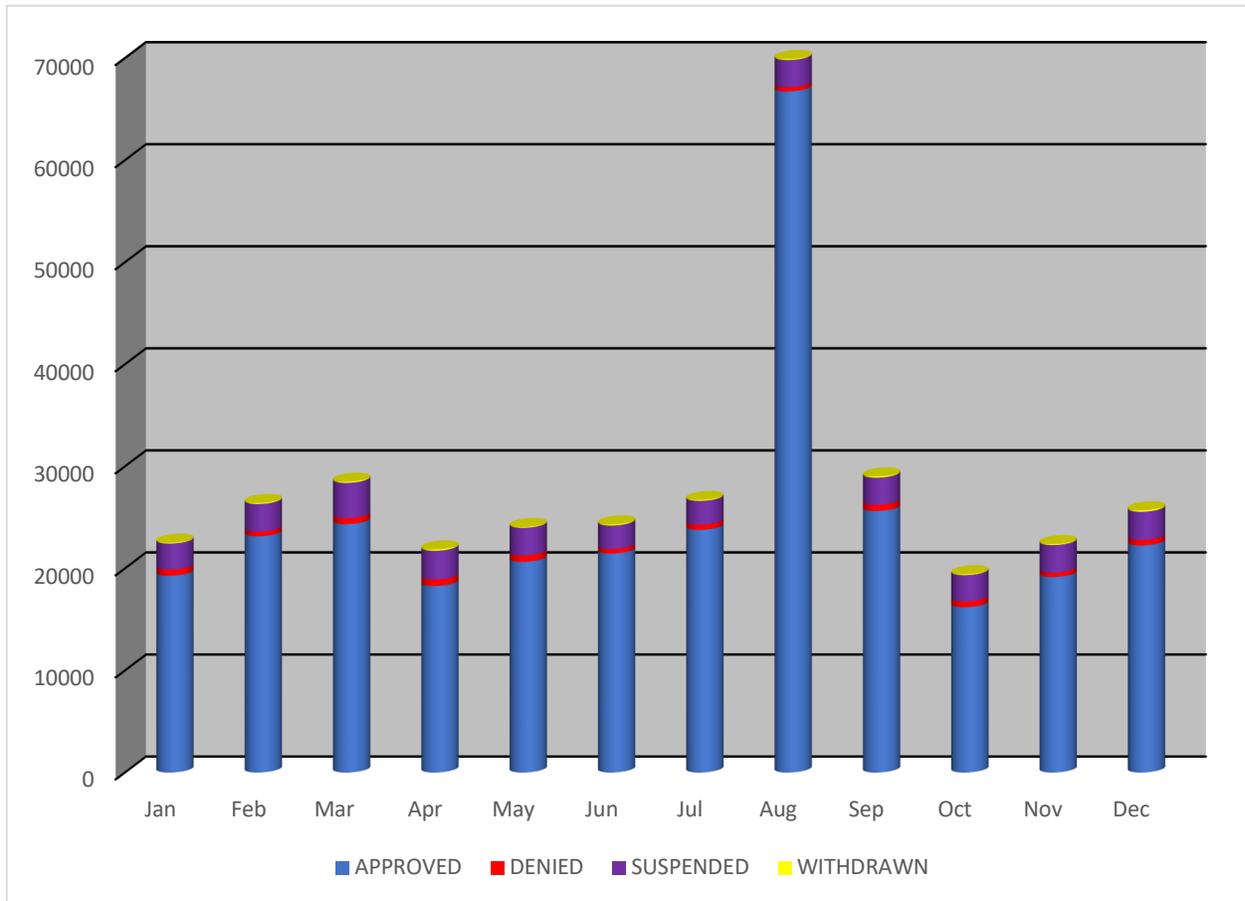

Figure 3: Overview of All 2021 Applications Processed by Status

Tables 4-5 and 4-6 list the ten states and NPAs for which the highest number of applications processed (Part 3As) occurred in 2021.

Table 4-5
Ten States with Highest Number of Applications Processed (Part 3As)

STATE	TOTAL PART 3As
CALIFORNIA	35,481
NEW YORK	22,291
TEXAS	21,522
FLORIDA	18,519
PENNSYLVANIA	17,882
OHIO	16,214
ILLINOIS	15,910
MASSACHUSETTS	12,124
NEW JERSEY	10,154
MICHIGAN	9,731

315	NEW YORK	2,167
803	SOUTH CAROLINA	2,051
845	NEW YORK	2,046

Pool replenishment allows service providers to open a CO code to add thousands-blocks to a pool when a pooling rate center inventory will either be equal to or falls below the aggregated six-month service provider forecasts. NANPA manages the process by determining when a rate center inventory is not adequate to meet forecasted demand. PAS alerts a service provider about the need to replenish the pool and permits several options for the service provider. Because it is not authorized to obtain resources directly, NANPA has no authority to replenish the inventory pools itself and therefore must rely on the service providers that can meet the application requirements to maintain adequate inventories by opening a CO code, keeping the thousands-

blocks they need and then returning the remaining thousands-blocks from that CO code to the pool.

Table 4-7 provides an overview of rate center inventories and pool replenishment.

**Table 4-7
 2021 Pool Replenishment Overview**

Average number of rate centers per month that had less than a six-month inventory	1,970
Percentage of total number of rate centers per month that had less than a six-month inventory	11%
Average number of rate centers per month that had no thousands-blocks available but had a forecasted need	1,006
Number of CO codes opened for pool replenishment	5,767

Table 4-8 shows the number of CO codes opened by NANPA in 2021 and for what purpose. Pool replenishment accounts for 83% of the CO codes opened.

**Table 4-8
 CO Codes Opened by Purpose**

PURPOSE	TOTAL	PERCENT OF TOTAL
LRN	1,124	16%
Dedicated Customer	58	1%
Pool Replenishment	5,767	83%
TOTAL	6,949	100%

Tables 4-9 and 4-10 show the ten states and NPAs which had the most pool replenishment activity in 2020.

Table 4-9
Ten States with the Most Pool Replenishment Activity

STATE	CODES OPENED
CALIFORNIA	640
NEW YORK	482
TEXAS	443
FLORIDA	423
ILLINOIS	286

4.3 OTHER NANPA CODE AND BLOCK ACTIVITIES

4.3.1 DATA QUALITY

NANPA manages the quality control and maintenance of the rate center data located on the website, completes the semi-annual forecasting reports, updates NAS and PAS in the event of area code relief, and provides status updates for the Industry at NANPA meetings.

The NPA/Rate Center Reports identify the pooling participation level status designation of all rate centers in each NPA, including where service providers are either required to participate in pooling

(Mandatory), are required to participate when a second service provider enters the rate center (Mandatory Single Service Provider), where pooling is not required, but either the state or a carrier has requested that the rate center be opened in PAS (Optional), or where no carrier has chosen to pool (Excluded).

NANPA is responsible for the accurate recording of all pooling information associated with every NPA, including the status designation for each rate center. For the definitions of rate center status designations, please see Section 4.4.

In addition, NANPA monitors and makes all of the changes that occur as a result Office of Management and Budget (OMB) directives related to population changes that affect pooling rate center designations. NANPA found no OMB directives in 2021 that affected rate center designations and therefore made no associated changes.

Changes to rate center file information are available in real-time through the pooling website. In 2021, NANPA made 134 rate center information changes. All of the file changes related to rate center status designation changes, of which a total of 83% were for either Excluded (X) to Optional (O) or Single-Service Provider Mandatory (M*) to Mandatory (M).

Table 4-11 shows the type of rate center information change and how many were changed during each month in 2021.

Table 4-11
Summary of Rate Center File Changes

REASON	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC	TOTALS
<i>Changes in Status:</i>

4.3.2 DEBT COLLECTION IMPROVEMENT ACT OF 1996, FCC 04-72, MD DOCKET 02-339, ADOPTED MARCH 25, 2004 (RED LIGHT RULE)

The “Red Light Rule” provides that anyone filing an application or seeking a benefit from the FCC or one of its components (including the Universal Service Administrative Corporation, the Telecommunications Relay Service, or the NANPA) who is delinquent in debts owed to the FCC will be barred from receiving a license or other benefit until the delinquency has been resolved. The FCC determined that numbering resources constitute a benefit and has directed the NANPA to withhold assignment of numbering resources to any entity identified by the FCC as delinquent in its payments to them.

In 2021, NANPA denied eight (8) CO code assignment requests and 101 block requests in compliance with this requirement.

4.3.3 SEEKING VOLUNTARY DISCONNECTS

When an SP requests to opt into pooling in an Excluded rate center, the rate center designation is changed from “Excluded” to “Optional,” NANPA will then seek voluntary thousands-block disconnects from existing SP(s) in that rate center so that the incoming SP can request thousands-blocks instead of opening a new CO code. When successful, this proactive effort prevents the unnecessary opening of CO codes. This time-consuming effort requires that NANPA first verify which SPs presently operates in the rate center, then locate the contact information for them, and finally send emails to each of the SPs explaining the circumstances and requesting the thousands-block disconnects.

During 2021, NANPA attempted to secure voluntary thousands-block disconnects (formerly known as “donations”) for 40 rate centers being changed from Excluded to Optional. NANPA was able to obtain disconnects for seven of those rate centers, thereby potentially saving the opening of seven CO codes.

At times a carrier will also contact NANPA to request that we seek disconnects in a pooling rate center it is entering to prevent the opening of a CO code when no thousands-blocks are available because it is either a single-service provider rate center or it is already available for pooling. This is especially useful in low population areas where thousands-blocks added to the pool from opening a CO code may never be utilized. In 2021, NANPA was asked by the carriers to request voluntary thousands-block disconnects in 82 Optional pooling rate centers that did not have any available thousands-blocks. NANPA requested and received disconnects for 30 of the rate centers which saved 30 CO codes from being opened.

4.3.4 ABANDONED CODES/THOUSANDS-BLOCKS:

When NANPA learns that a company has abandoned CO codes and thousands-blocks, NANPA initiates the process to recover or reassign those resources. NANPA works with the appropriate regulatory authority to obtain approval to treat the service provider’s resources as abandoned. Upon approval from the appropriate regulatory authority, NANPA coordinates with the NPAC to determine if there are any LRNs associated with a CO code or ported TNs on CO codes or thousands-blocks. After receiving confirmation that there are no LRNs or ported TNs on the potentially abandoned CO codes or thousands-blocks, NANPA also verifies that the thousands-blocks are 10% or less contaminated. It is only after all of these checks are made that NANPA

makes the CO code or thousands-block available for assignment to another service provider. If the CO code has ported TNs or the thousands-block is over 10% contaminated, NANPA will reach out to those service providers with ported TNs to request that they become the new CO code holder or block holder. This requires considerable work and coordination by NANPA.

There are some instances where NANPA determines through further research with regulators or other sources that a service provider with resources that were initially identified as being abandoned is still in business. NANPA stops the abandoned code process and educates the service provider about their responsibilities to file their NRUF and to keep their contact information up-to-date in the NANPA systems.

The following is a summary of abandoned CO code/thousands-block activity in 2021:

- 26 companies in 15 states abandoned CO codes and/or thousands-blocks
- 62 CO codes were transferred to new code holders
- One thousands-block was transferred to a new thousands-block holder
- 51 CO codes and 268 thousands-blocks were disconnected and made available

4.3.5 MANAGING JEOPARDIES

An outcome of reviewing CO code assignment rates in all NPAs and adjusting the projected NPA exhaust dates is that NANPA may recognize a need to declare a jeopardy condition in an NPA. A jeopardy condition exists when an NPA is in danger of running out of CO codes before relief can be provided.

When NANPA declares jeopardy, interim jeopardy procedures are put into place effective immediately. Interim jeopardy procedures allow for the assignment of three CO codes per month and remains in effect until the Industry can develop the final jeopardy procedures. NANPA posts the interim procedures to the NANPA website within one week of jeopardy declaration. No later than three weeks after jeopardy is declared, NANPA convenes an Industry meeting to develop the final jeopardy procedures. These procedures typically limit the number of CO codes that can be assigned each month and the Industry often will set a trigger for reevaluating the jeopardy allocation based on the assignment history, remaining CO codes and when area code relief will be implemented. NANPA facilitated three jeopardy review meetings in 2021: District of Columbia 202 NPA on April 30, California 209 NPA on July 26, and Virginia 540 and 757 NPAs on December 15.

NANPA posts the final jeopardy procedures to the NANPA website within two weeks after the Industry reaches consensus on the jeopardy procedures. In addition, if a relief filing has not yet been filed, NANPA will schedule an Industry meeting to develop a relief plan for the jeopardy NPA.

NANPA checks daily for applications submitted within the NPAs in jeopardy to ensure the jeopardy procedures are followed and CO codes are assigned only within the submission timeframe and to the proper number of OCNs. Those requests submitted within the submission timeframe and meet the assignment criteria, usually between the first and fifth business days of the month, are suspended until the lottery period ends. After the end of the submission timeframe, NANPA reviews the suspended requests and if fewer requests were submitted than

the monthly allotment permits, there is no lottery, and the requests are processed. If there are more requests than the monthly allotment permits, NANPA places all of the applications into a lottery and draws the allowed number of requests. The applications drawn from the lottery are processed and the remaining applications are denied. Often requests are submitted outside the lottery timeframes and those requests are immediately denied.

At the start of 2021, there were four NPAs in jeopardy: Illinois, 217 and 618, District of Columbia 202, and California 209. Nine NPAs were declared in jeopardy in 2021: Virginia 540 and 757, Pennsylvania 484/610, Ohio 513, Florida 305/786, 561, and 813, Missouri 314, and New York 516. Table 4-12 depicts the 13 NPAs in jeopardy in 2021:

**Table 4-12
NPAs in Jeopardy in 2021**

STATE	NPA	DATE JEOPARDY DECLARED	CO CODES ALLOCATED PER MONTH ¹⁸	NUMBER OF REQUESTS PERMITTED PER OCN
ILLINOIS	618	7/11/2000	5	5
ILLINOIS	217	3/17/2003	1	1
DISTRICT OF COLUMBIA	202	8/3/2020	3	3
CALIFORNIA	209	12/16/20	2	2
VIRGINIA	757	05/25/21	1	1
VIRGINIA	540	05/25/21	2	2
PENNSYLVANIA	484/610	06/17/21	1	1
OHIO	513	06/17/21	1	1
FLORIDA	305/786	09/23/21	4	4
FLORIDA	561	09/23/21	3	3
FLORIDA	813	09/23/21	2	2
MISSOURI	314	09/23/21	2	2
NEW YORK	516	09/23/21	1	1

Once CO codes become available for assignment in the new NPA according to the NPA relief implementation plan, NANPA rescinds jeopardy and rationing ceases.

NANPA rescinded jeopardy in three NPAs in 2021, after CO codes were made available for assignment in the new NPA: Illinois 217 (January), District of Columbia 202 (September), and Florida 813 (December).

¹⁸ The monthly allocation shown is as of December 31, 2021. The monthly allocations changed during the year for California 209, and Virginia 540 and 757.

NANPA facilitated a total of nine jeopardy meetings in 2021: six meetings to set the jeopardy procedures (Pennsylvania 484/610 NPA, Ohio 513 NPA, New York 516 NPA, Missouri 314 NPA, FL 305/786 NPA, 561 NPA, 813 NPA, and VA 540 NPA, 757 NPA) and three meetings to review jeopardy procedures (District of Columbia 202 NPA, Virginia 540 and 740 NPAs, and California 209).

4.3.6 AUTHORIZED INTERCONNECTED VOIP SUPPORT

On June 22, 2015, the Federal Communications Commission (FCC) released the VoIP Direct Access order establishing a process to authorize interconnected VoIP (iVoIP) providers to obtain telephone numbers directly from the NANPA. NANPA has been providing additional support for iVoIP providers and state regulators since the order became effective and the FCC began accepting applications for authorization in February 2016.

Once an iVoIP provider's direct access authorization application is granted, the applicant can immediately submit the required 30-day notification to states from which it intends to request numbers. The first numbering resources were assigned to an iVoIP entity in May 2016. By the end of 2021, a total of 149 applications had been submitted to the FCC for direct access authorization, with a total of 98 approved. Of those, 34 new applications were submitted in 2021, and the FCC issued 30 authorizations.

NANPA continues to support and educate iVoIP providers on application processing requirements, proper supporting documentation, and the information needed in 30-day notification letters. NANPA provides a "Getting Started for Interconnected VoIP Providers" quick sheet that offers guidance on the rules and Industry guidelines related to iVoIP direct access to numbering resources and have a "New Service Provider Checklist" to assist with process questions.

NANPA also works one-on-one with the iVoIP applicants to explain the rules and guidelines so the applications for numbering resources can be processed as quickly as possible. This often prevents the need to resubmit documentation or applications. NANPA has spent a vast amount of time with individual iVoIP provider's personnel going over the process for registering in PAS, what documentation they need and how to submit applications.

In addition, NANPA continues sending regular updates to the state commissions whenever new applications or filings are made and when initial requests to open CO codes for LRNs are submitted in their states. NANPA continues to respond to questions from states about the 30-day notification process and works with the states and the FCC on whether the iVoIP entities must follow state-specific regulations.

NANPA created the "VoIP Provider 30-day Notification State Regulatory Sheet" which is posted to our website and is intended to save iVoIP providers time when submitting a 30-day notification to a state. NANPA developed the file with information obtained from state regulatory authorities about how to submit 30-day notifications, as well as contact information for each state. NANPA updates the information when notified about any changes.

In 2021, there were 51,412 applications (Part 3As) processed for iVoIP providers (IPES OCN), which is approximately 15% of the total number of Parts 3As processed. Table 4-13 details the total number of applications processed for iVoIP providers in 2021:

**Table 4-13
 2021 iVoIP Applications (Part 3As) Processed**

Approvals	43,350
Denials	1,988
Suspensions	5,667
Withdrawals	407
TOTAL	51,412

4.3.7 CO CODE CONSERVATION EFFORTS

NANPA continued the practice of assisting service providers and state regulators in the transfer of a CO code from one service provider to another service provider needing to open a code for a Location Routing Number (LRN). NANPA coordinated with regulators and service providers in an attempt to transfer 161 CO codes, where possible, to avoid opening new CO codes for LRN purposes. NANPA is unable to accurately track whether CO codes were actually saved because of the many steps involved in the transfer process but based on responses from SPs, NANPA estimates at least 100 CO codes were saved.

4.3.8 MASS MODIFICATION PROCESS

Service providers may submit a mass modification spreadsheet containing modifications (e.g., change in switch ID, intra-company OCN, tandem homing CLLI) to CO code records when such changes impact 50 or more CO codes. In 2021, NANPA processed 20,428 CO code changes and 139,160 changes for thousands-blocks via the mass modification process.

4.3.9 RECLAMATION

4.3.9.1 CO CODE RECLAMATION

Each CO code assignment has an associated “effective date” when the CO code will be placed in service. The assignment guidelines require that the CO code be placed in service no later than six-months after the original effective date. The assignee confirms that the CO code is in service by submitting a Part 4. If a Part 4 has not been received by NANPA during the first five months following the original effective date, NANPA will send a reminder notice to the code assignee. In 2021, 6,888 Part 4s were processed by NANPA. In order to process the Part 4 to show the code is in service, NANPA must complete the work item in NAS as well as update the in-service indicator on the ACD screen in iconectiv®’s BIRRDs (Business Integrated Rating and Routing Database System).

NANPA tracks CO code assignment effective dates and if the Part 4 is not received within the six-month period following the effective date, the code is considered to be delinquent and NANPA notifies the appropriate regulatory authority. The FCC delegated authority to the states to determine whether or not delinquent CO codes should be reclaimed and makes reclamation decisions for those states that decided not to participate in the process. The NANPA website provides detailed information about the reclamation process, including contact information for each participating state and the FCC.

NANPA monitors the number of delinquent CO codes on which it begins the reclamation process, the number of overdue Part 4s overall, as well as the number of CO codes actually reclaimed each month. The recovery of a CO code must be directed by the appropriate regulatory authority. NANPA initiated reclamation for four CO codes in 2021. As shown in Table 4-13, there was no actual reclamation of CO codes in 2021.

**Table 4-14
 2021 CO Code Reclamation Activity**

MONTH	TOTAL NUMBER OF CO CODES WITH OVERDUE PART 4S	TOTAL NUMBER OF NEW CO CODES WITH OVERDUE PART 4S	TOTAL NUMBER OF CO CODES FOR WHICH RECLAMATION WAS INITIATED ¹⁹	TOTAL NUMBER OF CO CODES RECLAIMED
January	30	4	0	0
February	46	6	0	0
March	51	20	0	0
April	54	16	0	0
May	43	2	2	0
June	41	6	0	0
July	34	3	0	0
August	43	13	0	0
September	49	11	2	0
October	43	8	0	0
November	34	7	0	0
December	29	7	0	0
TOTAL	497	103	4	0

4.3.9.2 THOUSANDS-BLOCK RECLAMATION

NANPA initiates thousands-block reclamation according to the TBCOCAG, which directs that, “[a] thousands-block assigned to a service provider should be placed into service by the applicable activation deadline, that is, six-months after the original effective date returned on the Part 3A and entered on the BCD/BCR screen in BIRRDS.” Each thousands-block assignment has an associated “Part 3A effective date,” which is the date the individual numbers in the thousands-block become available to be assigned to customers. The thousands-block holder confirms that the thousands-block is in service by submitting a Part 4A to NANPA. If NANPA does not receive the Part 4A during the first five months following the original effective date identified on the Part 3A, NANPA sends a reminder notice to the thousands-block holder. NANPA also sends a second reminder to the SP on the day after the Part 4A was due. In 2021, NANPA processed 99,515 Part 4As.

¹⁹ While a state may authorize the NANPA to initiate CO code reclamation, not all CO codes in this category have been reclaimed. In some cases, the reclamation process is halted if it is determined that the thousands-blocks are actually in service.

If the Part 4A is not received within six-months of the original Part 3A effective date, the Part 4A is considered delinquent and the thousands-block is eligible to be reclaimed. By the 10th calendar day of each month, NANPA sends a list of delinquent Part 4As for the thousands-blocks to each appropriate state commission and FCC contact. NANPA sent 391 monthly reports to regulatory staff to address a total of 5,669 thousands-blocks on the overdue Part 4/4A reports in 2021. Of those, 2,170 thousands-blocks were new.

An appropriate regulatory agency must authorize NANPA to initiate thousands-block reclamation, but then may halt the reclamation process if, for example, it is determined that numbers in the thousands-blocks are actually in service. In 2021, regulators authorized NANPA to initiate reclamation on 23 thousands-blocks. Of those, nine thousands-blocks were actually reclaimed: six in New York, two in Florida and one in Michigan. Table 4-15 depicts all of the 2021 thousands-block reclamation activity:

**Table 4-15
Block Reclamation Activity**

MONTH	TOTAL NUMBER OF THOUSANDS-BLOCKS WITH OVERDUE PART 4AS	TOTAL NUMBER OF NEW THOUSANDS-BLOCKS WITH OVERDUE PART 4AS	TOTAL NUMBER OF THOUSANDS-BLOCKS FOR WHICH RECLAMATION WAS INITIATED ²⁰	TOTAL NUMBER OF THOUSANDS-BLOCKS RECLAIMED
January	317	120	2	0
February	568	352	1	0
March	535	282	1	0
April	478	168	0	0

December	436	153	2	0
TOTAL	5,669	2,170	23	9

4.4 IDENTIFICATION OF EXISTING AND POTENTIAL THOUSANDS-BLOCK POOLING AREAS

As of December 31, 2021, there are 16,797 distinct thousands-block pooling rate centers (i.e., pooling areas), which constitute 90.8% of the 18,485 total number of distinct rate centers. While thousands-block pooling is available in all states, the District of Columbia and Puerto Rico, not all states have mandatory pooling, either by FCC rule or delegated authority. North Dakota, South Dakota, and Wyoming have no mandatory pooling rate centers. While NANPA cannot

²⁰ While a state may authorize the NANPA to initiate thousands-block reclamation, not all thousands-blocks in this category have been reclaimed. In some cases, the reclamation process is halted if it is determined that the thousands-blocks are actually in service.

speculate about “potential” pooling areas, there are currently 1,752 rate centers in which no carrier is pooling and could therefore be considered “potential” pooling areas.

NANPA designates each rate center according to one of the following definitions:

1. Mandatory (M) - This rate center is located in a top-100 MSA and service providers with numbering resources in this rate center that have not been granted a specific exemption must pool in this rate center.
2. Mandatory State (M) - Pooling was implemented in this rate center pursuant to a state commission order. This rate center is not in a top-100 MSA, but has one or more pooling-capable service providers, and is considered a mandatory pooling rate center.
3. Mandatory Single Service Provider (M*) - This rate center is located in a top 100 MSA, but has only one service provider that has numbering resources. This rate center will be considered optional under these conditions and designated as M*. When a second service provider receives numbering resources in this rate center, the designation will be changed to M for Mandatory.
4. Mandatory State Single Service Provider (M*) - Pooling has been implemented in this rate center pursuant to a state commission order. This rate center is not in a top 100 MSA and has only one service provider that has numbering resources. This rate center will be considered optional under these conditions and designated as M*. When a second service provider receives numbering resources in this rate center, the designation will be changed to M for Mandatory State.
5. Optional (O) - This rate center is not in a top 100 MSA and any service provider with numbering resources in this rate center may elect to pool at its option. Service providers may voluntarily participate in thousands-block number pooling in an Optional rate center outside the top 100 MSAs.
6. Excluded (X) - This rate center is not in a top-100 MSA and no service provider is currently participating in pooling. This rate center is not included in the Pooling Administration System (PAS).

4.4.1 IDENTIFICATION OF EXISTING AND POTENTIAL POOLING AREAS

Table 4-16 below identifies the 16,797 distinct pooling rate centers (*i.e.*, pooling areas), and their status designations, by state, as of December 31, 2021. Pooling rate centers are identified as either “mandatory” or “optional.” Rate centers with a designation of “excluded” are not considered pooling areas.

4.4.2 SUMMARIZED INFORMATION ABOUT EXISTING AND “POTENTIAL” POOLING AREAS

Table 4-17 illustrates the breakdown of the total number and percentage of rate centers that are available for pooling, as well as by pooling status designation.

**Table 4-17
 Summarized Information about Existing and “Potential” Pooling Areas**

Total Number of Distinct Rate Centers Available for Pooling	16,797
Percentage of Distinct Rate Centers Available for Pooling	90.8%
Total Number of Mandatory (M and M) Distinct Rate Centers	9,293
Percentage of Distinct Rate Centers that are Mandatory	50.3%
Total Number of Distinct Mandatory Single-Service Provider (M*and M*) Rate Centers	681

Percentage of Distinct Rate Centers that are Mandatory Single-Service Provider	3.6%
Total Number of Distinct Optional Rate Centers	6,823
Percentage of Distinct Rate Centers that are Optional	37.0%
Total Number of Distinct Rate Centers Excluded from Pooling	1,688
Percentage of Distinct Rate Centers that are Excluded from Pooling	9.1%
Total Number of Distinct Rate Centers	18,485

4.5 AGGREGATED TOTAL NUMBER OF THE SERVICE PROVIDERS PARTICIPATING IN THE POOLED AREA, BY POOL

A list of the aggregated total by pool of the service providers participating in the pooled areas in 2021 can be found as Attachment 5. There are 1,141 distinct service providers²¹ participating in 16,797 distinct pooled rate centers in 239 NPA and NPA complexes covering 52 jurisdictions -- 50 states, the District of Columbia, and Puerto Rico.

²¹ This count of distinct service providers consolidates all OCNs for a single company under one parent company.

5 FORECAST RESULTS AND REVIEW OF FORECASTS VERSUS ACTUAL THOUSANDS-BLOCK ASSIGNMENTS

This section identifies forecast results by NPA and contains a review of forecasts compared to actual thousands-block assignments for the current year and the previous years, as specifically required by the contract.

HIGHLIGHTS OF 2021 FORECAST DATA	
There were forecasts in 239 NPA and NPA complexes:	
▪	13,940 distinct rate areas with forecasts
▪	152,341 forecasted thousands-blocks
▪	102,759 thousands-blocks assigned
▪	67.45% of the thousands-blocks forecasted were assigned

In 2021, 152,341 thousands-blocks were forecasted, and 102,759 thousands-blocks were assigned in 239 NPA and NPA complexes. This resulted in 67.45% of the forecasted thousands-blocks being assigned.

In 2021, out of the 16,797 pooling rate centers, carriers forecasted a need for thousands-blocks in 13,940 of those rate centers, or in 83% of the pooling rate centers, leaving only 2,850 pooling rate centers where no thousands-blocks were forecasted during 2021. Table 5-1 below depicts the percentage of thousands-blocks forecasted versus actual thousands-block assignment by NPA or NPA Complex.

Table 5-1
Forecasted versus Actual Thousands-block Assignments by NPA or NPA Complex for 2021

Table 5-2 shows the thousands-blocks forecasted versus actual thousands-block assignments by percentage assigned, from lowest to highest, in each NPA or NPA Complex. The Alaska 907 NPA had the lowest percentage of thousands-blocks assigned compared to total thousands-blocks forecasted, at 17.07%, while the Texas 806 NPA had the highest ratio at 89.69%.

For the last five years, the highest percentage of forecasted to actual assigned thousands-blocks was 67.4% in 2021 and the lowest was in 2017 at 32.7%.

Table 5-3 below illustrates the ratio between forecasts and actual assigned thousands-blocks from 2017 through 2021, ranked from highest percentage to lowest.

Table 5-3
Summary of Forecasted and Actual Assigned Thousands-Blocks from 2017 through 2021

RANK FROM HIGHEST TO LOWEST	YEAR	TOTAL FORECASTED THOUSANDS-BLOCKS	TOTAL THOUSANDS-BLOCKS ASSIGNED	PERCENTAGE OF ASSIGNED/ FORECASTED THOUSANDS-BLOCKS
1	2021	152,341	102,759	67.4%
2	2020	134,203	74,078	55.2%
3	2019	114,472	51,929	45.4%
4	2018	116,958	46,588	39.8%
5	2017	121,477	39,728	32.7%

6 DESCRIPTION AND STATUS OF NON-GEOGRAPHIC RESOURCES ACTIVITY

Non-Geographic Resources include Carrier Identification Codes (“CICs”), 5XX, 900, 555, N11, 456, Automatic Number Identification “II” digits and Vertical Service Codes. This section describes each of these resources including details about 2021 activities.

6.1 CARRIER IDENTIFICATION CODES

Carrier Identification Codes (“CICs”) are four-digit codes used to route and bill telephone traffic. An entity acquires a CIC assignment by purchasing Feature Group B (FG B) or Feature Group D (FG D) access from an access service provider. NANPA also assigns FG D CICs to “switchless resellers” without the requirement to purchase FG D trunk access before applying for a CIC. Finally, billing and collection clearinghouses (“BC clearinghouses”) are allowed to obtain FG D and “matching” FG B CICs without the requirement to purchase access. A “BC clearinghouse” is only allowed to apply for a CIC when the use of an ABEC (Alternate Billing Entity Code) is not permitted as an identifier and/or when the use of an ABEC has been determined as technically non-feasible.

In the U.S., all applicants apply to NANPA directly through NAS for CIC assignments. If the applicant is a long distance carrier, the access provider must separately provide NANPA with a copy of the Access Service Request (ASR) to verify that FG D trunk access has been ordered. If the CIC applicant is a Local Exchange Carrier (LEC), incumbent LEC (ILEC) or competitive LEC (CLEC), a copy of the authorization from a state regulatory commission granting the applicant authority must be provided separately to NANPA in support of their CIC application. If the applicant is a switchless reseller, it must separately provide NANPA with documentation that validates “switchless reseller” status. State regulatory commission certification is required unless the state does not issue switchless reseller certification. If the state does not issue such certification, a written statement by an officer of the applicant company will be accepted to verify “switchless reseller” status. In Canada, companies apply for CICs to the Canadian Numbering Administrator (CNA), who verifies that Canadian regulatory requirements have been met. The CNA then submits the application to NANPA via NAS on behalf of the applicant.

Industry guidelines for the administration of CICs, *Carrier Identification Code (CIC) Assignment Guidelines*, ATIS 0300050, may be found on the ATIS website at http://www.atis.org/01_committ_forums/INC/documents/. The assignment guidelines require all CIC assignees to submit “Entity Semi-Annual” CIC reports. In addition, access providers providing FG B and/or FG D access service, particularly access providers with more than 30 CICs programmed in their switches, are required to submit access provider semi-annual CIC access/usage reports to NANPA for analysis.

Information contained in these reports serves as the basis for NANPA’s CIC reclamation efforts. If no access provider reports access/usage for a given CIC, NANPA initiates reclamation procedures. All CIC assignees, including switchless resellers and “BC Clearinghouses”, are required to submit semi-annual “Entity Access/Usage” reports to NANPA. These reports demonstrate whether access or usage has been established as well as document that assigned CICs are being used in accordance with the CIC Assignment Guidelines.

6.1.1 CIC DATA INTEGRITY

Maintaining accurate assignment records and entity contact information is an ongoing challenge for NANPA due to abandoned CICs and the high volume of mergers, acquisitions, asset purchases and bankruptcies that occur in the telecommunications Industry. Obtaining documentation on and verification of these activities is often difficult, but crucial to the integrity of information contained in the CIC assignment databases. NANPA continues to send notifications in an effort to work with the Industry to maintain the accuracy of the CIC assignment information.

6.1.2 FG D CIC ACTIVITY

During 2021, NANPA assigned two new FG D CICs and 20 FG B CICs were returned, as shown in Table 6-1. At the end of 2021, 1,744 FG D CICs were assigned in total, leaving 8,033 FG D CICs available for assignment. The potential exhaust of the FG D CIC resource is not a concern based on the current rate of assignment and the current FCC limit of two FG D CICs per “Entity.”

There are 223 codes from the entire FG D CIC resource that are not available for assignment. These include CICs 9000-9199, which are available to all carriers for intra-network use only. Also included are CICs 0000 and 5000, used exclusively for testing, 0911 and twenty CICs in the formats X411 and 411X, which have been marked unassignable at the direction of the FCC.

NANPA identifies FG D CICs as “abandoned” when CICs are assigned to companies no longer in business, companies that have sold assets to other entities, or companies that have been acquired by other entities through mergers/acquisitions. During 2021, NANPA reclaimed two FG D CICs.

Table 6-1
2021 Monthly FG D CIC assignments, denials and returns/reclaimed

Month	Assigned	Returned/ Reclaimed	Denied	Withdrawn
January	0	13	1	0
February	1	1	0	0
March	0	0	0	0
April	0	4	2	4
May	0	0	0	1
June	0	0	0	0
July	0	2	0	0
August	0	0	0	0
September	0	0	0	0
October	0	0	0	0
November	1	0	1	0
December	0	0	0	0
TOTAL	2	20	4	5

6.1.3 FG B CIC ACTIVITY

In 2021, no FG B CICs were assigned and seven FG B CICs were returned, as shown in Table 6-2. At the end of 2021, 180 FG B CICs were assigned in total. The potential exhaust of the FG B CIC resource is not a concern based on the current rate of assignment.

NANPA identifies FG B CICs as “abandoned” when CICs are assigned to companies no longer in business, to companies that have sold assets to other entities, or to companies that have been acquired by other entities through mergers/acquisitions. During 2021, NANPA reclaimed one FG B CIC.

Table 6-2
2021 Monthly FG B CIC assignments, denials and returns/reclaimed

Month	Assigned	Returned /Reclaimed	Denied	Withdrawn
January	0	2	0	0
February	0	0	0	0

November	0	0	0	0
December	0	0	0	0
TOTAL	0	7	0	0

6.2 RESOURCE REPORT—5XX-NXX CODES

5XX-NXX codes are used for applications which are non-geographic in nature, are not assigned to rate centers and may or may not utilize the Public Switched Telephone Network (PSTN) but do require an E.164 addressing scheme. The use of this NANP numbering resource is to communicate with both fixed and mobile devices, some of which may be unattended. This resource may also be used for applications enabling machines, which would include but not be limited to wireless devices and appliances, with the ability to share information with back-office control and database systems and the people that use them. Service is limited only by terminal and network capabilities and restrictions imposed by the service provider.

NANPA assigns 5XX-NXX codes in accordance with the *Non-Geographic 5XX-NXX Code Assignment Guidelines, ATIS 0300052*, which may be downloaded from the ATIS website (http://www.atis.org/01_committ_forums/INC/documents/). It should be noted that the 5XX resource is not portable.

There were 13 5XX NPAs in-service at the end of 2021: NPAs 500, 521, 533, 544,

566, 577, 588, 522, 523, 524, 525, 526 and 527. In January 2021, NANPA initiated NXX assignments from the 526 NPA and published Planning Letter 558. In August 2021, NANPA published Planning Letter 564 (Assignment of NPA 527 for Non-Geographic Services). In September 2021, NANPA initiated NXX assignments from the 527 NPA and published Planning Letter 566.

During 2021, NANPA assigned 1,582 new 5XX-NXX codes compared to 1,186 5XX-NXX codes assigned in 2020 and 214 5XX-NXX codes were returned. At the end of 2021, 9,885 5XX-NXX codes remain as assigned, and 415 5XX-NXX codes available for assignment.

There are a total of 26 5XX-NXX codes that are not available for assignment within the 5XX-555 and 5XX-911. Based on NRUF forecast data and assignment information, it is projected that multiple 5XX-NXXs will be needed over the next several years.

There are 20 reserved 5XX NPAs: 528, 529, 532, 538, 542, 543, 545, 547, 549, 552, 553, 554, 556, 569, 578, 589, 550, 535, 546 and 558.

NANPA continues to provide information concerning assignments, updates, and reclamations for inclusion in iconectiv's Local Exchange Routing Guide (LERG™).

6.3 RESOURCE REPORT—900-NXX CODES

900 numbers are used for premium services, with the cost of each 900 call billed to the calling party. NANPA assigns these numbers according to Industry-developed guidelines, *9YY NXX Code Assignment Guidelines, ATIS-0300060*, that may be found on the ATIS website at http://www.atis.org/01_committ_forums/INC/documents/.

There were no 900-NXX codes assigned and no 900-NXX codes returned in 2021. There were 49 900-NXX codes that were unavailable for assignment, this includes eight 900-N11 codes and 41 900-NXX codes reserved for Canadian use.

At the end of 2021, there were 53 900-NXXs that remain as assigned and 608 900-NXX codes available for assignment. With the quantity of available 900-NXX codes, exhaust of the 900 NPA is not an issue at this time.

NANPA continues to provide information about assignments, updates, and reclamations for inclusion in the LERG Routing Guide.

6.4 RESOURCE REPORT—555 LINE NUMBERS

555 numbers were made available starting in 1994 for the purpose of reaching a wide variety of information services. Although nearly 8,000 555 line numbers were assigned, these numbers were not placed into service. In May 2016, the Industry Numbering Committee (INC) determined that the purpose for which this resource was intended had been accommodated by other information/communication technologies.

As a result, INC created the *555 NXX Line Number Reference Document, ATIS- 0300115* and agreed to sunset the *555 NXX Assignment Guidelines, ATIS 0300048*. The FCC approved this decision in September 2016.

All 555 line numbers have been returned to the inventory of NANPA resources except the following that remain in use:

- 555-1212 Directory Assistance National use
- 555-4334 Assigned National use

The fictitious, non-working numbers, 555-0100 through 555-0199, remain reserved for entertainment/advertising use.

6.5 RESOURCE REPORT—456-NXX CODES

NXX codes from the 456 NPA were made available in 1993 (IL-93/08-002) and used to identify carrier-specific services. This was accomplished by providing carrier identification within the dialed digits of the E.164 number. More specifically, the prefix following 456 (456-NXX) identified the carrier. Use of these numbers enabled the proper routing of inbound international calls destined for these services into and between NANP countries.

In 2017, INC determined there was no longer a need for the 456 NPA and agreed to sunset the *International Inbound NPA (INT/NPA/NXX) Assignment Guidelines, ATIS-0300049*, and age the 456 NPA for five years before the NPA is returned to the general purpose NPA code pool. This means the 456 NPA will be returned to the general purpose NPA code pool in 2023.

6.6 RESOURCE REPORT—N11 CODES

N11 codes, listed with their descriptions in Table 6-3, are the only valid three-digit telephone numbers in the NANP.²²

The FCC administers N11 codes in the U.S. pursuant to the Telecommunications Act of 1996. The Canadian Radio-television and Telecommunications Commission (CRTC) administers N11 codes in Canada. It should be noted that 411 and 611, although long used for the purposes indicated in the table, have not been formally assigned by the FCC in the U.S. at this time.

Table 6-3
N11 Code Assignments

N11 CODE	DESCRIPTION
211	Community information and referral services
311	Non-emergency police and other governmental services (U.S.)
411	Local directory assistance
511	Traffic and transportation information (U.S.); Provision of Weather and Traveler Information Services (Canada)
611	Repair service

²² In 2020, the FCC approved the use of the 988 three-digit abbreviated code to access the National Suicide Prevention Lifeline. The 988 abbreviated code will be available for use after July 15, 2022.

N11 CODE	DESCRIPTION
711	Telecommunications Relay Service (TRS)
811	Access to One Call Services to Protect Pipeline and Utilities from Excavation Damage (U.S.); Non-Urgent Health Teletriage Services (Canada)
911	Emergency

6.7 RESOURCE REPORT—AUTOMATIC NUMBER IDENTIFICATION “II” DIGITS

Automatic Number Identification (ANI) Information Integers (“II”) digits are digit pairs sent with the originating telephone number. The digit pair identifies the type of originating station, e.g., plain old telephone service (POTS) or hotel/motel. NANPA assigns these numbers in accordance with Industry-developed guidelines that may be found on the ATIS website at http://www.atis.org/01_committ_forums/INC/documents/. The guidelines are entitled *Automatic Number Identification (ANI) Information Digits Codes, ATIS- 0300064*. Requests for the assignment of ANI II digits are referred to the INC for consideration. If the INC approves the request, NANPA makes the assignment.

No ANI II digit assignments were made in 2021. A list of ANI II digit assignments can be found on the NANPA website at https://www.nationalnanpa.com/number_resource_info/ani_ii_assignments.html.

6.8 RESOURCE REPORT—VERTICAL SERVICE CODES

Vertical Service Codes (VSCs) are customer-dialed codes in the *XX or *2XX dialing format for touch-tone and the 11XX or 112XX dialing format for rotary phones. They are used to provide customer access to features and services (e.g., call forwarding, automatic callback, etc.) provided by network service providers such as local exchange carriers, interexchange carriers or commercial mobile radio service (CMRS) providers. NANPA assigns VSCs in accordance with Industry- developed guidelines, *Vertical Service Code Assignment Guidelines, ATIS-0300058*, that may be found on the ATIS website at http://www.atis.org/01_committ_forums/INC/documents/.

No VSC assignments were made in 2021. There are 62 assigned VSCs. The following are the list of assigned VSCs²³:

- *00 - Inward Voice Activated Services (English)
- *01 - Inward Voice Activated Services (French)
- *02 - Deactivation/Activation of In-Session Activation (ISA) on a per line basis
- *03 - Deactivation of In-Session Activation (ISA) on a per call basis
- *09 - Selective Call Blocking/Reporting
- *2X - Reserved for expansion to 3-digit VSCs
- *228 - Over-the-Air Service Provisioning

²³ VSC codes *94 through *99 are reserved for future assignment.

- *272 - Access Wireless Priority Service
- *3X - Reserved for expansion to 3-digit VSCs
- *40 - Change Forward-To Number for Customer Programmable Call Forwarding Busy Line
- *41 - Six-Way Conference Calling Activation
- *42 - Change Forward-To Number for Customer Programmable Call Forwarding Don't Answer
- *43 - Drop last member of Six-Way Conference Call
- *44 - Voice Activated Dialing
- *45 - Voice Dialing Extended Dial Tone
- *46 - French Voice Activated Network Control
- *47 - Override Feature Authorization
- *48 - Override Do Not Disturb
- *49 - Long Distance Signal
- *50 - Voice Activated Network Control
- *51 - Who Called Me?
- *52 - Single Line Variety Package (SVP) - Call Hold
- *53 - Single Line Variety Package (SVP) - Distinctive Ring B
- *54 - Single Line Variety Package (SVP) - Distinctive Ring C
- *55 - Single Line Variety Package (SVP) - Distinctive Ring D
- *56 - Change Forward-To Number for ISDN Call Forwarding
- *57 - Customer Originated Trace
- *58 - ISDN MBKS Manual Exclusion Activation
- *59 - ISDN MBKS Manual Exclusion Deactivation
- *60 - Automatic - Selective Call Rejection Activation
- *61 - Distinctive Ringing/Call Waiting Activation
- *62 - Selective Call Waiting
- *63 - Selective Call Forwarding Activation
- *64 - Selective Call Acceptance Activation
- *65 - Calling Number Delivery Activation
- *66 - Automatic Callback Activation
- *67 - Calling Number Delivery Blocking
- *68 - Call Forwarding Busy Line/Don't Answer Activation
- *69 - Recall Activation
- *70 - Cancel Call Waiting
- *71 - Usage Sensitive Three-way Calling
- *72 - Call Forwarding Activation
- *73 - Call Forwarding Deactivation
- *74 - Speed Calling 8 - Change List
- *75 - Speed Calling 30 - Change List
- *76 - Advanced Call Waiting Deluxe

- *77 - Anonymous Call Rejection Activation
- *78 - Do Not Disturb Activation
- *79 - Do Not Disturb Deactivation
- *80 - Selective Call Rejection Deactivation
- *81 - Distinctive Ringing/Call Waiting Deactivation
- *82 - Line Blocking Deactivation
- *83 - Selective Call Forwarding Deactivation
- *84 - Selective Call Acceptance Deactivation
- *85 - Calling Number Delivery Deactivation
- *86 - Automatic Callback Deactivation
- *87 - Anonymous Call Rejection Deactivation
- *88 - Call Forwarding Busy Line/Don't Answer Deactivation
- *89 - Automatic Recall Deactivation
- *90 - Customer Programmable Call Forwarding Busy Line Activation
- *91 - Customer Programmable Call Forwarding Busy Line Deactivation
- *92 - Customer Programmable Call Forwarding Don't Answer Activation
- *93 - Customer Programmable Call Forwarding Don't Answer Deactivation

7 DESCRIPTION AND STATUS OF P-ANI ADMINISTRATION

7.1 P-ANI ADMINISTRATOR (RNA) PRODUCTIVITY:

The P-ANI Administrator (RNA) processes p-ANI applications, carriers' annual reports and forecasts. The forecasts are used to develop the *P-ANI Activity and Projected Exhaust Report*, which can be found in Attachment 6.

Table 7-1 addresses the count of p-ANIs requested, assigned, returned, or modified on a monthly basis in 2021. This is not to be confused with the number of applications processed.

**Table 7-1
Total Number of p-ANIs by Activity Type**

	REQUESTED	ASSIGNED	RETURNED	MODIFIED
Jan	578	548	12	0
Feb	4,500	4,500	44	0
Mar	3,031	3,031	1,699	0
Apr	943	943	24	0
May	1,203	1,203	38	2
Jun	604	604	27	2
Jul	4,787	4,677	64	0
Aug	3,702	3,667	24	4
Sep	2,645	2,635	22	0
Oct	2,348	2,328	18	0
Nov	1,375	1,375	9	1
Dec	790	775	33	0
TOTAL	26,506	26,286	2,014	9

Table 7-2 depicts the number of applications processed by p-ANI request type.

**Table 7-2
Applications Processed by p-ANI Request Type**

	APPROVED	DENIED	SUSPENDED	WITHDRAWN	TOTAL
Cancel p-ANI Return Request	1	0	0	0	1
P-ANI Modification Request	9	0	0	0	9
New p-ANI Request	1,614	1	0	8	1,623
P-ANI Return Request	2,014	0	0	0	2,014
TOTAL	3,638	1	0	8	3,647

The following table is a summary of p-ANI inventory as of December 31, 2021:

**Table 7-3
 P-ANI Inventory**

STATUS	TOTAL p-ANIs	211	511
Assigned	989,762	412,591	577,171
Aging	74	45	29
Available	5,691,918	2,920,193	2,771,725
Unavailable	18,246	17,171	1,075
TOTALS	6,700,000	3,350,000	3,350,000

7.2 OTHER P-ANI ADMINISTRATOR ACTIVITIES

In addition to processing requests for p-ANI ranges, the RNA performed many other functions during 2021.

7.2.1 ANNUAL REPORT

P-ANI Assignees are required to report to the RNA on all of their assigned p-ANI ranges via the P-ANI Annual Report on an annual basis. For 2021, there were 64 unique NENA ID and OCN combinations that filed an Annual Report. During this process, the RNA was able to identify p-ANI ranges that were never reported during the initial reports filing and show those p-ANI ranges as assigned. The RNA also worked with the carriers to identify p-ANI ranges that were not in use and could be returned to the available inventory as a result of this filing.

7.2.2 DUPLICATE ASSIGNMENT ISSUES

In 2021, the RNA was notified of 87 p-ANI ranges that had been assigned by the RNA but appeared to already be in use by another carrier. The RNA worked with the affected carriers to determine if the ranges were in use or not. If the range was not being used, it was removed from the applicable routing databases by the old carrier so that the new carrier could use the range. If the range was in use, the RNA replaced the assignment with a new range, and updated the RNAS to reflect that the original range had been assigned. The RNA also advised the carrier that reported it as being available to update its records so that the range would be properly reflected in its next annual report. The original assignment would have occurred prior to our assumption of assignment responsibility.

7.2.3 CUSTOMER SUPPORT

For all new p-ANI requests, a carrier must demonstrate that its company is permitted under applicable law to access p-ANI resources in the area for which the p-ANI resources are sought. If the carrier fails to provide the correct documentation with its request for p-ANIs, the RNA sends a courtesy email. The RNA also assists carriers who are having difficulties locating the correct documentation to help alleviate any delays in obtaining these critical resources. In 2021, the RNA sent courtesy emails for 96 requests. In addition, the RNA provided documents for 37 requests.

7.2.4 P-ANI ACTIVITY AND PROJECTED EXHAUST REPORT

The INC developed the P-ANI Administration Guidelines, which contain the following language:

“The RNA shall:

- a) prepare and publish a “P-ANI Activity and Projected Exhaust Report” that includes the following information:
 1. national p-ANI utilization information.
 2. p-ANI utilization by NPA.
 3. the number of p-ANIs requested on a monthly basis.
 4. the number of p-ANIs assigned on a monthly basis.
 5. the number of p-ANIs returned on a monthly basis.
 6. the number of p-ANIs modified on a monthly basis.
 7. the number of p-ANI requests processed and the disposition of each.
 8. forecast reports for projected future p-ANI resource usage.”

The *P-ANI Activity and Projected Exhaust Report* (“Report”) can be found on the website www.nationalpani.com under REPORTS and in Attachment 6 herein.

Attachment 6 contains the required information for the January 1 through December 31, 2021 Report, and contains the following tables:

- Table A6-1 is sorted by NPA
- Table A6-2 is sorted by State
- Table A6-3 is sorted by the Exhaust Year

NANPA also notified the INC and RNAs users that the information was available and included it in the subsequent Report required by the FCC contract.

Table 7-4 below contains the first five NPAs that are projected to exhaust 211/511/p-ANIs as of December 31, 2021.

Table 7-4
First Five NPAs Projected to Exhaust 211/511/p-ANI

NPA	STATE	TOTAL p-ANI	FORECASTED p-ANI	EXHAUST YEAR	EXHAUST QTR.
281	TEXAS	11,126	921	2026	3
817	TEXAS	6,706	1,028	2029	4
662	MISSISSIPPI	11,925	590	2030	3
214	TEXAS	8,214	800	2031	3
405	OKLAHOMA	14,211	392	2031	4

8 NUMBERING RESOURCE UTILIZATION/FORECAST

NANPA is responsible for the collection and reporting of utilization and forecast data, known as Numbering Resource Utilization/Forecast (NRUF) Reporting. NANPA handles NRUF processing twice a year in two parts: the NRUF Thousands-Block Forecast Report and service provider NRUF Form 502. NANPA develops the Thousands-Block/Semi-Annual Forecast NRUF utilizing thousands-block forecasts submitted by service providers. Service providers submit utilization and forecast data to NANPA for both geographic and non-geographic numbering resources. These NRUF Form 502 submissions in turn are utilized by NANPA in the development of NPA and NANP exhaust projections. NANPA collects and stores this information and provides it to the FCC and state commissions.

Service providers are required to report both thousands-block and CO code information by February 1 and August 1 of each year and may submit updates and corrections to their submissions at any time during the current reporting cycle.

8.1 NRUF/THOUSANDS-BLOCK FORECAST REPORT

On a semi-annual basis and as needed, service providers are required to submit a Thousands-Block Forecast Report to NANPA for each of their unique Operating Company Numbers (OCNs) by NPA and pooled rate center, on or before February 1 for the period ending on December 31, and on or before August 1 for the period ending on June 30 of each year. This semi-annual report includes a 12-month forecast of demand for thousands-blocks by month, including a need for a CO Code for an LRN and Dedicated Customer purposes. The data provided by the individual service providers in these forecasts is treated as confidential by NANPA. NANPA then uses this data to fulfill two Technical Requirements Document (TRD) reporting requirements to the FCC:

- the Semi-Annual Pooling Forecast referenced in Section 13.3.5, and
- the Rate Area Inventory Pool Status Report referenced in Sections 11.5.2 and 13.3.5

During 2021, NANPA aggregated the data provided by the service providers at the rate center level for all NPAs in pooling. NANPA used this data to provide a rate center level pooling NRUF to determine if a critical Industry inventory insufficiency exists within any pooled rate center. Utilizing this aggregated data, NANPA also submitted the above-referenced reports to the FCC according to the required deadlines, on February 11 and August 20.

Table 8-1 contains the thousands-block NRUF/forecast results for both semi-annual reporting periods in 2021.

**Table 8-1
 Thousands-Block NRUF/Forecast Results**

DATE	NPAs	JURISDICTIONS	THOUSANDS-BLOCKS FORECASTED	THOUSANDS-BLOCKS AVAILABLE	CODES FORECASTED
February	327	52	40,037	116,567	3,339
August	333	52	25,628	108,410	2,297

8.2 SERVICE PROVIDER NRUF

Utilization data includes the quantity of assigned, intermediate, aging, administrative and reserved numbers. Forecast data typically is comprised of a five-year forecast of the quantity of thousands-blocks and/or codes by rate center. The FCC also requires access to disaggregated NRUF data by state regulatory commissions for heightened reporting enforcement, including the responsibility to withhold numbering resources from service providers that fail to file utilization and forecast reports.

NANPA collects, sorts and stores NRUF data submitted by service providers. Data may be submitted via NAS, email (i.e., ExcelTM), or File Transfer Protocol Format (FTP). In 2021, NANPA processed 12,600 NRUF submissions (See Table 8-2) and provided a confirmation of receipt, to include any identified errors, within seven calendar days. In addition to processing submissions, NRUF administration also responded to telephone calls and email inquiries.

Along with collecting this information, NANPA makes available to states on-line access to service-provider specific disaggregated utilization and forecast data. In addition, state reports containing NRUF information are offered to those states that desire a snapshot of utilization and forecast data for the area codes within their respective states. NANPA also provided 32 reports to the states, covering both NRUF submission cycles in 2021.

NANPA sent Industry notifications to assist service providers with accurately filing their NRUF, including notifications on the need to maintain current user profile information in NAS, approaching NRUF filing due dates, and notification of an FCC order affecting how service providers report reserved numbers for the NRUF (Form 502) due to circumstances presented by the COVID-19 pandemic. NANPA updated NRUF information on the NANPA website to ensure that NRUF Geographic and Non-Geographic Job aids and other documentation were up-to-date. NANPA also worked closely with federal and state regulatory contacts on the completeness and accuracy of service provider NRUF submissions.

8.2.1 VOLUME OF NRUF SUBMISSIONS AND ASSOCIATED ITEMS

Following is a table that illustrates the volume of NRUF submissions as well as other items tracked by NANPA that are associated with the NRUF process.

Table 8-2
Summary of the volume of NRUF submissions and associated items for 2021

MEASUREMENTS	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC	TOTAL
Form 502 Email Submissions	2,303	425	203	64	29	32	2,517	347	172	55	35	65	6,247
Form 502 FTP Submissions	799	164	8	21	0	0	733	181	4	1	1	0	1,912

9 DESCRIPTION AND STATUS OF NPA RELIEF PLANNING

9.1 NPA RELIEF PLANNING OVERVIEW

NPA relief planning precedes the introduction of new geographic area codes and NANPA plays a significant role in the process. The volume of area code relief projects has been increasing over the past three years and 2021 was no exception.

NANPA follows the relief planning process described in detail in the *NPA Code Relief Planning and Notification Guidelines (“Guidelines”)*, ATIS-0300061, which can be found on the ATIS website at http://www.atis.org/01_committ_forums/INC/documents/. At least 36 months prior to the anticipated exhaust of an NPA in the U.S. or its territories, NANPA’s relief planners prepare and distribute relief planning documents to the Industry.

For relief projects involving an existing area code overlay, a single NPA with only one rate center, a single NPA area and NANPA determined that only an overlay alternative will meet the guidelines, or the NPA is scheduled to transition to 10-digit dialing or has already transitioned to 10-digit dialing, NANPA skips the IPD and NPA relief planning meeting and moves directly to the development of a draft petition recommending an overlay. This draft petition is reviewed and approved by the Industry prior to NANPA filing it with the appropriate regulatory authority.

NANPA facilitates an Industry meeting to consider relief options. Each NPA relief project has its own particularities, so NANPA must prepare materials for the meeting according to the needs of specific circumstances in that state and NPA. For an NPA with multiple relief alternatives, NANPA will provide an Initial Planning Document (“IPD”). NANPA leads the Industry in discussion about choosing one of the proposed alternatives for relief and then drafts a petition for review at a subsequent meeting based on the Industry’s consensus relief decision.

During 2021, NANPA continued to simplify the relief planning process, when only an overlay alternative meets the Guidelines. For relief projects involving an existing area code overlay, a single NPA with only one rate center, a single NPA area and NANPA determined that only an overlay alternative will meet the guidelines, or the NPA is scheduled to transition to 10-digit dialing or has already transitioned to 10-digit dialing, NANPA replaces the lengthier IPD and moves directly to the development of a draft petition recommending an overlay. NANPA provides a draft petition of the petition to the Industry with the meeting notice. During the meeting, the Industry reviews the draft petition and develops a dialing plan, an implementation timeline, as well as customer education and technical milestones that are all submitted to the state regulatory commission for approval.

Once a filing is made, the respective state commission reviews the proposed plan and often invites public comment and conducts public meetings. Some states use the internet to gather public comments in lieu of in-person public meetings in an attempt to solicit greater feedback. During 2021, state commissions held virtual public meetings. The relief planners actively participate in these meetings and are called upon to discuss various aspects of the proposed relief plan.

After the state commission has approved an NPA Relief plan, which may not be one of the options considered by the Industry, NANPA requests assignment of the relief NPA to implement the plan, and then convenes and facilitates the first Industry implementation meeting. Using decisions made at the initial implementation meeting, the relief planner then prepares and publishes a Planning Letter (PL) on the NANPA website. The PL announces the method of relief selected, the identity of the new NPA, the schedule for relief, the dialing plan, the test number(s) for the new area code, a rate center map, contact information for every service provider that is a code and/or block holder and, in the case of a split, a list of the prefixes moving to the new NPA, and those remaining in the NPA that is receiving relief.

9.2 RELIEF PLANNING PROCESS

NANPA's relief planners conduct all meetings via an on-line meeting platform, allowing participants to view relevant documentation and where appropriate, make real-time updates.

NANPA has created various tools to be used during the Industry meetings. These tools include:

- A "Pros & Cons" table for NPA relief planning meetings, allowing the participants to view this table via the on-line meeting capability and select those pros and cons applicable to the relief alternative being discussed.
- A "Customer Education and Technical Milestones" table allowing participants to choose the milestones which will be followed during the implementation of the new area code.
- Dialing plans and implementation schedules that permit the Industry to reach a near instant decision on what information to include in the relief petition.
- Excerpts from the *NPA Code Relief Planning & Notification Guidelines, ATIS-0300061*, to assist the Industry in understanding the INC criteria for relief alternatives and in making their decisions during NPA relief meetings.
- An on-line meeting link in the PDF document posted in NAS NNS, in addition to including this information in the email notice.
- An implementation meeting agenda template to ensure the Industry addresses all relevant activities associated with the introduction of a new NPA.

NANPA employs various practices to ensure an efficient and successful relief planning process:

At the beginning of each meeting, the NANPA relief planner explains the manner in which the consensus process will be applied in a uniform, impartial manner in the event participants choose to leave the call unannounced.

To expedite the meeting process, participants are notified in pre-meeting announcements that they are responsible for downloading and reviewing the documents to be discussed during the meeting. NANPA does not distribute documents while the meeting is in progress.

NANPA attends Industry NPA implementation committee meetings to stay informed on the progress of the implementation, as well as to provide a status of remaining numbering resources in the NPA, change in exhaust, any pertinent information that may impact the implementation of the new NPA, and gather and share knowledge gained via these activities in other similar relief efforts.

NANPA publishes daily reports on the status of NPA relief projects. In addition, during the NPA relief planning process, a state regulator or the Industry may specify further action that NANPA is required to undertake based on a related event or trigger point expected to occur sometime in the future. NANPA provides a report that lists these events and associated activities on its website.

9.3 2021 NPA RELIEF ACTIVITIES:

9.3.1 ACTIVE NPA RELIEF PROJECTS

There are many different stages to the relief process. Prior to initiating an NPA relief project, NANPA notified the state commission, prepares documents for the Industry meeting and notifies the Industry about the upcoming meeting. Once the recommended relief method has been determined by the Industry, a filing is electronically submitted to the state. Once NANPA receives regulatory approval of a relief alternative, NANPA begin the implementation process and assigns a new NPA, drafts a Planning Letter and arranges an Industry meeting to set the implementation milestones. At the end of 2021, there were 21 active NPA relief projects.

There was one project in the initial stage of relief planning at the end of 2021. On December 16, NANPA published a notice for an Industry meeting for the Florida 904 NPA that included an IPD for determining the form of relief. The Industry meeting to reach consensus on an alternative for relief is scheduled for January 13, 2022.

Table 9-1 shows the eight relief projects in the state filing stage, where the petition or other regulatory filing has been made but no regulatory approval has been released.

**Table 9-1
State Filing Stage**

STATE	NPA	FILING TYPE	DATE FILED	STATUS
CALIFORNIA	209	Application	4/9/21	Pending
CALIFORNIA	707	Application	4/16/21	Pending
NEW YORK	516	Petition	9/2/21	Pending
FLORIDA	561	Petition	10/22/21	Pending
ARKANSAS	870	Report and Recommendation	10/28/21	Pending
NEW YORK	845	Petition	11/30/21	Pending
FLORIDA	305/786	Petition	12/2/21	Pending
WISCONSIN	920	Letter	12/29/21	Pending

Table 9-2 depicts the 19 relief projects in the implementation stage. Of these 19 projects, seven were put into service in 2021:

**Table 9-2
2021 Relief Projects in the Implementation Stage**

STATE	NPA	REGULATORY APPROVAL DATE	NEW NPA	RELIEF TYPE	IN-SERVICE DATE	PLANNING LETTER #
TEXAS	214/469/972	2/27/20	945	Overlay	1/15/21	537
CALIFORNIA	909	6/13/19	840	Overlay	2/23/21	529
FLORIDA	850	11/5/19	448	Overlay	3/20/21	534

* This implementation meeting will be held in 2022.

9.3.2 NPA RELIEF REGULATORY SUBMISSIONS

Table 9-3 shows the 22 regulatory submissions NANPA made in 2021.

**Table 9-3
Regulatory Submissions**

DATE	STATE	NPA/S	SUBMISSION TYPE	SUBJECT
4/9	CALIFORNIA	209	Application	NPA Relief – All-Services Distributed Overlay
4/16	CALIFORNIA	707	Application	NPA Relief – All-Services Distributed Overlay
4/22	COLORADO	303/720	Letter	Exhaust Date Change
5/13	COLORADO	303/720	Letter	New Implementation Schedule
5/21	COLORADO	303/720	Letter	Request for Press Release Announcing New Area Code
6/3	ILLINOIS	708	Letter	Notification of Need for Relief

DATE	STATE	NPA/S	SUBMISSION TYPE	SUBJECT
6/8	ARIZONA	480	Application	NPA Relief – Boundary Elimination
6/30	MISSOURI	314 & 816	Letter	Notification of Need for Relief
7/26	ILLINOIS	708	Letter	Notification of Past Overlay Order Implementation
8/13	ILLINOIS	309	Letter	Request to Implement All-Services Distributed Overlay
8/17	PENNSYLVANIA	484/610	Petition	NPA Relief – All-Services Distributed Overlay
8/26	OHIO	513	Petition	NPA Relief – All-Services Distributed Overlay
9/2	NEW YORK	516	Petition	NPA Relief – All-Services Distributed Overlay
10/5	NEW YORK	516	Letter	Change in Exhaust Date
10/7	ARKANSAS	870	Letter	Legal Entity Name Change
10/22	ARIZONA	480	Comments	NANPA comments on Proposed Order
10/22	FLORIDA	561	Petition	NPA Relief – All-Services Distributed Overlay
10/28	ARKANSAS	870	Report	NPA Relief Report and Recommendation
11/3	ARKANSAS	870	Comments	NANPA comments in response to Order #9
11/30	NEW YORK	845	Petition	NPA Relief – All-Services Distributed Overlay
12/2	FLORIDA	305/786	Petition	NPA Relief – All-Services Distributed Overlay
12/29	WISCONSIN	920	Letter	Notification of Past Overlay Order Implementation

9.3.3 PLANNING LETTERS

NANPA published eight Planning Letters (PLs) related to active NPA relief projects, as shown in Table 9-4:

**Table 9-4
Planning Letters Published**

PLANNING LETTER #	DATE	DESCRIPTION
PL-559	5/10/21	NPA 943 to Overlay NPA 404/470/678/770 (Georgia) supersedes PL-555
PL-562	7/16/21	NPA 464 to Overlay NPA 708 (Illinois)
PL-563	7/29/21	NPA 983 to Overlay NPA 303/720 (Colorado)
PL-565	9/1/21	NPA 472 to Overlay NPA 910 (North Carolina)
PL-567	10/28/21	NPA 557 to Overlay NPA 314 (Missouri)
PL-568	10/28/21	NPA 975 to Overlay NPA 816 (Missouri)
PL-569	11/9/21	NPA 472 to Overlay NPA 910 (North Carolina) supersedes PL-565
PL-576	12/30/21	NPA 480, 602 and 623 Boundary Elimination Overlay (Arizona)

In addition to the PLs listed above, NANPA also published PLs relating to Canada NPAs (9), non-geographics NPAs (3), and the Transition to 10-Digit Dialing for use of the 988 abbreviated code (1).

9.3.4 OTHER NPA RELIEF PLANNING TASKS

NPA Relief Planners also complete the following tasks as part of the relief planning process:

- Facilitated a total of 38 Industry meetings, via a web meeting, compared to 18 Industry meetings facilitated in 2020.
- Attended 77 Industry NPA relief subcommittee meetings, providing status updates as needed.
- Attended and participated in a webcast recording for the California 209 NPA in April and the California 707 NPA in June.
- Attended and participated in a virtual public meeting in November relating to the Florida 561 NPA relief project, and a virtual public meeting in December relating to the Florida 305/786 NPA relief project.
- Attended two virtual public hearings relating to the New York 516 NPA relief project.

NANPA issued 240 NANP Notification System (NNS) notifications relating to NPA relief in 2021, compared to 100 in 2020, which included meeting notices, reminder notices of relief planning meetings, notifications of regulatory filings, and draft meeting minutes. Included in the “NPA Relief Planning” total is 51 NNS notifications relating to the transition to 10-digit local dialing for use of the 988 abbreviated code for the National Suicide Prevention Lifeline.

NOTIFICATION CATEGORY	NUMBER OF NOTIFICATIONS
NPA Relief Planning	240
Other Non-Geographic	35
NRUF	9
Planning Letters	18
Code Administration	1
INC Guidelines	4
Jeopardy	22
Other Geographic	0
TOTAL	329

Throughout the year, NANPA assisted numerous states concerning NPA relief planning, which included providing presentations for area code relief customer workshops and providing special reports per request from the state regulatory authorities.

Relief planners are also measured on the promptness of their responses to voicemail and email messages. NANPA relief planners responded to 100% of customer voicemails and email messages by no later than the end of the next business day.

9.4 2021 NRUF EXHAUST FORECASTS

9.4.1 SEMI-ANNUAL NPA EXHAUST PROJECTIONS:

One of the primary uses for NRUF data is to support forecasting for the projected exhaust for each geographic NPA as well as the exhaust date for the 5XX NPA and the entire NANP.

The methodology used to produce the 2021 NPA exhaust projections was the same as the methodology NANPA used in the past several years to project area code exhaust. This methodology has been reviewed with the FCC. In reporting the NPA exhaust projections, NANPA

provides five previously-projected NPA exhaust time frames in order to view the changes that have occurred over time.

NANPA projects NPA and NANP exhaust on a semi-annual basis. Exhaust projections are available at the end of April and October. The detailed projections can be found in Attachments 7, 8, and 9.

9.4.2 DELTA NRUF EXHAUST PROJECTIONS

Throughout the year NANPA monitors CO code assignment rates in all NPAs and adjusts the projected NPA exhaust date when necessary. This is known as a “Delta NRUF.” NANPA issued revised “Delta NRUF” exhaust dates three times in 2021: in February, March, June, and September.

**Table 9-5
 2021 Delta NRUFs**

STATE	NPA	DATE POSTED	NRUF CYCLE	EXHAUST DATE	DELTA EXHAUST DATE
NEW YORK	845	2/2/21	October 2020	1Q2025	2Q2024
MISSOURI	816	3/29/21	October 2020	4Q2025	3Q2024
NEW YORK	516	3/29/21	October 2020	1Q2024	3Q2023
PENNSYLVANIA	484/610	6/17/21	April 2021	2Q2024	2Q2023
OHIO	513	6/17/21	April 2021	2Q2024	2Q2023
FLORIDA	305/786	9/23/21	April 2021	4Q2024	1Q2024
FLORIDA	561	9/23/21	April 2021	3Q2024	3Q2023
MISSOURI	314	9/23/21	April 2021	2Q2023	3Q2022
MISSOURI	816	9/23/21	April 2021	3Q2024	3Q2023
NEW YORK	516	9/23/21	April 2021	3Q2023	2Q2023
WASHINGTON	509	9/23/21	April 2021	3Q2024	1Q2025

9.5 RELIEF PLANNING QUALITY MEASUREMENTS

Industry guidelines prescribe time limitations for the completion of many NPA relief planning activities. To quantify the timeliness of its relief planning work, NANPA has established objectives for the completion of many additional activities.

In 2021, the number of tracked instances of performance measurements increased 80% from 2020. As shown in Table 9-6, NANPA completed 100% of the 115 tracked events of the performance measurements on schedule.

**Table 9-6
 2021 Relief Planning Performance Measurements**

PERFORMANCE MEASUREMENT	EVENTS	TOTAL COMPLETED ON TIME	% ON-TIME COMPLETION
Initiated NPA relief planning within 36 months of NPA exhaust.	10	10	100%
Distributed initial Industry meeting notice within 8 weeks, 3 weeks, or 2 months of relief meeting date.	10	10	100%
Distributed IPD within 4 weeks of relief meeting date.	6	6	100%
Distributed meeting minutes within 2 weeks or date set at the meeting.	32	32	100%
Held minutes review by date set at the meeting.	6	6	100%
Filed relief-related petitions by date set at the meeting.	11	11	100%
Requested relief NPA assignment within 1 week of regulatory approval.	4	4	100%
Issued press release within 2 weeks after relief NPA code assignment.	0	N/A	N/A
Held implementation meeting within 45 days after relief NPA code assignment.	7	7	100%
Posted planning letter or notice of Industry meeting on website within 3 weeks after implementation meeting.	6	6	100%
Posted planning letter on website within 10 business days after regulatory change.	1	1	100%
Held jeopardy meeting within 30 calendar days after jeopardy declaration.	7	7	100%
Distribute meeting minutes within 15 business days of jeopardy meeting.	9	9	100%
Distributed IPD 4 weeks after date jeopardy was declared, if relief planning was not initiated.	3	3	100%
Held Industry relief planning meeting 8 weeks after date jeopardy was declared, if relief planning was not initiated.	3	3	100%
TOTALS	115	115	100%

10 SYSTEMS AND PERFORMANCE METRICS

In 2021, NANPA utilized the three existing resource administration systems: NAS, PAS, and RNAS.

Per Section 10.1.1, *System Availability*, in the Technical Requirements Document (TRD)²⁴, the NANPA systems will, at a minimum, adhere to the following availability and reliability requirements:

- Available 24 hours, seven (7) days a week
- Availability shall meet a minimum requirement of 99.9% of scheduled up-time
- Unscheduled maintenance downtime per calendar year interval shall be less than nine (9) hours
- The mean time to repair (MTTR) for all unscheduled downtime per any 12-month interval shall be less than one (1) hour during Core Business Hours and four (4) hours for non-Core Business Hours
- Scheduled maintenance downtime per 12-month interval shall be less than 24 hours.

During 2021, all of these performance requirements from the TRD Section 10.1.1 were met for NAS, PAS and RNAS.

10.1 NANP ADMINISTRATION SYSTEM (NAS)

NAS provides an automated system for processing CO code applications, collecting resource utilization and forecast data, and issuing notifications to the Industry on numbering matters. NAS is used by service providers, service provider consultants, federal and state regulators, and NANPA in the assignment and administration of the various NANP resources.

**Table 10-1
 Summary of Actual 2021 NAS Performance**

MONTH	NUMBER OF POSSIBLE AVAILABLE HOURS	NUMBER OF ACTUAL HOURS AVAILABLE	TOTAL UNAVAILABILITY	SCHEDULED (S) OR UNSCHEDULED (U)
January	744	744	0	N/A
February	672	672	0	N/A
March	744	744	0	N/A
April	720	720	0	N/A
May	744	744	0	N/A
June	720	720	0	N/A
July	744	744	0	N/A

²⁴ Combined NANPA/PA Technical Requirements Document, Description/Specifications, 273FCC21C0003-revised P0002, Attachment 1.1, §10 (August 27, 2021).

MONTH	NUMBER OF POSSIBLE AVAILABLE HOURS	NUMBER OF ACTUAL HOURS AVAILABLE	TOTAL UNAVAILABILITY	SCHEDULED (S) OR UNSCHEDULED (U)
August	744	744	0	N/A
September	720	720	0	N/A
October	744	744	0	N/A
November	720	720	0	N/A
December	744	744	0	N/A

10.1.1 NAS ACTUAL PERFORMANCE

In 2021, NAS was available for use **100%** of scheduled uptime during the 12-month period, which meets the NAS performance metric of a *minimum* of 99.9% scheduled uptime.

Table 10-1 summarizes actual NAS performance in 2021.

10.1.2 NAS PERFORMANCE METRICS

In 2021, as outlined in Table 10-2, NAS met the required performance metrics set forth in the TRD:

**Table 10-2
 NAS Performance Metrics**

REQUIRED SERVICE	PERFORMANCE STANDARD	ACCEPTABLE QUALITY LEVEL	ACCOMPLISHMENT
NAS Availability	NAS is available	99.9%	MET THE REQUIREMENT WITH A SCHEDULED AVAILABILITY LEVEL OF 100%
Maintenance	Unscheduled maintenance of NAS is less than nine hours in any 12-month period	100%	MET THE REQUIREMENT WITH NO INSTANCES OF UNSCHEDULED NAS AVAILABILITY
Maintenance	Scheduled maintenance of NAS is less than 24 hours in any 12-month period	100%	MET THE REQUIREMENT WITH NO DOWNTIME AS A RESULT OF SCHEDULED MAINTENANCE

10.1.3 NAS MAINTENANCE

NAS had one maintenance activity in 2021, on May 6, with none of the three hours of approved scheduled downtime used.

10.1.4 NAS CHANGE ORDERS

Changes and improvements to NAS are generally driven by changes to FCC rules, Industry guidelines, or specific service provider or regulatory requests. There were no NAS change orders submitted, approved, or implemented in 2021.

10.2 POOLING ADMINISTRATION SYSTEM (PAS)

PAS provides an automated system for processing number resource applications in pooling areas, collecting forecast data, and issuing notifications to the Industry on numbering matters. PAS is the primary tool used by service providers, service provider consultants, federal and state regulators, and NANPA in the assignment and administration of thousands-block resources.

10.2.1 PAS ACTUAL PERFORMANCE

In 2021, PAS was available for use **99.99%** of scheduled uptime during the 12-month period, which meets the PAS performance metric of a minimum of 99.9% scheduled uptime. PAS had 43 minutes of unscheduled downtime in April.

Table 10-3 summarizes actual PAS performance in 2021.

**Table 10-3
 Summary of Actual 2021 PAS Performance**

MONTH	NUMBER OF POSSIBLE AVAILABLE HOURS	NUMBER OF ACTUAL HOURS AVAILABLE	TOTAL UNAVAILABILITY	SCHEDULED (S) OR UNSCHEDULED (U)
January	744	744	0	N/A
February	672	672	0	N/A
March	744	744	0	N/A
April	720	719 hours 17 minutes	43 minutes	U
May	744	744	0	N/A
June	720	720	0	N/A
July	744	744	0	N/A
August	744	744	0	N/A
September	720	720	0	N/A

MONTH	NUMBER OF POSSIBLE AVAILABLE HOURS	NUMBER OF ACTUAL HOURS AVAILABLE	TOTAL UNAVAILABILITY	SCHEDULED (S) OR UNSCHEDULED (U)
October	744	744	0	N/A
November	720	720	0	N/A
December	744	744	0	N/A

10.2.2 PAS PERFORMANCE METRICS

In 2021, as outlined in Table 10-4, PAS met the required performance metrics set forth in the TRD:

**Table 10-4
 PAS Performance Metrics**

REQUIRED SERVICE	PERFORMANCE STANDARD	ACCEPTABLE QUALITY LEVEL	ACCOMPLISHMENT
PAS Availability	PAS is available	99.9%	MET THE REQUIREMENT WITH A <i>SCHEDULED</i> AVAILABILITY LEVEL OF 99.99%
Maintenance	Unscheduled maintenance of PAS is less than nine hours in any 12-month period	100%	MET THE REQUIREMENT WITH ONE INSTANCE OF UNSCHEDULED PAS AVAILABILITY FOR 43 MINUTES
Maintenance	Scheduled maintenance of PAS is less than 24 hours in any 12-month period	100%	MET THE REQUIREMENT WITH NO DOWNTIME AS A RESULT OF SCHEDULED MAINTENANCE

10.2.3 PAS MAINTENANCE

PAS had one maintenance activity in 2021, on May 6, with none of the three hours of approved scheduled downtime used.

10.2.4 PAS CHANGE ORDERS

Changes and improvements to PAS are generally driven by changes to FCC rules, Industry guidelines, or specific service provider or regulatory requests. There were no PAS change orders submitted, approved, or implemented in 2021.

10.3 ROUTING NUMBER ADMINISTRATION SYSTEM (RNAS) PERFORMANCE

RNAS is essential to the routing number (p-ANI) administration operation because RNAS stores all of the information relating to p-ANI administration to facilitate routing of e9-1-1 calls. Because it provides essential reporting features that contain real-time data, reliability is critical.

10.3.1 RNAS ACTUAL PERFORMANCE

In 2021, RNAS was available for use **100%** of scheduled time for the year and continued meeting the RNAS performance metric of a minimum of 99.9% scheduled uptime.

As outlined in Table 10-5, in 2021 RNAS met the performance metrics set forth in the TRD:

**Table 10-5
 Summary of Actual 2021 RNAS Performance**

MONTH	NUMBER OF POSSIBLE AVAILABLE HOURS	NUMBER OF ACTUAL HOURS AVAILABLE	TOTAL UNAVAILABILITY	SCHEDULED (S) OR UNSCHEDULED (U)
January	744	744	0	N/A
February	672	672	0	N/A
March	744	744	0	N/A
April	720	720	0	N/A
May	744	744	0	N/A
June	720	720	0	N/A
July	744	744	0	N/A
August	744	744	0	N/A
September	720	720	0	N/A
October	744	744	0	N/A
November	720	720	0	N/A
December	744	744	0	N/A

10.3.2 RNAS PERFORMANCE METRICS

In 2021, as outlined in Table 10-6, RNAS met the required performance metrics set forth in the TRD:

**Table 10-6
 2021 RNAS Performance Metrics**

REQUIRED SERVICE	PERFORMANCE STANDARD	ACCEPTABLE QUALITY LEVEL	ACCOMPLISHMENT
RNAS Availability	RNAS is available	99.9%	MET THE REQUIREMENT WITH A SCHEDULED AVAILABILITY LEVEL OF 100%
Maintenance	Unscheduled maintenance of RNAS is less than nine hours in any 12-month period	100%	MET THE REQUIREMENT WITH NO UNSCHEDULED DOWNTIME RESULTING IN NO RNAS UNAVAILABILITY
Maintenance	Scheduled maintenance of RNAS is less than 24 hours in any 12-month period	100%	MET THE REQUIREMENT WITH NO DOWNTIME AS A RESULT OF SCHEDULED MAINTENANCE

10.3.3 RNAS MAINTENANCE

RNAS had one maintenance activity in 2021, on May 6, with none of the three hours of approved scheduled downtime used.

10.3.4 RNAS CHANGE ORDERS

Changes and improvements to RNAS are generally driven by changes to FCC rules, Industry guidelines, or specific service provider or regulatory requests. There were no RNAS Change Orders submitted or implemented in 2021.

10.4 TROUBLE TICKETS

NANPA tracks and reports trouble tickets, as specified in Section 13.3.1 of the TRD, relating to, at a minimum, the following trouble ticket and/or outage metrics:

- Number opened during the preceding month
- Number closed during the preceding month
- Number under corrective action for over 30 calendar days
- Number related to
 - System performance
 - Web site
 - Contractor ISP
 - Other
- Total quantity of trouble tickets opened and closed by month for a calendar year, with both the actual open time for each ticket and the average open time for all tickets
- Quantity of System Outages Notifications to all participants and regulatory agencies

NANPA reports trouble ticket details each month in a monthly FCC NANPA status report and to the NAOWG.

NANPA opened and closed no NAS, PAS, or RNAS trouble tickets in 2021.

10.5 NAS, PAS, AND RNAS DISASTER RECOVERY TESTING

Disaster recovery testing occurs throughout the year during routine system maintenance for NAS, PAS and RNAS to ensure system redundancy in an AWS cloud environment. NANPA systems were not affected by the December 2021 AWS outages.

In addition, NANPA personnel worked remotely throughout the year, with no interruption of services.

11 STATUS OF REQUIRED TRANSFERABLE PROPERTY

From January 1, 2021, through September 13, 2021, NANPA maintained the last remaining transferable property, ten printers, in the Concord, CA office.

On September 8, 2021, in accordance NANPA reported to the FCC Property Management Division via Form A-480 that the ten remaining printers were antiquated and no longer in use. The reported transferable property inventory was destroyed per FCC Warehouse instructions with photos and video evidence of the destruction of the property certified by the Business Operations Manager (BOM) as required by the FCC Property Management Division. The photos and video evidence were accepted as proof of inventory destruction by the FCC's Asset and Inventory Manager on September 13, 2021.

NANPA, therefore, maintains no transferable property.

12 INDUSTRY ISSUE IDENTIFICATION/FEEDBACK

NANPA supports the Industry through several channels during the year including participation in Industry and regulatory forums and interaction with the NAOWG. This section contains information on NANPA's 2021 participation in the Industry and regulatory forums, including the number of issues and contributions that the NANPA submitted, a description of NANPA's interaction with the NAOWG, as well as formal complaints, quarterly *Tips* and Customer Support call information.

12.1 PARTICIPATION IN INDUSTRY AND REGULATORY FORUMS

12.1.1 INDUSTRY FORUMS

As the NANPA, our participation at Industry forums includes:

- Working on issues and answering questions relating to the CO code, thousands-block, and the p-ANI administration process,
- Actively participating in meeting discussions, and
- Developing and submitting new issues based on input received from the Industry, regulators, and internal sources.

NANPA participated in the following Industry forums in 2021:

- **Common Interest Group on Rating and Routing (CIGRR)** – NANPA participated in 15 meetings and submitted two issues in coordination with iconectiv® TRA. NANPA continued to review the 3H (BCRnoNXD under 45 days) validation report monthly prior to the report being sent to the Administrative Operating Company Numbers (AOCNs). NANPA also reviewed the 3E (BCRnoNXD over 45 days) and 3F (NXDsnoBCRs) reports monthly. When requested NANPA also researched other data comparison requests sent by iconectiv® TRA. NANPA continued to address issues and concerns in the committee from participants.
- **Industry Numbering Committee (INC)** – NANPA participated in 23 meetings, submitted 21 new issues and 45 new contributions in 2021.
- **Next Generation Interconnection Interoperability Forum (NGIIF)** –NANPA participated in three meetings as a subject matter resource.
- **Number Portability Industry Forum (NPIF)** - NANPA participated in 11 NPIF meetings and conference calls as a subject matter resource.
- **Telecom Management and Operations Committee (TMOC)** – NANPA attended TMOC meetings for issues where they may be needed as a subject matter resource.

12.1.2 REGULATORY FORUMS

NANPA attended the 2021 meetings of the North American Numbering Council (NANC) on February 4, April 15, June 23, and October 13. In addition, NANPA attended and

participated in meetings of the National Association of Regulatory Utility Commissioners (NARUC). NANPA attended the NARUC summer meeting in July and provided a numbering overview at the Commissioner's meeting on October 1. In addition, NANPA attended the Annual NARUC Meeting in November and participated in a panel on numbering topics.

12.2 NANPA INTERACTION WITH THE NAOWG

The NAOWG reviews NANPA's performance throughout the year. The NAOWG's interactions with the NANPA in 2021 consisted primarily of conducting meetings with the NANPA Sr. Director to review each month's performance.

The NAOWG and the NANPA Sr. Director met 11 times to discuss NANPA's monthly performance on January 28, February 25, March 25, April 29, May 20, July 29 (covering May and June activity), August 26, September 23, October 28, November 18, and December 16.

Prior to each meeting, NANPA provided the NAOWG with a summary report of its performance for the previous month's performance which included updates on status on NANPA geographic and non-geographic activities, NRUF, NPA relief, several performance metrics, 988 transition, Industry meeting activities and regulatory information. In all, NANPA provided 12 monthly reports, three quarterly self-assessments, two NANP resource reports, and mid-year highlights to the NAOWG.

Table 12-1 contains the description of the standing summary report agenda items.

Table 12-1
NAOWG Description of the Standing Monthly Summary Report Agenda Items

AGENDA ITEM	DESCRIPTION
Geographic Resources Activity	CO Code, Thousands-Block, and p-ANI performance measurements from the previous month
Non-Geographic Resources Activity	CIC, 5XX, 900, VSC performance measurements and activity from the previous month
NRUF	NRUF performance measurements and activity from the previous month
NPA Relief Activity	Status of NPA Relief Activity
NPA Relief Planning	NPA Relief Planning performance measurements
Other Metrics	Performance metrics for NAS, PAS and RNAS performance, trouble tickets, communications, change orders, and additional items (staffing, security, and reference and technical documentation)
Trouble Ticket Detail	Information on trouble tickets
Customer Focus Items	NANPA items that require research, assistance, or education beyond our normal daily interactions with customers
Transition 10DD (988) Activities	NANPA activities related to the transition to 10-digit dialing for implementation of 988 as a three-digit abbreviated code for the National Suicide Prevention Lifeline
Other	Regulatory and INC updates, as well any other items of interest not covered by other categories.

Activities reported as *Customer Focus Items* are noteworthy specific ways in which NANPA responded to more significant issues and requests from our customers during the year. This list includes only items that required extra time and effort on the part of NANPA staff and does not include all of the day-to-day questions and requests that NANPA staff field as part of their daily workload. The NANPA reported a total of 177 customer focus items in 2021.

12.3 NANPA FORMAL COMPLAINTS

Pursuant to Section 2.9 of the TRD, if a performance problem is identified by a telecommunications Industry participant, NANPA must prepare a document that contains:

- Description of the dispute, concern, complaint, or issue (recorded within one (1) business day)
- Plan of action (recorded within one (1) business day)
- The resolution and reasoning (recorded within one (1) business day of resolution)
- Number of business days passing before referred to appropriate state or federal regulators
- Number of business days passing before resolution accepted by complainant

In coordination with the FCC, NANPA will take any necessary corrective action within 30 calendar days of the complaint. In 2021, NANPA received ***no formal complaints***.

12.4 NANPA AND ROUTING NUMBER ADMINISTRATOR QUARTERLY TIPS (“TIPS”)

12.4.1 NANPA *Tips*

NANPA generates *Tips* from suggestions received from regulators and service providers, INC action items, and internal observations regarding processes that could benefit from additional clarification for customers. *Tips* are sent via email to the system distribution list during each quarter and provides helpful information regarding the NAS, PAS, and thousands-block pooling process, as well as serving as a useful reference for all NAS and PAS users. Often NANPA will send a “Supplemental” *Tip* during a quarter if a topic surfaces that would benefit customers right away. Archive files for *Tips* from previous years can be found on our website.

Table 12-2 lists all of the 2021 NANPA *Tip* topics:

**Table 12-2
2021 NANPA Tips**

MONTH	TOPIC
February (PAS)	Helpful Tip for Locating a PAS Request
March (Supplemental PAS)	Appendix A
April (PAS)	Helpful Tip for Locating a PAS Request
July (PAS)	Pooling in a NPA that is in Jeopardy
July (NAS)	New NPA-NXX Assignments
September (NAS)	CO Code Assignment Preference
September (Supplemental PAS)	CO Code Assignment Preference
October (PAS)	Voluntary Code Transfer Process for Establishing an LRN

12.4.2 P-ANI Tips

The p-ANI *Tip* is sent via email to the RNAS distribution list at the beginning of each quarter. The p-ANI *Tip* provides helpful information regarding RNAS and the p-ANI request process and serves as a useful reference for all RNAS users. Archive files for all p-ANI *Tips* can be found on our website. Table 12-3 lists all of the p-ANI *Tip* topics that were covered by quarter:

**Table 12-3
2021 P-ANI Tips**

MONTH	TOPIC
January	p-ANI Forecast Report
April	Returning p-ANIs
July	New p-ANI Requests
October	Mass New, Modify, or Return p-ANI Requests

12.5 NANPA CUSTOMER SUPPORT

The NANPA Customer Support Representative (CSR or Help Desk) respond to both internal and external questions and requests for technical support and attempts to promptly confirm the cause of a problem. Some examples are:

- Creating, deleting, and maintaining user accounts and passwords,
- Answering a variety of inquiries from customers, including questions regarding use of forms, navigation within the NAS, PAS and RNAS, and assisting users with locating documentation, and
- Working with carriers to troubleshoot problems and assist in resolving technical problems.

In May 2021, NANPA combined the NANPA and Pooling Administrator Help Desk support under a single support telephone number and email address. NANPA made the existing NANPA toll-free number, 1-866-623-2282, and support@nanpa.com, the single point of contact for NANPA support services. Any calls made to the Pooling Support 1-866-638-7665 and p-ANI Support 1-888-415-5234 numbers were automatically forwarded to **1-866-623-2282** and any emails sent to nanpa_login@somos.com, poolingsupport@somos.com and panisupport@somos.com were automatically forwarded to support@nanpa.com.

There were 1,541 customer support phone calls in 2021. Table 12-4 shows the numbers of calls handled by the Help Desk.

TOTAL	1,541

13 VOLUME OF REPORTS PRODUCED IN 2021 AGGREGATED BY REGULATORY AGENCY, NANC, NANPA/PA, AND SERVICE PROVIDERS OR OTHER ASSIGNEES

13.1 TOTAL REPORTS

NANPA produced 647 reports in 2021. The total in each section includes standard contract reports as well as non-standard (ad hoc) reports. These totals *do not* include reports that were obtained directly from the NANPA, Pooling or p-ANI Administrators’ websites, or from NAS, PAS, or RNAS.

Table 13-1 shows the total number of reports produced during 2021 aggregated by regulatory agency (FCC and STATES), service providers and other. The total number of reports includes:

- **FCC:** Contract Data Requirements List (CDRL), *ad hoc*, and other reports required by the contract.
- **STATES:** reclamation, educational sessions, 988 compliance, NPA relief, and miscellaneous *ad hoc* reports.
- **SERVICE PROVIDERS:** rate center change reports and miscellaneous *ad hoc* reports.
- **OTHER:** anything not included in the categories above, such as the NAOWG.

**Table 13-1
 Total 2021 Reports**

TYPE	TOTAL NUMBER OF REPORTS
FCC	60
STATES	499
SERVICE PROVIDERS	70
OTHER	18
TOTAL	647

SECTION 13.2 REPORTS COMPLIANCE

This section describes the reports that are required in the TRD. Some reports are CDRL reports and others are required by the TRD. Table 13-2 shows the report type, contract reference, required interval, dates the reports were submitted, the total number of each required report submitted for the year, and whether the requirement was met. All report requirements were met in 2021.

**Table 13-2
2021 Required Reports Compliance**

REPORT TYPE	SECTION REFERENCE	REQUIRED INTERVAL	DATES SUBMITTED	TOTAL	MET REQUIREMENTS
STAFFING REPORT	TRD 14.12 per Section 2.5	1 st working day of the month	1/4, 2/1, 3/1, 4/1, 5/3, 6/1, 7/1, 8/2, 9/1, 10/1, 11/1, 12/1	12	Y
NANPA MONTHLY REPORT ²⁵	Sections 11.3, 11.4, 11.5, 11.6, 11.11, 11.12, 13.3	Monthly	1/14, 2/9, 3/10, 4/13, 5/13, 6/11, 7/14, 8/13, 9/15, 10/13, 11/12, 12/13	12	Y
QUARTERLY POOLING MATRICES REPORT	Section 13.3.5	Quarterly	1/14, 4/13, 7/14, 10/13	4	Y
QUARTERLY SELF-ASSESSMENT	Section 13.1.5	Quarterly	4/29, 7/29, 10/28	3	Y
INVENTORY	Per Section 3.21	Quarterly	1/25, 4/23, 7/29, 9/13	4	Y
FORECASTED DEMAND (POOLING)	Section 13.3.5	Semi-Annual	2/7, 8/6	2	Y
RATE AREA INVENTORY POOL STATUS (POOLING AND RNA)	Section 11.5.2 and 13.3.5	Semi-Annual	2/7, 8/6	2	Y
ANNUAL (NANPA AND POOLING)	CDRL 14.2 Per Section 11.1	Annual	3/26	2	Y
AD HOC REPORTS	CDRL 14.1 per Section 11	Within three business days	January (7 reports) February (9 reports) March (3 reports) April (22 reports) May (8 reports) June (7 reports) July (15 reports) August (6 reports) September (23 reports) October (19 reports) November (5 reports) December (9 reports)	133	Y

²⁵ Includes monthly reporting for NPA Relief Activity, CO Code Activity Report, Thousands-Block Pooling Report, Thousands-Block Summary by Rate Center, p-ANI Administration Report, p-ANI Summary by NPA, Systems Performance Report, Other Performance Metrics (Trouble Tickets, Communications, Change Orders, Ad Hoc Reports totals), Forecasting Data on a Per State Basis, and CO Code, 5XX and Other Resources details.

REPORT TYPE	SECTION REFERENCE	REQUIRED INTERVAL	DATES SUBMITTED	TOTAL	MET REQUIREMENTS
TOTAL REPORTS				174	

SECTION 13.3 CONTRACT DATA REQUIREMENTS LIST (CDRL) PLANS

The Contract Data Requirements List (CDRL) is a list of authorized data requirements for a specific procurement that forms a part of the contract that are delivered to the FCC. Table 13-3 outlines the list of required CDRL plans that NANPA delivered to the FCC in 2021:

**Table 13-3
 2021 Delivered CDRL Plans**

CDRL PLAN	TRD SECTION/s	DATE SUBMITTED
IMPLEMENTATION	14.6 and 14.14	1/15
SYSTEM TEST AND ACCEPTANCE	14.13	1/15
SECURITY	14.4	1/15
MANAGEMENT REPORTING	14.7	2/1
DISASTER RECOVERY	14.5	2/1
SYSTEM DOCUMENTATION	14.15	3/1
CHANGE MANAGEMENT	14.3	3/1
TRAINING	14.19	3/15
SYSTEM MAINTENANCE	14.16	3/30
QUALITY ASSURANCE	14.10	3/30

14 HISTORICAL TRENDS FROM 2017 THROUGH 2021

In this section you will find trends in CO code and Thousands-Block assignment activity, NXXs Saved by Pooling, Reclamation, and NPA Relief activity from 2017 through 2021.

14.1 GEOGRAPHIC RESOURCES ACTIVITY SINCE 2017

NANPA also tracks assignment data to identify any trends in CO code and Thousands-Block assignment rates. Table 14-1 shows the total quantity of CO codes assigned in 2021 compared with assignments over the last five years and Table 14-4 shows the total number of thousands-blocks assigned.

The total number of CO code (Part 3) and thousands-block (Part 3A) applications processed is the best measure of the actual processing work performed by the Resource Administrators. Although a large majority of applications for numbering resources are processed and approved immediately, some are suspended for future action, and some are withdrawn or denied entirely. Each of these activities generates a Part 3 or 3A. Table 14-2 shows the number of Part 3s that were processed, and Table 14-5 shows the numbers of Part 3As that were processed in 2021.

**Table 14-1:
 CO Code Assignment Activity from 2017 through 2021 At-A-Glance**

YEAR	ANNUAL GROSS CO CODE DEMAND	QUANTITY OF RETURNED CODES	ANNUAL NET CO CODE DEMAND
2017	2,713	211	2,502

14.2 NXXS SAVED BY POOLING

NANPA calculates that **114,918 NXXs** have been saved by pooling since pooling began, which is the equivalent to 114 NPAs.

Table 14-6 illustrates by NPA/NPA complex²⁶ the NXXs that have been saved in all NPA areas, in 50 states and the District of Columbia and Puerto Rico.

**Table 14-6

14.3 RECLAMATION 2017 THROUGH 2021

This section shows the cumulative number of CO codes and thousands-blocks on the reclamation lists each month, the total number of those resources that were new each month, the number of resources for which reclamation was initiated²⁷, and the number of resources actually reclaimed.

While a state may authorize NANPA to initiate CO code or thousands-block reclamation, not all resources in this category have actually been reclaimed. In some cases, the reclamation process is halted if it is determined that the resources are actually in service. In 2021, NANPA was authorized to initiate reclamation for two CO codes but actually reclaimed none and initiated reclamation for 11 thousands-blocks but actually reclaimed nine.

Table 14-7
CO Code Reclamation from 2017 through 2021 At-A-Glance

YEAR	NUMBER OF CUMULATIVE CO CODES ON THE LIST	NUMBER OF NEW CO CODES ON THE LIST	NUMBER OF CO CODES FOR WHICH RECLAMATION WAS INITIATED	NUMBER OF CO CODES RECLAIMED
2017	159	N/A	N/A	1
2018	170	N/A	N/A	0
2019	132	N/A	N/A	1
2020	119	N/A	N/A	0
2021	497	232	2	0

Table 14-8
Thousands-Block Reclamation from 2017 through 2021 At-A-Glance

YEAR	NUMBER OF CUMULATIVE THOUSANDS-BLOCKS ON THE LIST	NUMBER OF NEW THOUSANDS-BLOCKS ON THE LIST	NUMBER OF THOUSANDS-BLOCKS FOR WHICH RECLAMATION WAS INITIATED	NUMBER OF THOUSANDS-BLOCKS RECLAIMED
2017	3,703	1,117	32	12
2018	2,403	1,061	115	3
2019	2,652	1,306	19	7
2020	4,082	1,654	23	5
2021	5,669	2,170	11	9

²⁷ The CO code information was not reported prior to 2021.

The PA has been authorized to reclaim 36 thousands-blocks since 2017. Table 14-9 shows the total number of thousands-blocks reclaimed by state since 2017, ranked from highest to lowest.

Table 14-9
Total Number of Thousands-Blocks Reclaimed by State from 2017 through 2021

14.4 SUMMARY OF POOLED AREAS SINCE 2017

Table 14-10 below depicts the trends in rate center thousand-block pooling statuses between 2017 through 2021.

Table 14-10
Pooling Rate Center Facts Comparison by Year from 2017 through 2021

	2017	2018	2019	2020	2021
TOTAL NUMBER OF DISTINCT RATE CENTERS	18,490	18,485	18,485	18,485	18,484
TOTAL NUMBER OF DISTINCT RATE CENTERS AVAILABLE FOR POOLING	16,447	16,592	16,672	16,732	16,790
PERCENTAGE OF DISTINCT RATE CENTERS THAT ARE AVAILABLE FOR POOLING	88.95%	89.8%	90.2%	90.5%	90.8%
TOTAL NUMBER OF MANDATORY DISTINCT RATE CENTERS	8,983	9,006	9,068	9,168	9,293
PERCENTAGE OF DISTINCT RATE CENTERS THAT ARE MANDATORY	48.58%	48.7%	49.1%	49.6%	50.3%
TOTAL NUMBER OF DISTINCT MANDATORY SINGLE-SERVICE PROVIDER RATE CENTERS	969	941	905	805	681

	2017	2018	2019	2020	2021
PERCENTAGE OF DISTINCT RATE CENTERS THAT ARE MANDATORY SINGLE-SERVICE PROVIDER	5.24%	5.0%	4.9%	4.3%	3.6%
TOTAL NUMBER OF DISTINCT OPTIONAL RATE CENTERS	6,495	6,645	6,699	6,759	6,823
PERCENTAGE OF DISTINCT RATE CENTERS THAT ARE OPTIONAL	35.12%	35.9%	36.2%	36.5%	37.0%
TOTAL NUMBER OF DISTINCT RATE CENTERS EXCLUDED FROM POOLING	2,043	1,893	1,813	1,752	1,688
PERCENTAGE OF DISTINCT RATE CENTERS THAT ARE EXCLUDED FROM POOLING	11.04%	10.2%	9.8%	9.4%	9.1%
TOTAL NUMBER OF RATE CENTER DESIGNATIONS CHANGED (SEE SECTION 2.4.2 FOR DETAIL)	283	204	293	212	134

14.5 NPA RELIEF PROJECTS INITIATED BY YEAR

NANPA has seen a steady increase in the number of NPA relief projects initiated in the past five years, from 2 in 2017 to 9 in 2021. The totals do not represent all active NPA relief projects.

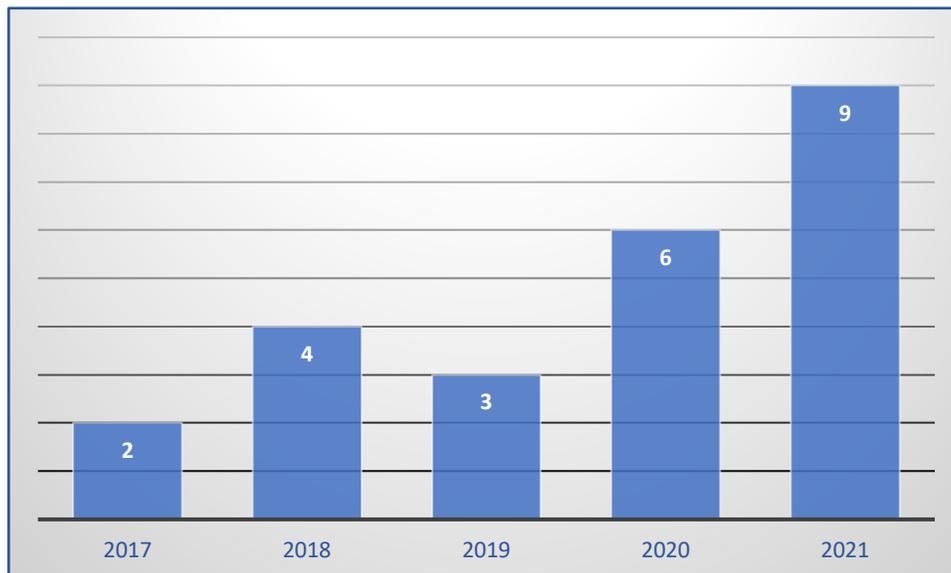

Figure 15: NPA Relief Projects Initiated by Year from 2017 through 2021

14.6 TOTAL ACTIVE NPA RELIEF PROJECTS FROM 2017 THROUGH 2021

The total number of active relief projects depicted below represent NPA relief projects on which NANPA worked from 2017 through 2021. NANPA involvement includes initiating relief, making a regulatory filing, establishing or maintaining jeopardy procedures, and attending Industry committee meetings.

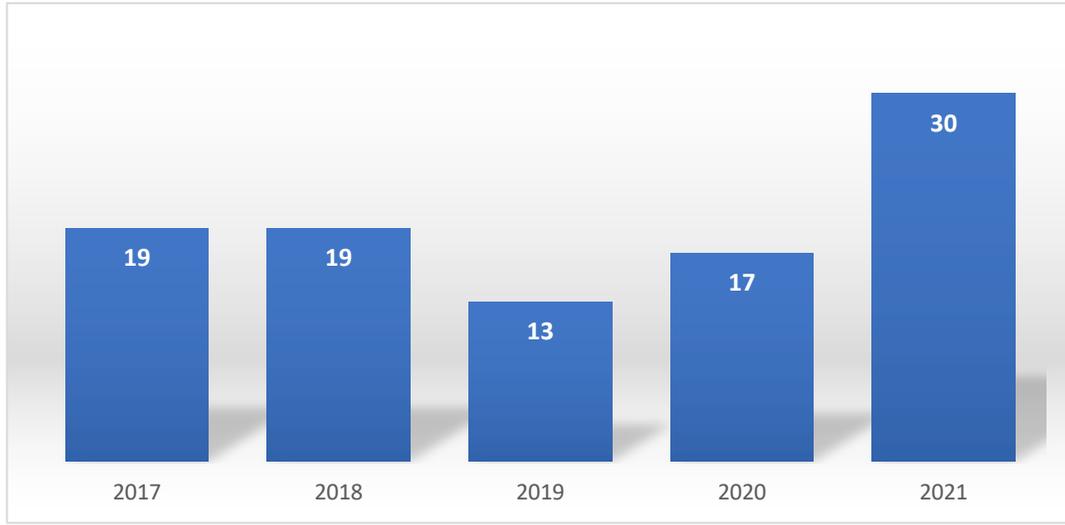

Figure 16: Total Active NPA Relief Projects by Year from 2017 through 2021

14.7 STATE REGULATORY NPA RELIEF SUBMISSIONS FROM 2017 THROUGH 2021

As shown in Figure 1, NANPA made 14 submissions with state regulators in 2021 relating to NPA relief projects as compared to a total of 15 submissions spanning from 2017 through 2020.

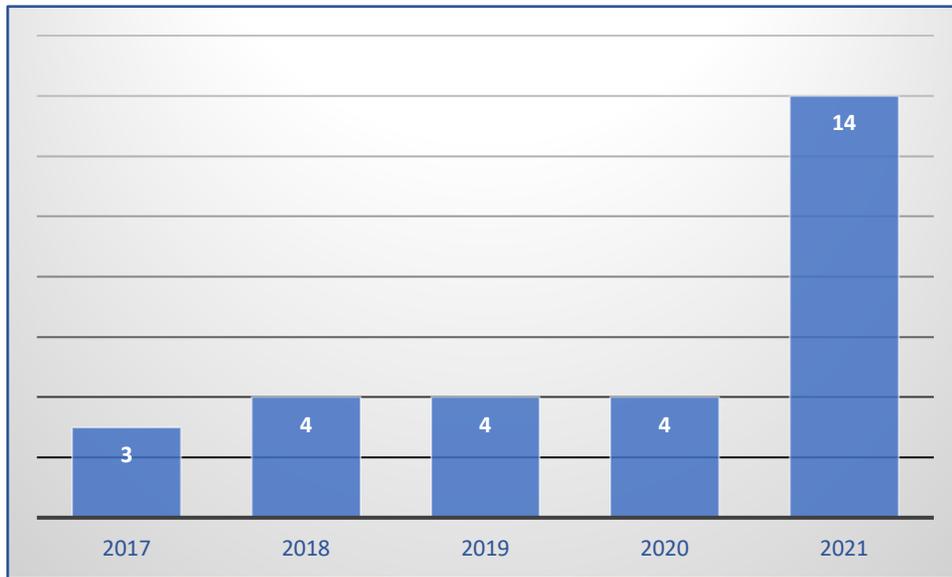

Figure 17: State Regulatory NPA Relief Submissions from 2017 through 2021

14.8 NPAS ASSIGNED FROM 2017 THROUGH 2021

Figure 18 shows the number of new NPAs assigned by NANPA between 2017 and 2020.

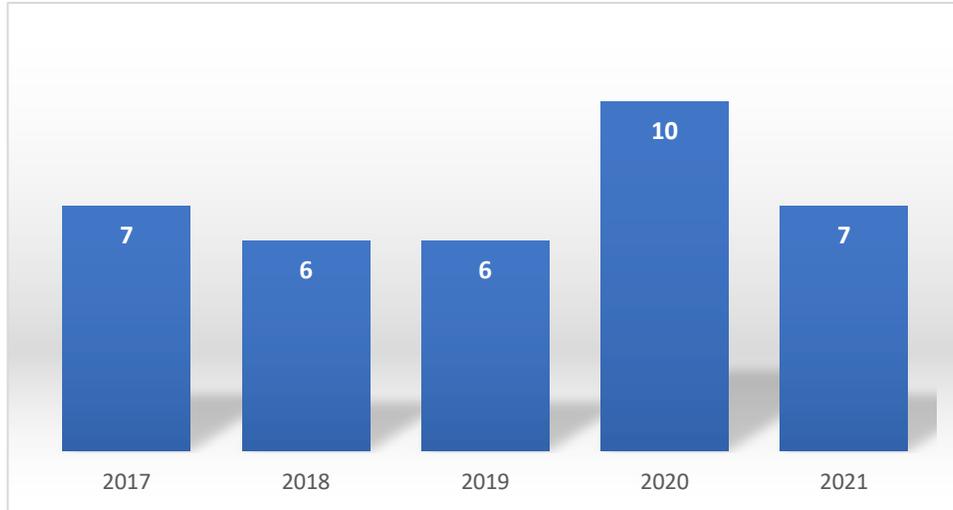

Figure 18: NPAs Assigned from 2017 through 2021

14.9 NPAS INTRODUCED FROM 2017 THROUGH 2021

The following chart illustrates the declining trend of NPAs being introduced between 2017 and 2020, then significantly increased by more than 266% in 2021.

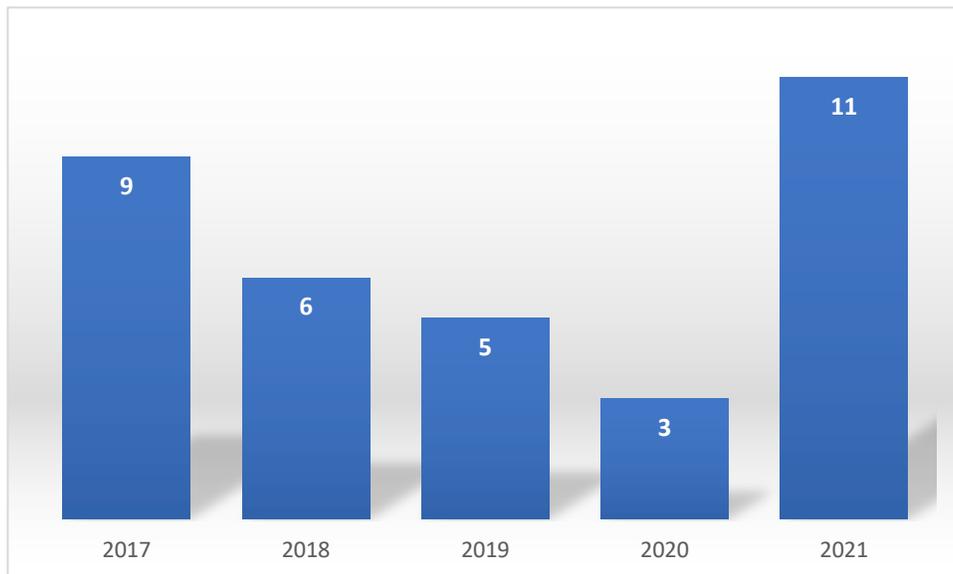

Figure 19: NPAs Introduced from 2017 through 2021

14.10 JEOPARDY DECLARED FROM 2017 THROUGH 2021

The numbers of NPAs declared to be in jeopardy increased by 200% in 2021 from 2017 through 2020.

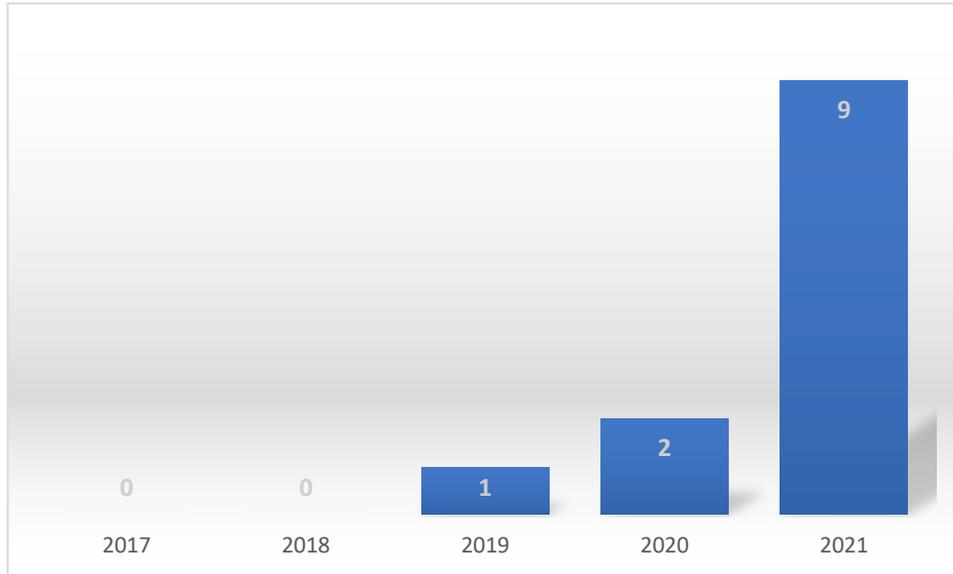

Figure 20: Jeopardy Declared 2017 through 2021

14.11 NPAS IN JEOPARDY FROM 2017 THROUGH 2021

In the past five years, prior to 2021, the highest number of NPAs in a jeopardy condition was four.

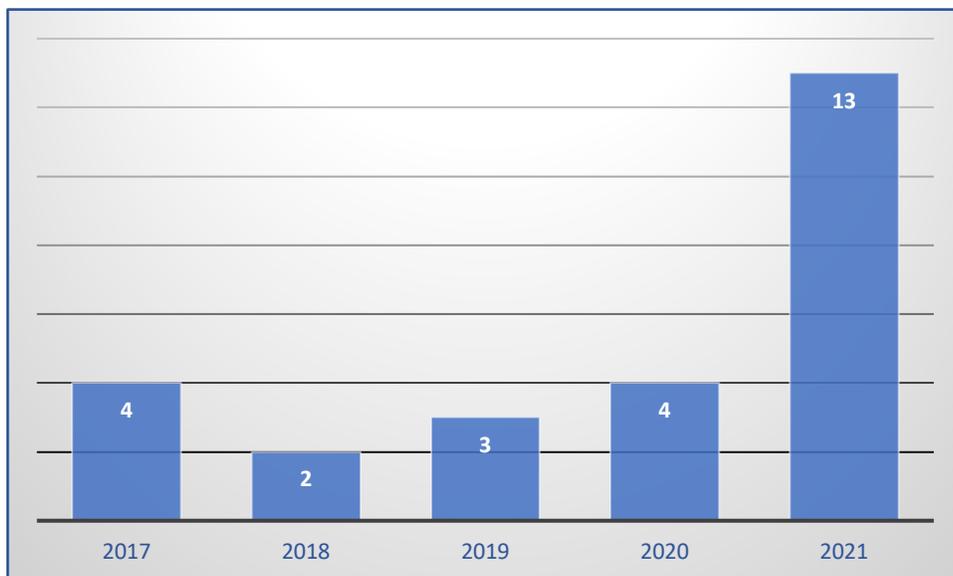

Figure 21: NPAs In Jeopardy from 2017 through 2021

15 ADDITIONAL INFORMATIONAL OFFERINGS

15.1 ADMINISTRATIVE OPERATING COMPANY NUMBER (“AOCN”) ENTERPRISE SERVICE

Upon request, NANPA will enter data for a service provider’s assigned CO codes and thousands-blocks into the database used by the Industry to configure the network for the proper routing and rating of calls. NANPA is permitted to charge a fee and a contract between the service provider and NANPA is required.

Although NANPA is required to provide the AOCN service, service providers are not required to select NANPA. The service provider may select another company to enter this information or may elect to enter the data themselves.

Providers of this data entry service are identified as Administrative Operating Company Numbers (AOCNs). Over time, the company providing the data input service has come to be called the service provider’s AOCN.

15.2 NANPA TESTIMONY IN STATE REGULATORY HEARINGS

NANPA will prepare, file and present oral and written testimony at no charge. Should the state require a NANPA witness(es) to attend the hearing in person or requires local counsel to represent NANPA, NANPA will require the state to reimburse it for associated expenses (e.g., travel, lodging, meals, local transportation, etc.) for the witness(es) and legal counsel.

In 2021, NANPA participated in two virtual pre-hearing conferences, for the California 209 NPA and 707 NPA relief proceedings, and two virtual public hearings for the New York 516 NPA.

15.3 NANPA WEBSITES

The NANPA, Thousands-Block Pooling (“Pooling”), and p-ANI websites are the primary public resources for numbering information. They provide complete descriptions of the different services offered by NANPA including CO code, Pooling, and p-ANI resource administration, area code relief planning, NRUF data collection and analysis and enterprise services. All of the various numbering resources administered by NANPA, including a description of their use and links to their associated administration guidelines, can be easily accessed via the websites. Area code maps, planning letters, reclamation contacts and procedures, FCC numbering orders, contract-required reports to the FCC, User Guides and other documents are readily available as well as contact information for NANPA staff members and state numbering contacts, are posted on the website. The NANPA websites are also the gateways to access the secure sections of NAS, PAS and RNAS.

Popular on the websites are the numerous downloadable reports on the various resources NANPA administers. Many of the reports are available real-time, providing the most up-to-date source on resource availability and are also available in a downloadable format (text and Excel™).

Some of the frequently-accessed reports on the NANPA website include:

- The *Central Office Code Availability and Utilization* reports provide

up-to-date lists of all CO codes available or unavailable for assignment by geographic area code.

- The *Central Office Code Assignment Activity* records provide the quantity of CO codes assigned and returned for each geographic area code on a monthly basis.
- The *Central Office Code Activity Status* report provides the total number of new applications processed by NANPA by month for each state, including assignments, denials and return requests.
- The *NPA Relief Activity Status* report provides information on all active and pending NPA relief projects in the United States.

Some of the frequently-accessed reports on the Pooling website include:

- The *Block Report* that displays a list of blocks that are available, assigned or retained by State, NPA and Rate Center. On the Blocks Available Report blocks in **RED** are pending verification of activation in PSTN. Blocks in **BLACK** are Available Blocks with a future block available date.
- The *NPA/Rate Center Report* contains a list of rate centers by NPA. The list includes the rate center's pooling status and if applicable the FCC top 100 MSA Name.
- The *Pool Tracking Report* shows the forecast and usage information for each rate center within the requested NPA.

There are also various documents available through the websites to assist the user. As an example, for NRUF reporting, the following documentation is available: NRUF Form 502, Geographic and Non-Geographic Job Aids, Rate Center Abbreviations, NRUF Preparation Checklist and list of common errors and associated solutions when completing the Form 502. Similar types of documents are available for CO Code Administration and Area Code Relief Planning. NAS, PAS, and RNAS User Guides, which provide detailed instructions on the use of the systems.

The home pages of the websites offer links to recent information or activity, under the "What's New" section. Also included are links such as the "NANPA Fast Track" and Pooling "Quick Links" containing links to the most visited pages on the website.

The websites include other useful information such as:

- The *New Service Provider Checklist* is a list of helpful tips to assist new service providers in getting started with the pooling process.
- Contact sheets for state and reclamation regulatory contacts, state 30-day notification processes for interconnected VoIP providers, and the Safety Valve (State Waiver) Process.
- The NRUF Geographic and Non Geographic Job Aids and the NRUF Common Errors and Fixes located under NRUF/Submission Methods and Resources.
- The 988 Transition section of the NANPA website.

NANPA continues to provide instructional videos on the NANPA, Pooling and p-ANI websites and viewing activity remains steady.

- For the NANPA website, there were 96 views for five videos. The most popular video was [“How to Request an Initial Central Office Code in a Pooling Area”](#) which had 49 views.
- For the pooling website, there were 131 views for 13 videos. The most popular was “New To Pooling - Quick Start” which had 64 views.
- For the p-ANI website, there were 11 views for five videos with the most popular being “FCC License Search” with six views.

15.4 SUPPORT FOR NANP COUNTRIES OTHER THAN THE U.S.

The NANP is unique among the world’s telecommunications numbering plans in that it serves 20 independent countries. These countries include the United States and its territories, Canada, Bermuda, Anguilla, Antigua and Barbuda, the Bahamas, Barbados, the British Virgin Islands, the Cayman Islands, Dominica, the Dominican Republic, Grenada, Jamaica, Montserrat, Sint Maarten, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Trinidad and Tobago, and Turks and Caicos.

One of NANPA’s roles is to coordinate the assignment of numbering resources that must be shared equitably by all of the participating countries. Area codes are, of course, the primary shared resource, but there are others. For example, entities in the U.S., Canada, Anguilla, Sint Maarten and Bermuda use CICs. U.S. and Canadian entities offer 900 services and thus share the supply of 9YY-NXX codes. NANPA may interface with other countries’ national numbering administrators during the resource request and assignment process. Normally, the national administrator receives the requests, ensures that their country’s regulatory requirements are met, and forwards the requests to NANPA. NANPA verifies that Industry requirements are met and assigns the resources if appropriate to do so.

15.5 SUPPORT TO STATE COMMISSIONS

NANPA frequently communicates with state regulatory authorities (“states”) in support of their needs for numbering information.

In 2021, NANPA continued to provide states with the number utilization data collected via semi-annual NRUF reporting and assisted state regulators in following up with the appropriate service providers with regard to this data. This included providing real-time access to NRUF data via NAS, with various reports and queries available to search and analyze the data, as well as providing ongoing assistance with using the NRUF reporting capabilities available to them in the system.

Throughout the year, NANPA worked with states concerning the reclamation or conservation of assigned resources. Activity included coordinating with the states to identify abandoned CO codes, seeking a service provider to take over disconnected CO Codes and blocks, as well as transferring assigned CO codes to avoid opening new CO codes for LRN purposes.

NANPA continued to supply state regulators with daily application activity reports (Part 1, Part 1A, Part 3 and Part 3A reports), which provide a listing on a daily, weekly, or monthly basis of all applications submitted and processed by NANPA for their respective area codes. These reports include the tracking numbers, the Parent Company Name and Parent Company Operating Company Number associated with the application and the application type (e.g., LRN request, pool replenishment, dedicated customer).

NANPA interfaced with state regulators to address specific issues or concerns associated with individual service provider requests for resources. For example, as a specific NPA exhaust approached, NANPA ensured that the state regulators were kept informed of the latest exhaust projections and provided updated information concerning NPA relief alternatives, to include refreshing the projected lives of proposed relief alternatives. NANPA representatives and state commissions regularly discuss specific activity and issues associated with active, pending or planned NPA relief projects.

NANPA continued to facilitate quarterly meetings with the state commission staff, providing updates on resources administration activity, NPA Relief Planning, NRUF, iVoIP provider authorizations and 30-day notification processes, relevant INC issues, federal robocall prevention activities, and the transition to 10-digit dialing for the three-digit abbreviated 988 code to reach the National Suicide Prevention Lifeline.

NANPA also continued to work with both the FCC and NANC working groups to manage the NANC-Chair web page, which is used for posting NANC and subtending working group documentation.

NANPA also supports state regulators throughout the year by providing education on resource administration processes, website navigation and responds to hundreds of emails and telephone inquiries. Inquiries relate to such issues as application processing, state waiver rules, service provider authorization, iVoIP processes, and reclamation.

NANPA conducted 13 virtual educational meetings about the numbering processes for state regulatory staff. The goal in conducting numbering overview sessions for regulators is to make it easier for them to respond to numbering issues in their states. During the educational sessions, NANPA reviews various numbering procedures such as applications processing, reclamation, forecasting, and iVoIP requirements and activity, NPA relief processes, the 988 transition, as well as information about reports available through the websites.

900	Premium Services

NPA codes 500, 521, 522, 523, 524, 525, 526, 527, 533, 544, 566, 577, and 588 (known as 5XX-NXX codes) are used for applications which are non-geographic in nature, are not assigned to rate centers and may or may not traverse the Public Switched Telephone Network (PSTN), but do require an E.164 addressing scheme. The use of this NANP numbering resource is to communicate with both fixed and mobile devices, some of which may be unattended. This resource may be used for applications enabling machines, which would include but not be limited to wireless devices and appliances, with the ability to share information with back-office control and database systems and with the people that use them. Service is limited only by terminal and network capabilities and restrictions imposed by the

service provider. NPA codes 528, 529, 532, 538, 542, 543, 545, 547, 549, 552, 553, 554, 556, 569, 578, 589, 550, 535, 546, and 558 have been reserved for future use.

NPA code 600 is used within Canada and assigned to Canadian telecommunications service providers in the provisioning of non-geographic, tariffed services.

NPA code 622 is used for applications in Canada which are non-geographic in nature, are not assigned to rate centers and may or may not traverse the Public Switched Telephone Network (PSTN), but do require an E.164 addressing scheme. The use of this NANP numbering resource is to communicate with both fixed and mobile devices, some of which may be unattended. This resource may also be used for applications enabling machines, which would include but not be limited to wireless devices and appliances, with the ability to share information with back-office control and data base systems and the people that use them. Service is limited only by terminal and network capabilities and restrictions imposed by the service provider. NPA codes 633, 644, 655, 677 and 688 have been designated for this use.

NPA code 700 was assigned in 1983 for use by all interexchange carriers. Each carrier has the use of all 7.92 million numbers in the 700 NPA. When a call is made to a 700 number, the local exchange carrier passes the call to the caller's interexchange carrier, selected either through presubscription or override. Note that 700 numbers, unlike other NANP numbers, may terminate in different ways, depending on how the interexchange carrier has allocated the numbers.

NPA code 710 was assigned in 1983 to the U.S. Government for emergency services. The 710 NPA is treated as non-geographic with per-call compensation provided by the U.S. Government.

NPA codes 800, 833, 844, 855, 866, 877, and 888 are used as toll-free codes. NPA code 822 has been assigned for future use as a toll-free code and will be introduced when needed.

NPA 900 codes are used for premium services, with the cost of each 900 call billed to the calling party.

ATTACHMENT 6 NATIONAL ROUTING NUMBER ADMINISTRATION 2021 P-ANI ACTIVITY AND PROJECTED EXHAUST REPORT

The tables found herein contain the *P-ANI Activity and Projected Exhaust Report* projected exhaust information detail based on data as of December 31, 2021, as follows and referenced in Section 6.2.5 of the TRD:

Table A6-1: Projected Exhaust of 211/511 p-ANIs by NPA

Table A6-2: Projected Exhaust of 211/511 p-ANIs by State

Table A6-3: Projected Exhaust of 211/511 p-ANIs by Year

NOTE: "N/A" for exhaust date and quarter indicates there is no forecasted demand so no exhaust date can be calculated.

**Table A6-1
Projected Exhaust of 211/511 p-ANIs by NPA**

ATTACHMENT 7 2021 NPA EXHAUST PROJECTIONS

NANPA projects NPA exhaust on a semi-annual basis in April and October of each calendar year. Tables 6-1 through 6-3 below show the exhaust projections for each NPA, based on the analysis performed in April 2021 (2021.1) and October 2021 (2021.2)²⁸. The change between the current and previous forecasts is given in quarters. A positive number indicates that the exhaust date has moved out to a later date. A negative number indicates that the exhaust is now projected to occur sooner than previously expected.

The notes in the column on the far right are defined as follows:

- a. Reduced historical and projected demand.
- b. Increased historical and projected demand.
- c. Forecast based upon information provided by the Canadian Numbering Authority (CNA). The CNA normally provides only one projection per year. Change is from last forecast provided.
- d. Canadian NPA. With an exhaust date beyond 2043, there is generally no exhaust date provided.
- e. NPA is at exhaust. No codes available except for returns.
- f. New NPA added. The exhaust date moved out due to a new area code implemented, however demand in these areas have not decreased.
- g. Area Code 321A includes only Brevard County Florida; 321/407/689 includes the Counties around Orlando in Central Florida.
- h. NPA Exhaust beyond 30 years is not populated for NRUF reporting cycles prior to 2021.1.

**Table 6-1
Projected Exhaust Dates by NPA**

2021 NANP EXHAUST ANALYSES

Introduction

NANPA also projects the exhaust of the NANP twice a year in April and October based upon the utilization and forecast data submitted by service providers via the NRUF process. The following assumptions were used in these exhaust analyses.

2021 NANP Exhaust Projection Assumptions

The following is a list of assumptions used in the development of the NANP exhaust projections prepared by NANPA:

1. The NANP exhaust study uses as its basis the CO code demand, which includes service provider and thousands-block pooling forecasts, historical CO code assignments and other NPA-specific information, calculated for each respective NPA. The monthly CO code demand as calculated in the NPA exhaust analysis using statistical analyses similar to the analysis NANPA uses to forecast the exhaust of NPAs, i.e., SP forecasts and historical CO code assignment data.
2. For NPAs in rationing, NANPA compared the actual CO code demand over the past year(s) with the rationed amount. In addition, NANPA compared the forecasted CO code demand provided by service providers and/or the thousands-block pooling forecasts to the rationed amount. Based upon this analysis, NANPA identified an average annual CO code demand rate for the NPA.
3. A new NPA will be required when the number of assigned and unavailable CO codes reaches 800.
4. It is assumed that each new NPA will require the same number of unassignable codes as the current NPA. It appears that most of the unassignable codes in the existing NPAs are duplicated in the new NPA. There may be times, however, when additional codes in the new NPA are marked unassignable.
5. No assumptions were made with regard to the relief method implemented (*i.e.*, NPA split vs. overlay). However, it was assumed that the selected relief method did not require the duplication or protection of central office codes other than those identified in number 4 above.
6. The CO code demand for an exhausting NPA will be continued after NPA relief. By doing so, the demand for both the existing and new NPAs will be considered for the geographic area covered by the original NPA.
7. The total quantity of available NPA codes will be 679 for both April and October 2021 derived starting with 800 NPAs less 121 unavailable NPAs.²⁹
8. To account for the variability of demand, a sensitivity analysis was performed to the CO code

²⁹ Reserved for NANP expansion (80), N11 codes (8), 555 and 950 NPAs (2), toll-free 880-887, 889 NPAs (9), non-geographic NPAs (20), 1 (456 which will be made available in 2022) and 1 (988).

demand (i.e., demand will be increased and decreased by increments of 10%) to understand the impact on NANP exhaust.

April 2021 Results based on Assumptions

As recognized in previous NANP exhaust analyses, the model is sensitive to the yearly CO code demand rate. Using the April 2021 NPA Exhaust Analysis and the CO code demand included in NRUF submissions, an average yearly demand rate of 4,722 CO codes was calculated. This yearly demand rate was compared with U.S. CO code demand rates in 2016 through 2021.

YEAR	ANNUAL GROSS CO CODE DEMAND	ANNUAL NET CO CODE DEMAND
2016	3,500	3,300
2017	2,700	2,500
2018	2,800	2,500
2019	2,926	2,650
2020	4,030	3,346
2021	4,722	3,220

To project the exhaust of the NANP, an average annual demand of 4,722 CO codes was used. This demand factors in the forecast data submitted as part of the February 2021 NRUF process and the demand in non-US NANP member area codes.³⁰

Model Based on Projected Demand

Using an average CO code demand rate of 4,722 codes assigned per year, the projected NANP exhaust date is 2065, assuming the quantity of NPAs available remains 679.

Sensitivity Analysis

For comparison purposes, NANPA performed a sensitivity analysis using an average annual demand to 5,666 CO codes, a 20% increase in the base model demand. This analysis resulted in a projected exhaust of 2057.

October 2021 Results based on Assumptions

As recognized in previous NANP exhaust analyses, the model is sensitive to the yearly CO code demand rate. Using the October 2021 NPA Exhaust Analysis and the CO code demand included in NRUF submissions, an average yearly CO code demand rate of 4,721 was calculated. This yearly demand rate was compared with U.S. CO code demand rates in 2016 through 2021.

³⁰ NANPA included an annual forecast of 690 CO codes for non-US NANP member countries.

YEAR	ANNUAL GOSS CO CODE DEMAND	ANNUAL NET CO CODE DEMAND
2016	3,500	3,300
2017	2,700	2,500
2018	2,800	2,500
2019	2,926	2,650
2020	4,030	3,346
2021	4,966	4,835

To project the exhaust of the NANP, an average annual demand of 4,966 CO codes was used. This demand factors in the forecast data submitted as part of the August 2021 NRUF process and the demand in non-US NANP member area codes.³¹

Model Based on Projected Demand

Using an average CO code demand rate of 4,721 codes assigned per year, the projected NANP exhaust date is 2063, assuming the quantity of NPAs assignable remains 679.

Sensitivity Analysis

For comparison purposes, NANPA performed a sensitivity analysis using an average annual demand to 5,959 CO codes, a 20% increase in the base model demand. This analysis resulted in a projected exhaust of 2056.

³¹ NANPA included an annual forecast of 935 CO codes for non-US NANP member countries.

ATTACHMENT 9 2021 5XX NPA EXHAUST ANALYSES

Introduction

NANPA projects the exhaust of the 5XX NPA resource based upon the utilization and forecast data submitted by service providers via the NRUF process. The following assumptions were used in this exhaust analysis. The 5XX NPAs currently in service include the 500, 533, 544, 566, 577, 588, 521, 522, 523, 524, 525, 526, and 527.

April 2021 5XX NPA Exhaust Projection Assumptions

The following is a list of assumptions used in the development of the April 2021 5XX NPA exhaust projection prepared by NANPA.

1. The 5XX NPA exhaust study uses as its basis the NXX code forecasts submitted via the NRUF reporting process and historical NXX code assignment information. The five year total forecasted demand is used to calculate the number of 5XX NPAs that will be needed over the next five years. This demand is also used to forecast when the current quantity of assigned and reserved 5XX NPAs will exhaust.³²
2. A new 5XX NPA will be required when the number of assigned and unassignable NXX codes reaches 800.
3. It is assumed that each new 5XX NPA will require the same number of unassignable codes as the current 5XX NPA.

Results Based on Assumptions

Using the February 2021 NRUF data, the aggregated forecasted demand for 5XX-NXXs for 2021 through 2025 ranges from 1600 NXXs to 2100 NXXs per year. Below is the demand rate versus the actual assignment rate from 2016 through 2020.

YEAR	ANNUAL GROSS 5XXNXX CODE DEMAND	ANNUAL NET 5XXNXX CODE DEMAND
2016	827	777
2017	781	700
2018	1,146	1,108
2019	700	618
2020	1,356	1,186

The average annual demand for non-geographic 5XX NPA NXX codes for the next 5 years is 1,900

³² The 5XX NPAs reserved for future expansion include the following: (527, 528, 529, 532, 538, 542, 543, 545, 547, 549, 552, 553, 554, 556, 569, 578, 589, 550, 535, 546 and 558).

NXX codes. It is expected that 12 new 5XX NPAs will be needed over the next five years.

In projecting the exhaust of the assigned and reserved 5XX NPAs (12 assigned 5XX NPAs and 21 reserved 5XX NPAs), an annual demand rate of 1,900 5XX-NXXs was used, resulting in the projected exhaust in 9 years.

October 2021 5XX Exhaust Projection Assumptions

The following is a list of assumptions used in the development of the October 2021 5XX NPA exhaust projection prepared by NANPA.

1. The 5XX NPA exhaust study uses as its basis the NXX code forecasts submitted via the NRUF reporting process and historical NXX code assignment information. The five year total forecasted demand is used to calculate the number of 5XX NPAs that will be needed over the next five years. This demand is also used to forecast when the current quantity of assigned and reserved 5XX NPAs will exhaust.³³
2. A new 5XX NPA will be required when the number of assigned and unassignable NXX codes reaches 800.
3. It is assumed that each new 5XX NPA will require the same number of unassignable codes as the current 5XX NPA.

Results Based on Assumptions

Using the August 2021 NRUF data, the aggregated forecasted demand for 5XX-NXXs for 2021 through 2025 ranges from 1,200 NXXs to 2,100 NXXs per year. Below is the demand rate versus the actual assignment rate from 2016 through 2020.

YEAR	ANNUAL GROSS 5XX NXX CODE DEMAND	ANNUAL NET 5XX NXX CODE DEMAND
2016	827	777
2017	781	700
2018	1,146	1,108
2019	700	618
2020	1,356	1,186

The average annual demand for non-geographic 5XX NPA NXX codes for the next 5 years is 1,800 NXX codes. It is expected that 12 new 5XX NPAs is needed over the next five years.

In projecting the exhaust of the assigned and reserved 5XX NPAs (13 assigned 5XX NPAs and 20 reserved 5XX NPAs), an annual demand rate of 1,800 5XX-NXXs was used, resulting in the projected exhaust in 9 years.

³³ The 5XX NPAs reserved for future expansion include the following: 528, 529, 532, 538, 542, 543, 545, 547, 549, 552, 553, 554, 556, 569, 578, 589, 550, 535, 546 and 558.
