

2013 NANPA **ANNUAL REPORT**

To stakeholders of the North American Numbering Plan Administration:

It is with great pleasure that NeuStar, Inc. (“Neustar”) presents the 2013 North American Numbering Plan Administration (NANPA) Annual Report. This annual report covers NANPA activities from January 1, 2013 through December 31, 2013.

The NANPA annual report focuses on the administration of the various numbering resources of the North American Numbering Plan (NANP). This report provides a picture of the state of the NANP at the end of 2013 and is a comprehensive description of the numerous activities undertaken by NANPA during the year. The data included in this report comes from the NANPA website where you can locate the latest numbering information.

2013 was an active year for the NANPA. In April, we completed refinement of the NANP Administration System (NAS) application software platform along with the deployment of new NAS hardware to host this updated software. Later in the year, new NAS capabilities were introduced with regard to non-geographic numbering resources. Throughout this process, we maintained our focus on NANPA’s core responsibilities of administration of NANP resources, coordination of area code relief planning and the collection of utilization and forecast data from service providers, ensuring high quality, neutral, third party administration of the NANP.

Feel free to contact any of the NANPA staff, or me, with any comments, suggestions or concerns. Thank you for the opportunity to serve as NANPA.

Sincerely,

A handwritten signature in black ink, appearing to read "John C. Manning". The signature is fluid and cursive, with a long horizontal stroke at the end.

John C. Manning  
Sr. Director, NANPA  
Neustar, Inc. (Neustar)

# THE NORTH AMERICAN NUMBERING PLAN

## HISTORY

The North American Numbering Plan (NANP) was developed by AT&T in 1947 to simplify and facilitate direct dialing of long distance calls. NANP telephone numbers are ten-digit numbers consisting of a three-digit Numbering Plan Area (NPA) code, commonly called an area code, followed by a seven-digit local number.

The NANP is an integrated numbering plan serving twenty North American countries that share its resources. Regulatory authorities in each participating country have plenary authority over numbering resources, but all participating countries, implicitly or explicitly, share numbering resources cooperatively. This approach has been successful for more than sixty-five years.

## NORTH AMERICAN NUMBERING PLAN ADMINISTRATION

AT&T administered shared numbering resources such as area codes until divestiture of the Bell System in 1984, when these functions were transferred to Bellcore under the Plan of Reorganization. On October 9, 1997, the Federal Communications Commission (FCC), acting on a recommendation of the North American Numbering Council (NANC), named Lockheed Martin to serve as administrator of the North American Numbering Plan (NANPA). In December 1999, NANPA was transitioned from Lockheed Martin to Neustar. In July 2003, the FCC selected Neustar through a competitive bid to serve as NANPA. In June 2012, Neustar was again selected by the FCC to serve as the NANPA for another five-year term.

Regulatory authorities in various NANP countries have named national administrators to oversee the numbering resources assigned by NANPA for use within their countries. Neustar is the national administrator for the United States (U.S.) and its territories. Leidos Canada Inc. serves as the Canadian Numbering Administrator. In other participating countries, regulatory authorities either serve as the national administrator or delegate the responsibility to the dominant carrier. NANPA, in its overall coordinating role, consults with and provides assistance to those regulatory authorities and national administrators to ensure that numbering resources are used in the best interests of all participants in the NANP.

NANPA is not a policy-making entity. In making assignment decisions, NANPA follows regulatory directives and industry-developed guidelines. The NANC, via its Numbering Oversight Working Group (NOWG), provides continuous oversight of NANPA on behalf of the NANC and evaluates NANPA's performance each year.

NANPA has three core responsibilities: administration of NANP resources, coordination of area code relief planning and collection of utilization and forecast data from service providers.

## NANPA FUNDING

The NANPA function is performed under an FCC contract on a fixed-price basis. Costs associated with the administration of shared numbering resources are allocated to participating countries based on population and then further adjusted based on NANPA services used by each country. Participants pay only their share of the costs of the NANPA services they require. Regulatory authorities in each participating country determine how to recover these costs.

In the U.S., which pays most of the cost, NANPA is funded by the telecommunications industry under an arrangement specified in FCC rules (47 C.F.R. §52.17). Telecommunications carriers in the U.S. complete a Telecommunications Reporting Worksheet (FCC Form 499-A) which specifies the information needed to calculate the fee. Each telecommunications carrier's end user telecommunications revenue for the prior calendar year is multiplied by a contribution factor to obtain the fee payable. The minimum fee is \$25.

## NANPA NEUTRALITY

In accordance with FCC regulations, the NANPA shall be a non-governmental entity that is impartial and not aligned with any particular telecommunications industry segment. Accordingly, while conducting its operations, the NANPA may not be an affiliate of any telecommunications service provider(s) as defined in the Telecommunications Act of 1996. "Affiliate" is a person who controls, is controlled by, or is under the direct or indirect common control with another person. Further, the NANPA and any affiliate thereof, may not issue a majority of its debt to, nor may it derive a majority of its revenues from, any telecommunications service provider. "Majority" shall mean greater than 50 percent, and "debt" shall mean stocks, bonds, securities, notes, loans, or any other instrument of indebtedness.

Notwithstanding the neutrality criteria set forth above, the NANPA may be determined to be or not to be subject to undue influence by parties with a vested interest in the outcome of numbering administration and activities. The NANC, as a federal advisory committee to the FCC, may conduct an evaluation to determine if the NANPA meets the undue influence criterion.

# NANP ADMINISTRATION SYSTEM

The NANP Administration System (NAS) provides an automated system for processing number resource applications, collecting resource utilization and forecast data and issuing notifications to the industry on numbering matters. Introduced in 2004, NAS is the primary tool used by federal and state regulators, service providers, service provider consultants and the NANPA in the assignment and administration of the various NANP resources.

At the end of 2013, there were 1,330 registered NAS users. Over 1,230 users were service providers or their consultants. Fifty-eight of the users represented federal and state regulatory users. Thirty-six “Other” users were registered in the system. Along with the NAS-registered users, there were 2,779 email list participants. Email list participants receive NANP notifications but do not have access to NAS.

With the award of a new NANPA contract in June 2012, Neustar, as the NANPA, proposed a number of updates and enhancements to the NANP Administration System. The approach was to take advantage of existing business rules, logic and algorithms currently used in the system while incorporating a number of technological improvements. To accomplish this, Neustar implemented a two-phased delivery process. In Phase 1, which was completed in September 2012, NANPA implemented the necessary modifications to NAS hardware to create a secure DMZ (“demilitarized zone”), ensuring NAS conformance with industry best practices for system security.

Phase 2 involved the refinement of the NAS application software platform along with the deployment of new NAS hardware to host this updated software. Phase 2 was deployed in April 2013. New NAS functionality deployed in Phase 2 is summarized in the subsections below.

With the major refinement of the software, it was expected that modifications would be necessary to address functional issues discovered after moving to production. Eighteen trouble tickets were opened after the April deployment, of which all but two were closed by the end of the year. The type of issues encountered included the downloading of certain reports, submission of NRUF data via the on-line submission method, field lengths on specific resource applications, updating user profiles, and incorrect email notifications. Where necessary, NANPA applied a specific workaround to address these issues until the appropriate corrections were implemented in the system.

Below is a discussion of the NAS functionality and how the system supports the assignment and administration of NANP resources.

## NAS CENTRAL OFFICE CODE ADMINISTRATION

NAS mechanizes central office (CO) code administration by processing the following code requests: Part 1 (Central Office Code Assignment Request form), Months to Exhaust Worksheet (required when requesting additional central office codes in a rate center) and Part 4/Part 4-PA (Confirmation of Code In-Service forms). NAS issues a Part 3 (Central Office Code Administrator's Response/Confirmation form) to provide a disposition on the Part 1 request and a Part 5 Form, used to confirm NANPA's receipt of a Part 4. NAS allows users to complete and submit these forms on-line, as well as stores and processes these forms.

NAS auto-populates specific fields within applications with information contained in the user's profile and provides drop-down menus for certain data required on the different forms such as Operating Company Numbers (OCNs), NPA's and rate center information. System checks ensure that all required fields are populated and that the information supplied is validated prior to submission. Supporting documentation associated with an application is provided to NANPA via fax or email. Such documentation includes evidence of certification and facilities readiness for initial code applications, evidence of safety valve waiver approvals, relinquishment information for transfers and documentation necessary for expedited code activations, modifications and returns.

Once NAS validates an application's content and accepts it for processing, the applicant receives confirmation via a tracking number, indicating that the code request was successfully submitted. NAS will also permit code applicants to search for previously-submitted forms.

NAS also supports an interface with the Pooling Administration System (PAS). This interface permits the service provider to submit the information needed to apply for a central office code (i.e., Part 1) in a pooling rate center into PAS. In addition, users may submit changes to the information associated with a pooled central office code or return a pooled code. PAS forwards this data to NANPA via the NAS/PAS interface. This process includes the submission of the appropriate Months-to-Exhaust Form required with any central office code growth request. Once received by NAS, the Part 1 request appears in the work item list of the NANPA Code Administrator. When the Code Administrator processes the central office code application, NAS emails the Part 3 Administrator's Response/Confirmation to the applicant and the Pooling Administrator (PA) as well as sends it via the NAS/PAS interface to PAS. The Part 4 and Part 4A (submitted by the Pooling Administrator) are also sent via the interface.

# NANP ADMINISTRATION SYSTEM

## APPLYING ON-LINE FOR OTHER NUMBERING RESOURCES

NAS allows on-line application submissions not only for central office codes, but also for other NANP resources such as NPAs, Carrier Identification Codes (CICs), 9YY-NXX codes, NPA 456-NXX codes, 800-855 line numbers and 555 line numbers. In addition, NAS provides real-time reports on the assignment status of these numbering resources. These reports are accessible through the 'Reports' section of the NANPA website.

## 5XX NPA RESOURCE ADMINISTRATION

In September 2013, NANPA deployed Change Order 1, in response to INC Issue 692 (Update the 5YY Requirements for Resources) and INC Issue 702 (Update Service Description for Use of 5YY Resources). With Issue 702, the INC re-defined the purpose of 5YY NPA resources, to include identifying the resource as 5XX NPAs. Along with re-defining the purpose of the resource, numerous modifications were made to NAS that impacted resource processing and reclamation, NRUF queries and reports and public website reports. Below is a high level summary of the changes to NAS and the administration of the 5XX NPA resource.

- A new 5XX-NXX Part A form is used when requesting the assignment of a 5XX-NXX code, changing information associated with a 5XX-NXX assignment or returning a 5XX-NXX code.
- A 5XX-NXX Part C Reminder email is now sent if the Part C (Confirmation of In-Service form) is not received within 5 months from the date of assignment. A 5XX-NXX Part C Delinquency email is sent if the Part C is not received within 6 months from the date of assignment.
- A list of 5XX-NXX codes that are in delinquent status is emailed monthly by NANPA to the FCC. A "delinquent" 5XX-NXX code is a code for which no Part C has been submitted within six months of the assignment date.
- New 5XX-NXX public website reports are available, including 5XX-NXX Available Codes, Utilized Codes and Aging Codes reports.

## NANP NOTIFICATION SYSTEM

The NANP Notification System (NNS) provides a vehicle for NANPA to distribute notifications when significant events occur. Notifications fall under two categories: Geographic and Non-Geographic Notifications. Geographic Notifications are those issued for documents that have been generated for specific states and/or NPAs. Non-Geographic Notifications are those that relate to the entire NANP and are not related to a specific state or NPA.

### Geographic notifications available to the public include:

- New processes and changes in central office code

administration that affect specific states and/or NPAs;

- NPAs going into or out of jeopardy status or other changes to the jeopardy status of an NPA;
- Announcements by regulators of changes that affect NANP processing; and
- Data related to the status of resources associated with state conservation deliberations.

### Non-geographic notifications available to the public include:

- Changes in Industry Numbering Committee (INC) administration guidelines;
- Updates on the NRUF Form 502 and associated job aids, as well as procedural changes (such as the introduction of new data fields);
- Changes to NANPA processes that will affect customers;
- NANPA Planning Letters and quarterly Newsletters;
- International activities impacting the NANP and NANP Administration;
- New and/or revised NPA and NANP exhaust projections;
- Scheduled system maintenance and system availability issues; and
- Client education, new forms and tools.

In addition to distributing notices, NAS also has the capability to include attachments to the notices, allowing NANPA to send certain documentation (e.g., quarterly NANPA Newsletters, NRUF Preparation Checklist) directly to users. NAS also permits users to search for specific notices based upon a particular time period. Notifications concerning NPA relief planning activity remain limited to only the service provider industry and appropriate regulatory agencies.

NANPA distributed 159 notifications in 2013. The chart below illustrates the quantity of notifications distributed by category. All notifications are retained in NAS.

Notification Category	Number of Notifications
NPA Relief Planning	81
Non-Geographic	31
Planning Letters	13
NRUF	11
Code Administration	9
INC Guidelines	7
Newsletters	4
Jeopardy	3
Other Geographic	0
<b>Total</b>	<b>159</b>

# NANP ADMINISTRATION SYSTEM

## NAS NRUF

NRUF reporting is a semi-annual process whereby service providers submit utilization and forecast information to NANPA for use in the development of NPA and NANP exhaust projections. NANPA collects and stores this information and provides it to the FCC and state commissions. Service providers are required to report by February 1 and August 1 of each year and may submit updates and corrections to their submissions at any time during the current reporting cycle.

NAS permits service providers to submit their utilization and forecast data via email (i.e., Excel™ spreadsheet), Electronic File Transfer (EFT) using secure FTP, compact disk (CD) or on-line. With the on-line method, service providers log into NAS and enter the data requested in the various worksheets contained in the NRUF Form 502. In addition, since many service providers have the need to submit NRUF data between reporting cycles (e.g., update forecast information), NAS permits service providers to update or modify previously-submitted utilization and forecast data for the current reporting cycle. This on-line capability is also used for reporting utilization and forecast data for the non-geographic 5XX and 9YY NPAs.

With the technical refresh in April 2013, a number of enhancements were made to NAS. Below is a summary of these enhancements.

- Service providers may search for their utilization and forecast data in all states and all NPAs. Previously, service providers were limited to a particular state when running certain NRUF reports.
- NRUF reports are downloadable in either Excel™ 2007 or Excel™ 97-2003.
- With the ability to download more NRUF report data, on-screen NRUF report downloads are now limited to 1,000 lines. If report output exceeds 1,000 lines, the user is presented with an option to download the report output either to Excel™ 2007 or Excel™ 97-2003.
- An on-line help button is available for all screens when completing an NRUF.

With the introduction of the new 5XX NPA capabilities associated with NANPA Change Order 1, a new 5XX NPA Utilization Missing Report was deployed in November 2013. This capability permits the NAS user to identify those 5XX-NXX resources assigned to the user for which no utilization has been reported.

## NAS REPORTS

NAS provides a number of real-time reports concerning NANP resource assignment and availability, including NPAs,

central office codes, CICs, 5XX-NXXs, 9YY NXXs and 555 line numbers. These reports are available on the NANPA website.

In addition to resource availability, NAS permits both service providers and regulators access to numerous NRUF queries and reports. Information provided in these queries is driven by the user's NAS profile. For example, service providers' access is limited to their own information, while state regulators have access to all utilization and forecast data for the area codes in their respective states.

With NANPA Change Order 1, the 5XX-NXX reports available on the NANPA website were modified. Specifically, a new "5XX-NXX Available Codes Report" was deployed. This report lists the codes that are available for assignment in each of the 5XX NPAs. A new "5XX-NXX Aging Code Report" was introduced. This report provides a list of 5XX-NXX codes that have been recently returned or reclaimed and will be made available after a 45-day aging period. Finally, the "5XX-NXX Utilized Code Report" displays a list of 5XX-NXX codes assigned or unavailable for assignment by NPA. Each of these reports is updated on a real-time basis.

In addition to the above reports, a new "All 5XX-NXX Codes Report" was created. This report, updated daily and available in Excel™ and text format, provides an updated listing of assigned, available and unavailable 5XX-NXX codes by NPA.

## NAS USER REGISTRATION

All users of NAS are required to register in the system. The registration process allows a user to select from a variety of resource subscriptions depending on the user's needs.

There are different types of NAS users, including service providers, service provider consultants, federal and state regulators and other individuals or entities with a valid interest in number administration matters. For each user type, specific NAS capabilities are available for use. These capabilities include the ability to 1) submit requests for central office codes (Central Office Code Administration), 2) access NRUF capabilities, 3) register for various geographic and non-geographic notifications, 4) submit applications for other NANP resources such as CICs, 5XX-NXXs, 9YY NXXs, 456 NXXs, 800-855 line numbers and 555 line numbers and 5) submit Part 4 In-Service Confirmation forms (reclamation).

All registration requests are reviewed and validated prior to approval. Once NANPA approves the registration request, the user is issued a password. Passwords are randomly generated by the system and contain numbers, letters and other characters. Once registered in NAS, the user is able to update and modify their profile.

# NANP ADMINISTRATION SYSTEM

NAS has been engineered with numerous security features. NAS has specified time intervals within which a user must log into the system after their profile has been approved or system access will be denied. Users are required to update their NAS passwords every 180 days. Anytime a user contacts NANPA to re-enable their profile, the user will receive a new password that must be reset by the user within 14 calendar days of when the profile was enabled. If an existing NAS user fails to reset the password, the NAS profile will be suspended. NAS will continue to send NNS notices to the user whose profile is suspended, but no other NAS-generated work item-related emails will be sent to the user. Nor will the user have access to NAS. The user will receive weekly reminders to contact NANPA to reset the NAS password. If the user fails to contact NANPA within 90 days of the date the NAS account is suspended, the profile will automatically be disabled and the user will cease to receive NNS notices.

## CODE ADMINISTRATION

### OVERVIEW

Code administration includes processing applications for assignment, making and recording assignments, reclaiming resources that are not placed into service, updating information associated with assigned resources and keeping the industry informed as the supply of available resources approaches exhaust. The scope of code administration includes these numbering resources:

- Numbering plan area (NPA) codes (area codes);
- Central office (NXX) codes;
- 5XX-NXX codes;
- 9YY-NXX codes;
- N11 codes;
- 555-XXXX line numbers;
- Carrier identification codes (CICs);
- International inbound NPA 456-NXX codes;
- 800-855 line numbers;
- ANI II digits (Automatic Number Identification Information Integers); and
- Vertical service codes.

Subsequent sections of this report discuss each of these resources in greater detail.

### RESOURCE REPORT—NPA CODES

**Contact: John Manning, 571-434-5770,  
john.manning@neustar.biz**

NPA codes, often called “area codes,” are the first three digits of the 10-digit NANP telephone number. NPA codes are in NXX format, where N is any digit from 2 through 9 and X is any

digit from 0 through 9. Attachment 1 to this annual report provides an inventory of NPA codes.

Most NPA codes designate specific geographic areas; for example, NPA 605 serves South Dakota and NPA 606 covers a portion of Kentucky. NPA codes used in this manner are called geographic NPA codes. As of December 31, 2013, 356 geographic NPA codes were in service. Of these, 300 serve the U.S. and its territories, 36 serve Canada, and the remaining 20 serve Bermuda and the Caribbean countries participating in the North American Numbering Plan. Attachments 2 and 3 to this annual report are tables of geographic NPA codes currently in use, sorted by location and numerically.

Other NPA codes designate special services such as toll-free calling rather than geographic areas. These codes are called non-geographic NPA codes. Normally, NPA codes ending in a repeating digit, called “easily recognizable codes,” are used to identify toll-free or other special services. Currently, 15 such codes are in use. One new non-geographic NPA (NPA 844) went into service in December 2013. Attachment 4 lists the non-geographic NPA codes currently in service.

Introduction of a new geographic NPA code follows a plan and schedule approved by regulatory authorities. The plan is summarized in one or more planning letters on the NANPA website. Once an NPA code is assigned for a geographic area or special service, an implementation period follows. The most visible implementation activities include preparing the network to accept the new NPA code, introducing any required changes to the dialing plan and informing the public about how the new code is to be used. The new code is said to be “in service” when it becomes generally dialable.

# CODE ADMINISTRATION

## 2013 ACTIVITIES

Seven new NPA codes were introduced in 2013, as shown in the table below.

Table 1: NPAs Introduced in 2013

NPA	Date In Service	Location	Overlay?	Parent NPA	Planning Letter Number(s)	NPA Overlay Complex
437	3/25/13	Ontario, Canada	Yes	416/647	447 441 426	416/647/437
365	3/25/13	Ontario, Canada	Yes	905/289	448 440R1 420	289/905/365
639	5/25/13	Saskatchewan, Canada	Yes	306	446 439 431	306/639
236	6/1/13	British Columbia, Canada	Yes	604/778/250	450 428	604/778/250/236
737	7/1/13	Texas	Yes	512	438	512/737
272	10/21/13	Pennsylvania	Yes	570	451 444 409	570/272
844	12/7/13	Non-Geographic	Yes	800	455 452 443	800/888/877/866/855/844

Eight NPAs were assigned this past year. NPA 346 was assigned as the relief area code for the Texas 281/713/832 overlay complex. NPA 930 was assigned as the relief NPA for the Indiana 812 area code. NPA 629 was assigned to relieve the Tennessee 615 NPA. In Canada, NPA 548 was assigned to relieve the 519/226 overlay complex in Southwestern Ontario and NPA 825 was assigned to relieve the 403/587/780 overlay complex in Alberta. NPA 220 was assigned as the relief area code for Ohio 740 area code. In South Carolina, the 854 area code was assigned to relieve the 843 NPA. Finally, NPA 628 was assigned as the relief NPA for the California 415 area code.

At the direction of the industry, four area codes (NPAs 550, 535, 546 and 558) were moved from “available” to “reserved” for future non-geographic NPAs.

At year end, 29 previously-assigned NPA codes remained to be introduced, as shown in Table 2. The “status” column provides the key to understanding the table. A status of “pending” indicates that the industry or regulatory authority has yet to determine an in-service date for the new code. Typically this means that the new NPA will not be introduced until additional numbers are needed. A status of “suspended” indicates that the regulatory authority has placed the plan for introducing the new code on hold and that the plan may be canceled or revised in the future. “Scheduled” means a specific in-service date has been identified for the new NPA.

# CODE ADMINISTRATION

Table 2: NPAs planned but not yet introduced (as of December 31, 2013)

New NPA	Location	Country	Anticipated In Service Date	Parent NPA	Status	Planning Letter Number(s)
220	Ohio	US	4/22/15	740	Scheduled	
227	Maryland	US		301/240	Pending	
274	Wisconsin	US		920	Pending	442 417 385
283	Ohio	US		513	Suspended	316 286 264

# CODE ADMINISTRATION

## OVERLAYS

In an overlay, two or more NPA codes serve all or part of the same geographic area. The term “overlay complex” describes the list of NPA codes included in the overlay. All of the overlays in service today are full-service overlays; that is, numbers in the overlay NPA code(s) are not restricted to any specific service or services. Six NPA overlays were implemented in 2013. Listed in Table 3 are the overlay complexes in service as of December 31, 2013.

**Table 3: NPA Overlays**

## DIALING PLANS

Each NPA has a basic dialing plan, which indicates the dialing pattern to be used for various types of calls originating in that NPA. In the U.S., dialing plans vary from state to state and from NPA to NPA. Basic dialing plans for U.S. NPAs are listed in Attachment 5 to this annual report.

Key variables in determining a dialing pattern are 1) whether or not the call originates and terminates within the same NPA, 2) whether the call is a local or toll call and 3) whether the call requires special handling (e.g., credit card, third-party billing, or operator assistance). Dialing patterns in the U.S. have been largely standardized. Local calls originating and terminating within the same NPA are usually dialed on a seven-digit basis, omitting the area code, except in overlay areas where the NPA must be dialed. Toll calls originating in one NPA and terminating in another are usually dialed with a prefix “1” followed by the ten-digit number. Special handling calls are always dialed with a prefix “0” followed by the ten-digit number.

Most of the variations in basic dialing plans involve toll calls originating and terminating within the same NPA (home-NPA toll calls) and local calls originating in one NPA and terminating in another NPA (foreign-NPA local calls). In states where the prefix “1” is considered to be a toll indicator, home NPA toll calls are usually dialed as “1” followed by the ten-digit number, and foreign NPA local calls are dialed using the ten-digit number without a prefix. In states where the prefix “1” is used to indicate that a ten-digit number will follow, home-NPA toll calls are dialed using just the seven-digit number and foreign-NPA local calls are dialed as “1” followed by the ten-digit number.

Dialing patterns within an NPA also may vary according to service provider capabilities. In addition, in many areas where NPA boundaries split local calling areas, state regulatory commissions and service provider tariffs allow seven-digit dialing across NPA boundaries, including across state lines.

# CODE ADMINISTRATION

## RESOURCE REPORT – CENTRAL OFFICE CODES

Contact: Beth Sprague, 571-434-5513,  
beth.sprague@neustar.biz

Central office (CO) codes, also known as prefixes, exchanges, or NXX codes, are digits 4 through 6 of the 10-digit telephone number. The following discussion addresses central office codes within geographic area codes.

NANPA administers all geographic central office codes in the U.S. and its territories. The Canadian Numbering Administrator performs this function in Canada. In the remaining NANP countries, regulatory authorities are playing an increasingly active role in central office code administration as competition emerges in these countries. Contact information for regulatory and administrative personnel can be found in Attachment 9 to this annual report.

Service providers obtain numbers for their customers by applying for and receiving central office code assignments. Each central office code contains 10,000 numbers, for use in the area the code serves. Central office code requests also come from service providers through the Pooling Administrator for 1) the assignment of a Location Routing Number (LRN), 2) to replenish the inventory pool or 3) to meet a service provider's need for 10,000 consecutive telephone numbers for a single customer. NANPA tracks nearly 152,000 assigned central office codes in the U.S. and its territories. NANPA processed over 20,300 requests in 2013 (compared with 10,200 in 2012) for central office code assignments, code returns or changes to existing assignments.

The FCC, in its Number Resource Optimization (NRO) order series, established detailed criteria for the assignment of initial and growth central office codes in the U.S. and its territories. The process of applying for a central office code assignment based on FCC rules and regulations is specified in guidelines developed by the industry. The latest version of the guidelines, entitled Central Office Code (NXX) Assignment Guidelines, ATIS0300051, can be found at the Alliance for Telecommunications Industry Solutions (ATIS) website at <http://www.atis.org/inc/incguides.asp>.

## CENTRAL OFFICE CODE ACTIVITY

Central office (CO) code monthly application and assignment activities during 2013 are shown in Table 4.

The rows in the table should be interpreted as follows:

**Assignments** – Applications that resulted in the assignment of a new central office code.

**Changes** – Applications that resulted in a change to the information associated with a code assignment, for example, a change to the OCN or switch.

**Denials** – Applications not meeting the criteria for assignment as prescribed by the FCC and embodied in the central office code assignment guidelines.

**Cancellations** – Applications canceled or withdrawn by the applicant. These applications are not counted in the total quantity of applications processed.

**Canceled Returns** – Applications requesting the return of an assigned code that were canceled after NANPA issued the Part 3 approving the return.

**Returns** – Applications requesting the return of an assigned code.

**Reservations** – Applications requesting and receiving a code reservation.

**Total Processed** – Total quantity of applications processed by NANPA.

**Pooling Pass-Thru** – Applications processed by NANPA that came through the Pooling Administrator.

# CODE ADMINISTRATION

Table 4: 2013 Monthly CO Code Activity

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Total
Assignments	255	272	303	267	199	223	193	208	165	253	218	156	2,712
Changes	4,126	796	405	740	657	6,679	425	567	410	390	361	810	16,366
Denials	29	103	139	220	55	70	55	90	40	53	39	107	1,000
Cancellations (Note 1)	7	22	22	15	40	22	31	35	17	26	24	6	267
Canceled Return (Note 1)	0	0	0	0	0	0	0	0	1	0	0	0	1
Return	7	27	11	44	40	22	46	12	19	12	25	19	284
Reservations	0	0	0	0	0	0	0	0	0	0	0	0	0
<b>Total Processed</b>	<b>4,417</b>	<b>1,198</b>	<b>858</b>	<b>1,271</b>	<b>951</b>	<b>6,994</b>	<b>719</b>	<b>877</b>	<b>634</b>	<b>708</b>	<b>643</b>	<b>1,092</b>	<b>20,362</b>
Pooling Pass-Thru	401	994	647	874	772	825	544	690	408	638	444	758	7,995
Abandoned Codes	6	8	81	0	4	154	755	0	10	67	10	200	1,295

Note 1 – Applications that are canceled are not included in the total quantity of applications processed.

The total quantity of applications processed in 2013 (20,362) was twice the amount in 2012 (10,243). This was due primarily to the number of changes submitted in 2013 (16,366) compared to 6,199 in 2012. Contributing significantly to the increase in changes were a few service providers modifying OCNs and switch IDs associated with assigned codes. The quantity of denials in 2013 (1,000) was slightly higher than 2012 (833) while the number of returns dropped from 572 in 2012 to 284 in 2013.

As part of its code administration responsibilities, NANPA assists the FCC in certain aspects of the Debt Collection Improvement Act of 1996. Specifically, NANPA withholds the assignment of numbering resources to an entity identified by the FCC as delinquent in their payments to the Commission. In 2013, 52 central office code assignment requests were denied by NANPA in compliance with this requirement.

In 2013, NANPA initiated a new measurement identifying the quantity of codes which were treated as abandoned. An abandoned code is a code for which the code holder is no longer providing service or cannot be found, often the result of going out of business. NANPA worked with the Pooling Administrator and the appropriate regulatory authorities to identify a service provider with assigned resources from the abandoned code in order to transfer the code.

## CENTRAL OFFICE CODE ACTIVITY (YEAR OVER YEAR)

NANPA also tracks year over year assignment data to identify any trends in CO code assignment rates. Table 5 shows the total quantity of CO codes assigned in 2013 compared with assignments over the last ten years. Also included is the net demand for the year, reflecting the impact of codes returned during the year.

Table 5: Year over Year CO Code Assignments

Year	Annual Gross CO Code Demand	Annual Net CO Code Demand	Quantity of Returned Codes
2003	3,245	1,457	1,788
2004	3,128	2,144	984
2005	3,312	2,307	1,005
2006	4,079	3,413	666
2007	3,216	2,467	749
2008	2,946	2,162	784
2009	2,144	1,610	534
2010	2,795	2,484	311
2011	2,889	2,273	616
2012	2,637	2,065	572
2013	2,712	2,428	284

# CODE ADMINISTRATION

## CENTRAL OFFICE CODE ADMINISTRATION QUALITY MEASUREMENTS

Central office code administration quality results for 2013 are summarized in Table 6. A detailed description of the quality measurements follows.

The table shows three primary measurements:

1. **Application processing** – NANPA is required to process central office code applications within seven calendar days of the date of receipt. The table shows the percentage of applications processed within seven calendar days, the number of applications exceeding the seven calendar day period and, for those applications requiring more than seven calendar days, the “average number of days late.” The results in the table show uniform, high-quality processing.

2. **Codes assigned without a code conflict or reject** – A ‘Code Conflict’ occurs when a code assigned by NANPA cannot be placed into service due to a dialing conflict. A ‘Code Reject’ occurs when a code assigned by NANPA must be replaced because the code originally assigned cannot be placed into service.
3. **Telephone calls** – Code Administrators are required to respond to telephone calls by no later than the end of the next business day. The table shows the percentage of telephone calls returned during the required period along with the “average days late” for calls returned outside of the required period.

Table 6: 2013 CO Code Administration Quality Results

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
<b>1. Percent of central office code applications processed in 7 calendar days</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>	<b>99.8%</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>
Number of applications exceeding 7 calendar days	0	0	0	2	0	0	0	0	0	0	0	0

# CODE ADMINISTRATION

## 2013 ACTIVITIES

Below is a summary of central office code administration activities in 2013.

**Maximizing the Quantity of Available CO Codes** – Throughout 2013, NANPA worked with various state regulators and service providers to maximize the quantity of available CO codes in preparation for area code relief. NAS was appropriately updated to ensure it accurately reflected available resources in all rate centers. Examples include the following:

- Identified potential recoverable NXXs in advance of relief planning in Texas (210, 214, 281/713 and 914 NPAs), Ohio (440 NPA), Maine (207 NPA), Pennsylvania (570 NPA) and South Carolina (843 NPA).
- Examined seven-digit, cross-NPA dialing arrangements in the Indiana 812 NPA, Ohio 740 NPA and South Carolina 843 area code.

**Abandoned CO Codes** – NANPA worked with the Pooling Administrator and regulators to identify abandoned CO codes. In 2013, NANPA identified 1,295 abandoned codes and initiated the recovery process in conjunction with regulators in 24 states and the FCC.

**Education of Service Providers** – NANPA provided notifications throughout the year of rate center changes taking place in various area codes as well as when all assignable CO codes in a specific area code were exhausted. NANPA also informed the industry of changes to the central office assignment guidelines such as the modification to the proof of facilities readiness documentation requirements for the assignment of an initial resource in a rate center. In addition, by NANPA reminding service providers to 1) build newly-assigned CO codes in appropriate industry databases, 2) complete all the work necessary to transfer a code and 3) return codes not in use, discrepancies involving over 100 CO codes were resolved.

Finally, NANPA worked directly with all five of the participants in the FCC's trial for interconnected Voice over Internet Protocol (VoIP) providers to obtain direct access to telephone numbers for their customers. This support included assisting the participants in applying for CO codes in the NPAs/rate centers identified in their FCC-approved VoIP trial proposals as well as educating them on their responsibilities as code holders, including the requirements to populate the industry routing databases.

**Assignment of CO Codes for LRNs** – NANPA continued the practice of assisting service providers and state regulators in the transfer of a central office code from one service

provider to another service provider in need of a code for a Location Routing Number (LRN). This effort included NANPA identifying individual codes with low utilization that did not serve as an LRN (as well as meeting the other conditions described in the *Central Office Code (NXX) Assignment Guidelines, ATIS- 0300051*) and coordinating with the Pooling Administrator and service providers to transfer the identified code. Through this effort, the unnecessary assignment of a CO code is avoided, thus delaying the exhaust of an area code.

**Managing Jeopardies** – When the supply of codes in a particular NPA is at risk of exhausting before a new area code or other relief measure can be introduced, NANPA declares "jeopardy" in that NPA. When jeopardy is declared, code allocations are initially set at 3 codes per month. The industry, with the assistance of NANPA Code Administration and NPA Relief Planning, develops local industry jeopardy procedure options at a meeting convened by NANPA. Once determined, local jeopardy procedures are posted on the NANPA website, [www.nanpa.com](http://www.nanpa.com).

At the end of 2013, three NPAs were in jeopardy (Florida 305 NPA and Illinois 217 and 618 NPAs). One area code (NPA 570 in Pennsylvania) was removed from the jeopardy list. In addition, the Ohio 440 NPA was declared to be in jeopardy in March but with changes in service provider forecasts, jeopardy was rescinded in May.

**Reclamation** – Each central office code assignment has an associated "effective date" when the code will be placed in service. The assignment guidelines require that the code be placed in service no later than six months after the original effective date. The assignee confirms that the code is in service by submitting a Part 4. NANPA responds with the "Administrator's Response – Receipt of the Part 4." If a Part 4 has not been received by NANPA during the first five months following the original effective date, NANPA will send a reminder notice to the code assignee. In 2013, 2,518 Part 4s were processed by NANPA.

NANPA tracks code assignment effective dates and, if the Part 4 is not received within the six-month period following the effective date, the code is considered to be delinquent and NANPA notifies the appropriate regulatory authority. The FCC NRO orders delegated authority to the states to determine whether or not delinquent codes should be reclaimed. The FCC makes reclamation decisions for those states that decided not to participate in the process. The NANPA website provides detailed information about the reclamation process, including contact information for each participating state and the FCC.

# CODE ADMINISTRATION

To measure reclamation effectiveness, NANPA monitors the percentage of delinquent codes on which it begins the reclamation process, along with the number of codes recovered each month. The recovery of a code must be directed by the appropriate regulatory authority. NANPA also monitors the reclamation lists provided to the states/FCC to ensure there are no errors or discrepancies. Table 7 reflects the reclamation activity in 2013.

Table 7: 2013 CO Code Reclamation Quality Results

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
<b>Percentage of applicable codes on which reclamation was started</b>	<b>100%</b>											
Number of codes for which a Part 4 was not rec'd 180 days after original effective date (Note 1)	30	23	11	31	35	20	19	12	30	17	24	21
Number of codes on which reclamation started late	0	0	0	0	0	0	0	0	0	0	0	0
Codes recovered (Note 2)	1	2	2	1	2	1	1	1	1	0	0	1
Number of reclamation discrepancies reported by state commission(s) regarding monthly reclamation list	0	0	1	0	1	0	0	0	0	0	0	0

Note 1: Quantity of codes for which NANPA did not receive a Part 4 in-service confirmation 180 days after the original effective date.

Note 2: This measurement shows the quantity of codes recovered through the reclamation process (the state regulator or FCC directed NANPA to reclaim the code).

# CODE ADMINISTRATION

## RESOURCE REPORT – 5XX-NXX CODES

Contact: Nancy Fears, 830-632-5979  
nancy.fears@neustar.biz

On September 27, 2013, the purpose of 5YY NPA resources, to include identifying the resource as 5XX NPAs, was modified by the industry. 5XX-NXX codes can now be used for applications which are non-geographic in nature, are not assigned to rate centers and may or may not traverse the Public Switched Telephone Network (PSTN), but do require an E.164 addressing scheme. The use of this NANP numbering resource is to communicate with both fixed and mobile devices, some of which may be unattended. This resource may also be used for applications enabling machines, which would include but not be limited to wireless devices and appliances, with the ability to share information with back-office control and data base systems and the people that use them. Service is limited only by terminal and network capabilities and restrictions imposed by the service provider.

NANPA assigns 5XX-NXX codes in accordance with the *Non-Geographic 5XX-NXX Code Assignment Guidelines, ATIS 0300052*, which may be downloaded from the ATIS website (<http://www.atis.org/inc/incguides.asp>). It should be noted that the 5XX resource is not portable; the NXX identifies the service provider.

There were four 5XX NPAs in-service at the end of 2013: NPAs 500, 533, 544 and 566. During 2013, NANPA assigned 341 new 5XX-NXX codes (yielding an average assignment rate of 27 codes per month). This compares with 365 5XX-NXX codes assigned in 2012.

At the end of 2013, a total of 2,999 5XX-NXX codes were assigned. Eleven 5XX-NXX codes were returned in 2013 and 165 codes remained available for assignment. Thirty-six 5XX-NXX codes are not available for assignment (5XX-555 and all 5XX-N11). Based on NRUF forecast data and assignment information, coupled with the newly-defined purpose for the 5XX NPA resource, it is projected that multiple 5XX NXXs will be needed over the next several years. Consequently, the industry reserved the following 5XX NPAs: 577, 588, 522, 521, 523, 524, 525, 526, 527, 528, 529, 532, 538, 542, 543, 545, 547, 549, 552, 553, 554, 556, 569, 578 and 589. In 2013, the industry reserved an additional four NPAs (550, 535, 546 and 558) for non-geographic purposes.

NANPA continues to provide information concerning assignments, updates and reclamations for inclusion in the LERG™ Routing Guide. NANPA also solicits trouble reporting contact information for 5XX-NXX assignments and forwards the information to the Next Generation Interconnection Interoperability Forum (NGIIF) as required.

## RESOURCE REPORT – 9YY-NXX CODES

Contact: Nancy Fears, 830-632-5979,  
nancy.fears@neustar.biz

9YY numbers are used for premium services, with the cost of each 9YY call billed to the calling party. NANPA assigns these numbers according to industry-developed assignment guidelines that may be found on the ATIS website at <http://www.atis.org/inc/incguides.asp>. The guidelines are entitled 9YY NXX Code Assignment Guidelines, ATIS-0300060.

No 900-NXX codes were assigned in 2013. Forty-one (41) codes were returned.

Forty-seven (47) 900-NXX codes were not available for assignment as of December 31, 2013. These include eight 900-N11 codes and 39 900-NXX codes reserved for Canadian use.

At the end of 2013, a total of 60 900-NXX assignments were in effect. The number of 900-NXX codes available for assignment was 693. With the quantity of available 900 NXX codes, exhaust of the 900 NPA is not an issue at this time.

NANPA continues to provide information about assignments, updates and reclamations for inclusion in the LERG Routing Guide. NANPA also solicits trouble reporting contact information for 900-NXX assignments and forwards the information to the NGIIF as required.

# CODE ADMINISTRATION

## RESOURCE REPORT – 555 LINE NUMBERS

Contact: Nancy Fears, 830-632-5979,  
nancy.fears@neustar.biz

The intended use for 555 line numbers, in the format 555-XXXX, where X is any digit from 0 through 9, includes the provisioning of information services, but may grow to include a broad range of existing and future services as well. Assignment of 555 line numbers began in August 1994. NANPA assigns these numbers according to industry-developed assignment guidelines that may be found on the ATIS website at <http://www.atis.org/inc/incguides.asp>. The guidelines are entitled *555 NXX Assignment Guidelines, ATIS-0300048*.

In 2013, there were no new 555 line number assignments and no 555 line numbers were reclaimed or returned.

At the end of 2013, a total of 7,446 national assignments and 385 non-national line number assignments (290 actual line numbers, assigned to one or more assignees in one or more NPAs) were in effect. In addition, 116 line numbers remain in “dispute” status and 100 line numbers are reserved for the entertainment/advertising industries. At year end, 2,028 555 line numbers were available for assignment.

As of the end of 2013, 28 555 line number assignments have been identified by NANPA as “abandoned” (555 line numbers assigned to individuals or companies whose telephone and fax numbers are no longer in service and/or letters sent via courier service to these individuals or companies were returned to NANPA as undeliverable).

The current assignment trend indicates no concern for the exhaust of the 555 resource.

## RESOURCE REPORT – CARRIER IDENTIFICATION CODES

Contact: Nancy Fears, 830-632-5979,  
nancy.fears@neustar.biz

Carrier Identification Codes (CICs) are four-digit codes used to route and bill telephone traffic. Typically, an entity acquires a CIC assignment by purchasing Feature Group B (FG B) or Feature Group D (FG D) access from an access service provider. NANPA also assigns FG D CICs to “switchless resellers” without the requirement to purchase direct FG D trunk access before applying for a CIC. Finally, billing and collection clearinghouses (“BC clearinghouses”) are allowed to obtain FG D and “matching” FG B CICs without the requirement to purchase direct access. A “BC clearinghouse” is only allowed to apply for a CIC under circumstances when the use of an ABEC (Alternate Billing Exchange Code) is not permitted as an identifier and/or when the use of an ABEC has been determined as technically non-feasible.

In the U.S., all applicants apply to NANPA directly for CIC assignments (via NAS). If the applicant is a long distance carrier, the access provider must separately provide NANPA with a copy of the Access Service Request (ASR) to verify that FG D trunk access has been ordered. If the CIC applicant is a Local Exchange Carrier (LEC), incumbent LEC (ILEC) or competitive LEC (CLEC), a copy of the authorization from a state regulatory commission granting the applicant authority must separately be provided to NANPA in support of their CIC application. If the applicant is a switchless reseller, it must separately provide NANPA with documentation that validates “switchless reseller” status. State regulatory commission certification is required unless the state does not issue switchless reseller certification. If the state does not issue such certification, a written statement by an officer of the applicant company will be accepted to verify “switchless reseller” status. In Canada, companies apply for CICs to the Canadian Numbering Administrator (CNA), who verifies that Canadian regulatory requirements have been met. The CNA then submits the application to NANPA via NAS on behalf of the applicant.

Industry-consensus guidelines for the administration of CICs may be found on the ATIS website at <http://www.atis.org/inc/incguides.asp>. The assignment guidelines require all CIC assignees to submit Entity semi-annual CIC reports. In addition, access providers providing FG B and/or FG D access service, particularly access providers with more than 30 CICs programmed in their switches, are required to submit Access Provider semi-annual CIC access/usage reports to NANPA for analysis.

# CODE ADMINISTRATION

Information contained in these reports serves as the basis for NANPA's reclamation of CICs in an ongoing effort to avoid exhaust of the resource. If no access provider reports access/usage for a given CIC, NANPA initiates reclamation procedures. All CIC assignees, including switchless resellers and "BC clearinghouses", are required to submit semi-annual Entity Access/Usage reports to NANPA. These reports demonstrate whether access or usage has been established as well as document that assigned CICs are being used in accordance with the CIC Assignment Guidelines. To initiate reclamation, a letter (sent via certified mail or by courier service for delivery verification purposes) advises the assignee of record that trunk access/usage must be established with an access provider within 60 days from the date of the letter, or, alternatively, the assignee of record must have the access service provider supply NANPA with verification that trunk access/usage was previously established (this allows a reporting error to be detected before reclamation of a CIC is finalized). At the end of the 60-day period, if the requisite information regarding trunk access/usage has not been provided, the CIC is reclaimed. In some cases, the Post Office or courier service returns NANPA's reclamation letter as "undeliverable." In these cases, NANPA advises the INC of the inability to contact the assignee, that no trunk access/usage is being reported and that the CIC will be reclaimed and made available for reassignment following the idle period required by the guidelines (12 months), unless the INC directs otherwise.

Maintaining accurate assignment records and entity contact information is an ongoing challenge for NANPA due to abandoned CICs and the high volume of mergers, acquisitions, asset purchases and bankruptcies that occur in the telecommunications industry. Obtaining documentation on and verification of these activities is often difficult, but crucial to the integrity of information contained in the CIC assignment databases.

## FG D CIC ACTIVITY

During 2013, NANPA assigned 33 new FG D CICs, yielding an average assignment rate of 2.75 codes per month. U.S. and Canadian switchless resellers received eight of these assignments. Just as important, NANPA continued its concerted effort in 2013 to investigate and reclaim FG D CICs that were "abandoned" (assigned to a company no longer in business and/or not in service). Our efforts resulted in the return/reclamation of 49 FG D CICs.

223 codes from the entire FG D CIC resource are not available for assignment. These include CICs 9000-9199, which are available to all carriers for intranetwork use only. Also included are CICs 0000 and 5000, used exclusively for testing, 0911 and twenty CICs in the formats X411 and 411X, which have been marked unassignable at the direction of the FCC.

At the end of 2013, 2,024 FG D CICs were assigned in total, leaving 7,753 FG D CICs available for assignment. Based on the 2013 average monthly assignment rate, the projected exhaust for the FG D CIC resource is over 100 years. It should be noted that reclaimed/returned FG D CIC assignments are not factored into this projection and that this projection is based on current circumstances; i.e., the FCC limit of two FG D CICs per "entity."

At the end of 2013, NANPA identified 158 FG D CICs as "abandoned" (CICs assigned to companies no longer in business, or CICs assigned to companies that have sold assets to other entities, or companies that have been acquired by other entities through mergers/acquisitions). These CICs are now listed in NANPA's records with no valid contact information. The assignee of these CICs and/or the companies that have acquired the CIC assignee company(ies) have failed to adhere to the CIC Assignment Guidelines by providing NANPA with legal documentation of the activities described in this paragraph. NANPA has been unable to reclaim these "abandoned" CICs since activity (FG D access and/or usage) appeared on access providers' 2013 semi-annual CIC reports.

# CODE ADMINISTRATION

Table 8: 2013 Monthly FG D CIC assignments, denials and reclamations

Month	Assigned	Reclaimed/Returned Codes	Applications Denied	Applications Withdrawn

December	2	2	1	2
<b>Total</b>	<b>33</b>	<b>49</b>	<b>11</b>	<b>14</b>

## FG B CIC ACTIVITY

During 2013, no FG B CICs were assigned by NANPA and six FG B CICs were returned or reclaimed. At the end of 2013, 264 FG B CICs were assigned in total. The potential exhaust of the FG B CIC resource is not a concern based on the current rate of assignment.

As of the end of 2013, NANPA had identified 29 FG B CICs as “abandoned” (CICs assigned to companies no longer in business, or CICs assigned to companies that have sold assets to other entities, or companies that have been

acquired by other entities through mergers/acquisitions). These CICs are now listed in NANPA’s records with no valid contact information. The assignee of these CICs and/or the companies that have acquired the CIC assignee company(ies) have failed to adhere to the CIC Assignment Guidelines by providing NANPA with legal documentation of the activities described in this paragraph. NANPA has been unable to reclaim these “abandoned” CICs since activity (FG B usage and/or access) appeared on access providers’ 2013 semi-annual CIC reports.

## RESOURCE REPORT – N11 CODES

Contact: John Manning, 571-434-5770,  
john.manning@neustar.biz

N11 codes, listed with their descriptions in the table below, are the only valid three-digit telephone numbers in the NANP.

The FCC administers N11 codes in the U.S., pursuant to the Telecommunications Act of 1996. The Canadian Radio-television and Telecommunications Commission (CRTC) administers N11 codes in Canada. It should be noted that 411 and 611, although long used for the purposes indicated in the table below, have not been formally assigned by the FCC in the U.S. at this time.

There was no N11 assignment activity in 2013.

Table 10: N11 Code Assignments

N11 Code	Description
211	Community information and referral services
311	Non-emergency police and other governmental services (U.S.)
411	Local directory assistance
511	Traffic and transportation information (U.S.); Provision of Weather and Traveler Information Services (Canada)
611	Repair service
711	Telecommunications relay service (TRS)
811	Access to One Call Services to Protect Pipeline and Utilities from Excavation Damage (U.S.); Non-Urgent Health Triage Services (Canada)
911	Emergency

# CODE ADMINISTRATION

## RESOURCE REPORT – 456-NXX CODES

Contact: John Manning, 571-434-5770,  
john.manning@neustar.biz

The purpose of NPA 456 and its associated NXXs is to enable the routing of inbound international calls for carrier-specific services, particular to that service provider's network, to and between countries served by the NANP. NANPA assigns 456-NXX codes to telecommunications carriers under industry-developed guidelines that may be found on the ATIS website at <http://www.atis.org/inc/incguides.asp>. The guidelines are entitled *International Inbound NPA (INT/NPA/NXX) Assignment Guidelines, ATIS-0300049*.

No new 456-NXX assignments were requested during 2013. Four 456-NXX codes were recovered, resulting in a total of four 456-NXXs assigned at the end of 2013. A complete list of 456-NXX assignments may be found on the NANPA website, [www.nanpa.com](http://www.nanpa.com)

## RESOURCE REPORT – 800-855 NUMBERS

Contact: Nancy Fears, 830-632-5979,  
nancy.fears@neustar.biz

800-855 numbers are used only for the purpose of accessing public services on the Public Switched Telephone Network (PSTN) intended for the deaf, hard of hearing or speech impaired. NANPA assigns these numbers in accordance with industry-developed guidelines that may be found on the ATIS website at <http://www.atis.org/inc/incguides.asp>. The guidelines are entitled *800-855 Number Assignment Guidelines, ATIS-0300047*.

One new 800-855 number assignment was made in 2013. A total of 94 800-855 line numbers were assigned at the end of 2013. A complete list of 800-855 assignments may be found on the NANPA website, [www.nanpa.com](http://www.nanpa.com).

## RESOURCE REPORT – AUTOMATIC NUMBER IDENTIFICATION “II” DIGITS

Contact: John Manning, 571-434-5770,  
john.manning@neustar.biz

Automatic Number Identification (ANI) Information Integers (“II”) digits are digit pairs sent with the originating telephone number. The digit pair identifies the type of originating station; e.g., plain old telephone service (POTS) or hotel/motel. NANPA assigns these numbers in accordance with industry-developed guidelines that may be found on the ATIS website at <http://www.atis.org/inc/incguides.asp>. The guidelines are entitled *Automatic Number Identification (ANI) Information Digits Codes, ATIS-0300064*.

Requests for the assignment of ANI II digits are referred to the INC for consideration. If the INC approves the request, NANPA makes the assignment. A complete list of ANI II assignments may be found on the NANPA website, [www.nanpa.com](http://www.nanpa.com).

No new ANI II digit assignments were made in 2013. There were a total of 24 ANI II digits assigned at the end of 2013.

## RESOURCE REPORT – VERTICAL SERVICE CODES

Contact: John Manning, 571-434-5770,  
john.manning@neustar.biz

Vertical Service Codes (VSCs) are customer-dialed codes in the \*XX or \*2XX dialing format for touch-tone and the 11XX or 112XX dialing format for rotary phones. They are used to provide customer access to features and services (e.g., call forwarding, automatic callback, etc.) provided by network service providers such as local exchange carriers, interexchange carriers or commercial mobile radio service (CMRS) providers. NANPA assigns VSCs in accordance with industry-developed guidelines that may be found on the ATIS website at <http://www.atis.org/inc/incguides.asp>. The guidelines are entitled *Vertical Service Code Assignment Guidelines, ATIS-0300058*.

No new VSC assignments were made in 2013. There were a total of 61 VSCs assigned at the end of 2013. A complete listing of assigned VSCs is available on the NANPA website, [www.nanpa.com](http://www.nanpa.com).

# NPA RELIEF PLANNING OVERVIEW

## CONTACTS:

Wayne Milby, 804-795-5919,  
wayne.milby@neustar.biz

Joe Cocke, 571-434-5960,  
joe.cocke@neustar.biz

Tom Foley, 571-434-5726,  
thomas.foley@neustar.biz

NPA relief planning precedes the introduction of new geographic area codes. The relief planning process is described in detail in the document entitled *NPA Code Relief Planning and Notification Guidelines, ATIS-0300061*, which can be found on the ATIS website at [www.atis.org/inc/incguides.asp](http://www.atis.org/inc/incguides.asp).

NANPA plays a major role in NPA relief planning. At least 36 months before the anticipated exhaust of an NPA in the U.S. or its territories, NANPA's relief planners notify the local industry and state regulatory commission of the impending exhaust and convene a preliminary planning meeting to discuss local dialing arrangements, communities of interest and other pertinent issues to identify viable methods of relief. Using input from this meeting, relief planners prepare and distribute an initial planning document (IPD) for consideration that outlines several alternative relief plans. NANPA then facilitates an industry meeting to consider the options presented in the IPD and any others that may be proposed. NANPA next prepares a petition explaining the options considered and describes the recommended relief option(s) if the industry has reached consensus to do so. The relief planner submits the petition on behalf of the industry to the state regulatory commission for approval.

The respective state commission reviews the proposed plan and often conducts public hearings and invites public comment. When that occurs, the relief planner actively participates and may be called upon to testify relating to various aspects of the proposed relief plan. Recently, some states have opted to use the internet to gather public comment in lieu of public meetings in an attempt to solicit greater feedback. After the state commission has approved a plan, which may not be one of the options considered by the industry, NANPA requests assignment of the NPA relief code to implement the plan, and then convenes and facilitates the first industry implementation meeting. Using decisions made at the initial implementation meeting, the

relief planner then prepares and publishes a planning letter on the NANPA website. The planning letter announces the method of relief selected, the identity of the new area code, the schedule for relief, the new dialing plan, the test number(s) for the new area code, a rate center map and, in the case of a split, a list of the prefixes moving to the new area code and those remaining in the area code that is receiving relief.

NANPA's relief planners interface closely with Central Office Code Administrators and Pooling Administrators. Relief planners schedule and facilitate jeopardy conference calls and are closely involved in decisions about the timing of relief activities involving central office codes.

In 2013, NANPA initiated three new area code relief planning projects and filed four NPA relief petitions and one amendment with the appropriate state public service commission (California, New Jersey, Ohio, South Carolina and Texas). NANPA facilitated four initial NPA implementation meetings (Indiana, Kentucky, Tennessee and Texas) as well as conducted a joint NANPA/industry implementation meeting for the Pennsylvania 570/272 overlay. NANPA responded to the industry's request to facilitate a meeting to re-examine a consensus recommendation concerning the elimination of protected codes in the New Jersey 609 and 856 area codes. As part of its efforts to educate the industry on NPA relief planning matters, NANPA made a presentation to the Indiana State Bar Association on numbering and 812 NPA relief activity and to the South Carolina Telecom Association concerning relief planning in South Carolina. NANPA also responded to state requests to provide area code maps of identified relief options, conducted one jeopardy review meeting and participated in state-sponsored hearings concerning area code relief (California).

NANPA relief planners facilitated 24 meetings, conducted entirely by conference calls. They shadowed 46 industry NPA relief subcommittee meetings. To keep the industry informed, NANPA issued 81 notifications using the NNS, which included reminder notices of relief planning meetings that were distributed a few days prior to the meeting. NANPA also created and published six planning letters describing the details of ongoing geographic area code relief projects.

In 2013, NANPA communicated with numerous states concerning number administration and NPA relief planning, to include face-to-face meetings with two state regulatory authorities.

# NPA RELIEF PLANNING OVERVIEW

## RELIEF PLANNING QUALITY MEASUREMENTS

Industry guidelines prescribe time limitations for the completion of many NPA relief planning activities. To quantify the timeliness of its relief planning work, NANPA has established objectives for the completion of many additional activities, as shown in Table 11. In 2013, NANPA completed 100% of the 56 tracked activities on schedule. Relief planners also measured the promptness of their responses to voicemail and email messages. Results showed that NANPA relief planners responded to 100% of client voicemails and email messages by no later than the end of the next business day.

**Table 11: Relief planning timeliness**

Performance Measurement	Events in 2013	Completed on time	% on time completion
Initiated NPA relief planning within 36 months of NPA exhaust.	3	3	100%
Distributed initial industry meeting notice within 8 weeks of relief meeting date.	2	2	100%
Distributed IPD within 4 weeks of relief meeting date.	3	3	100%
Distributed meeting minutes within 2 weeks or date set at the meeting.	16	16	100%
Held minutes review by date set at the meeting.	6	6	100%
Filed relief-related petitions by date set at the meeting.	4	4	100%
Requested relief NPA assignment within 1 week of regulatory approval.	6	6	100%
Issued press release within 2 weeks after relief NPA code assignment.	1	1	100%
Held implementation meeting within 45 days after relief NPA code assignment.	4	4	100%
Held jeopardy meeting within 30 calendar days after jeopardy declaration.	1	1	100%
Posted planning letter or notice of industry meeting on website within 3 weeks after implementation meeting.	7	7	100%
Posted planning letter on website within 10 business days after regulatory change.	1	1	100%
Distributed IPD 4 weeks after date jeopardy was declared, if relief planning has not been initiated.	1	1	100%
Held industry relief planning meeting 8 weeks after date jeopardy was declared, if relief planning has not been initiated.	1	1	100%
<b>Totals</b>	<b>56</b>	<b>56</b>	<b>100%</b>

## CUSTOMER SURVEY FEEDBACK

Participants at the three initial relief planning meetings held in 2013 were asked to evaluate NANPA's performance by completing a survey containing the 11 statements shown in Table 12. Participants indicated their opinion using a 5-point scale, with 5 indicating "strongly agree" and 1 indicating "strongly disagree." The participants of the relief planning meetings held during the year responded and rated their overall satisfaction with NANPA's conduct of the meetings an average of 4.96 out of 5.00. The 2013 ratings for the questions asked in the survey were consistent with previous years' ratings, with scores ranging from 4.87 to 4.96.

# NPA RELIEF PLANNING OVERVIEW

**Table 12: Relief planning meeting satisfaction survey**

Question	2013
Overall satisfied with conduct of meeting?	4.96
Received adequate meeting notice from NANPA?	4.95
NANPA was an effective facilitator?	4.95
Participant had an adequate opportunity to express opinions?	4.96
NANPA conducted the meeting impartially?	4.96
NANPA provided satisfactory response to questions and concerns?	4.96
NANPA provided satisfactory information about code history and NPA status?	4.87
Explained relief alternatives effectively?	4.90
Quality of documents and information provided was satisfactory?	4.92
NANPA presented well developed and reasonable relief alternatives?	4.91
Participant could easily obtain documents?	4.95

In 2013, NANPA routinely conducted surveys to measure the quality of conference calls (other than initial relief planning meetings), where most of the industry’s issues are discussed and resolved.

During a one-month sampling period in each quarter, meeting participants rated NANPA’s performance in ten areas (using the same rating scale described previously), such as timely notification, audio quality, facilitation skills and meeting preparation. The survey covered five conference calls, including topics such as minutes review, regulatory filing review and implementation meetings. The participants on the sampled conference calls responded to the survey and rated their overall satisfaction with NANPA’s conduct of the calls an average of 5.00 out of 5.00 (See Table 13). The 2013 ratings for the questions asked in the survey were consistent with previous years’ ratings, with scores ranging from 4.83 to 5.00

**Table 13: NPA Relief Planning conference call satisfaction survey**

Question	2013	2012	2011
Overall satisfaction with NANPA’s conduct of the conference call?	5.00	4.98	4.89
NANPA conducted the conference call in an impartial manner?	4.97	4.89	4.96
NANPA provided adequate notice of the conference call?	4.94	4.95	4.93
Adequate opportunity to express opinions during the call?	4.94	4.98	4.95
NANPA was well prepared for the meeting?	4.96	4.91	4.95
NANPA was an effective facilitator on the call?	4.96	4.93	4.85
Quality of documents and information was satisfactory?	4.98	4.86	4.85
Information provided prior to the call was sufficient?	4.95	4.93	4.88
Easily able to obtain documents?	4.98	4.83	4.68
The conference call facilities (e.g., sound quality) were satisfactory?	4.83	4.79	4.73

# NPA RELIEF PLANNING OVERVIEW

## RELIEF PLANNING PROCESS

NANPA's relief planners use the following practices to ensure an efficient and effective relief planning process:

- A “pre-planning” conference call precedes preparation of each IPD, allowing those with useful local knowledge to contribute to the development of better relief options. Rate center lists are now distributed much earlier in the relief planning process, allowing the industry and state regulatory commissions more time to study this information prior to relief planning meetings.
- All meetings are conducted by conference call to reduce travel costs and increase participation, except in unusual circumstances and/or at the specific request of the industry. Further, NANPA uses an on-line meeting capability with certain relief planning meetings, allowing the participants to view relevant documentation and where appropriate, make real-time updates.
- NANPA has created various tools to be used in conjunction with the on-line meeting capability. These tools include:
  - » Providing a pros and cons table for NPA relief planning meetings, allowing the participants to view this table via the on-line meeting capability and select those pros and cons applicable to the relief alternative being discussed.
  - » Dialing plans and implementation schedules that permit the industry to make a near instant decision on what information to include in the relief petition.
  - » Excerpts from the *NPA Code Relief Planning & Notification Guidelines, ATIS-0300061*, to assist the industry in understanding the INC criteria for relief alternatives and in making their decisions during NPA relief meetings.
  - » Updated on-line meeting aid with excerpts containing the latest changes from the *NPA Code Relief Planning and Notification Guidelines*.
  - » Inclusion of the on-line meeting link in the PDF document posted in NAS NNS, in addition to including this information in the email notice.
- At the beginning of each conference call, the NANPA relief planner explains the manner in which the consensus process will be applied in a uniform, impartial manner in the event participants choose to leave the call unannounced.
- To expedite the meeting process, participants are notified in meeting announcements that they are responsible for downloading and reviewing the documents to be discussed prior to the meeting. NANPA does not distribute documents while conference calls are in progress.
- NANPA shadows industry NPA relief implementation subcommittee meetings to stay informed on the progress of the implementation as well as to gather and share knowledge gained via these activities with other similar relief efforts.
- NANPA publishes daily reports on the status of NPA relief projects. In addition, during the NPA relief planning process, a state regulator or the industry may specify further action that NANPA is required to undertake based on a related event or trigger point expected to occur sometime in the future. NANPA provides a report that lists these events and associated activities on its website.

# NUMBERING RESOURCE UTILIZATION/FORECAST

Contact: Al Cipparone, 571-434-5789,  
al.cipparone@neustar.biz

LaShanda Tomlinson, 571-434-4671,  
lashanda.tomlinson@neustar.biz

NANPA is responsible for the collection and reporting of utilization and forecast data, known as Numbering Resource Utilization/Forecast (NRUF) Reporting. Service providers are required to report utilization and forecast data twice a year to NANPA. Utilization data includes the quantity of assigned, intermediate, aging, administrative and reserved numbers. Forecast data typically is comprised of a five-year forecast of the quantity of thousands-blocks and/or codes by rate center. The FCC also requires access to disaggregated NRUF data by state regulatory commissions for heightened reporting enforcement, including the responsibility to withhold numbering resources from service providers that fail to file utilization and forecast reports.

NANPA collects, sorts and stores NRUF data submitted by service providers. Data may be submitted via NAS, email (i.e. Excel™ workbook), Electronic File Transfer (EFT), compact disk or paper. In 2013, NANPA processed over 14,300 NRUF submissions (See Table 14) and provided a confirmation of receipt, to include any identified errors, within seven calendar days. In addition to processing submissions, NRUF administration also responded to over 2,000 telephone calls and email inquiries.

Along with collecting this information, NANPA makes available to states on-line access to service-provider specific and aggregated utilization and forecast data. In addition, state reports containing NRUF information are offered to those states that desire a snapshot of utilization and forecast data for the area codes within their respective states. This data is provided via compact disk and contains several queries that assist in the analysis of the data. Over 80 reports were provided to the states, covering both NRUF submission cycles in 2013.

In 2013, a number of enhancements were implemented in NAS to assist users with the NRUF process. A major change was the ability for a user to search for utilization and forecast data in all states and all NPAs. Previously, users were limited to just one NPA at a time. NRUF reports were made downloadable in Excel™ 2007 (in addition to Excel™ 97-2003). With the ability to download more NRUF data, on-screen NRUF report downloads are limited to 1,000 lines. If report output exceeds 1,000 lines, the user is presented with an option to download the report output into an Excel™

file. Finally, the Utilization Missing Report, available for geographic resources, was made available for the non-geographic 5XX-NXX resource, allowing the NAS user to identify those 5XX-NXX resources assigned to the user for which no utilization has been reported.

Continuing with the practice of ensuring the industry has the latest information about NRUF, NANPA updated the NRUF Geographic and Non-Geographic Job Aids to reflect the numerous system enhancements implemented throughout the year. Various reminder notifications concerning the NRUF submission process were distributed. Finally, NANPA added a new NRUF training video to the website. This video provides an overview of the NRUF Form 502.

NANPA's experience with the NRUF submission process has shown that a small number of carriers will submit forecast data as an interim step in completing their semi-annual NRUF Form 502 but fail to provide the utilization data required by the submission deadline. Special attention is required by NANPA to identify these situations. In these instances, NANPA will remove the forecast data and require the service provider to submit both the utilization and forecast information in order to have a complete NRUF on file.

# NUMBERING RESOURCE UTILIZATION/FORECAST

Table 14: Summary of the volume of NRUF submissions and associated items for 2013

Qualitative Measurements	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Total

## 2013 NRUF EXHAUST FORECASTS

Contact: Tom Foley, 571-434-5726,  
thomas.foley@neustar.biz

One of the primary uses for NRUF data is to support forecasts of the exhaust date for each NPA as well as the exhaust date for the entire NANP. Detailed projections can be found in Attachments 6 and 7 to this annual report. The methodology used to produce the 2013 NPA exhaust projections was the same as the methodology NANPA used in the past several years to project area code exhaust. This methodology had previously been reviewed with the North American Numbering Council and the FCC. In reporting the NPA exhaust projections, NANPA provides the previously-projected NPA exhaust time frames in order to view the changes that have occurred over time.

NANPA projects NPA and NANP exhaust on a semi-annual basis. Exhaust projections are available at the end of April and October. Throughout the year, NANPA monitors central office code assignment rates in all area codes and will adjust the projected NPA exhaust date if necessary. In 2013, NANPA issued revised exhaust dates for the Oklahoma 405 NPA, the New Jersey 609 NPA and the Ohio 440, 513, 614 and 740 NPAs. NANPA declared jeopardy for the Ohio 440 area code in March. Jeopardy was rescinded in May due to changes in service provider forecasts. Events that may impact the projected exhaust date include a significant change in CO code demand, the assignment or return of a large quantity of CO codes or the implementation of central office code rationing.

## OTHER NANPA SERVICES

NANPA is required to offer specific services as enterprise services. Enterprise services are additional services that may be provided for a specific fee by NANPA.

### AOCN ENTERPRISE SERVICE

**Contact: Heidi Wayman, 571-434-5765,  
heidi.wayman@neustar.biz**

Upon request, NANPA will enter data for a service provider's assigned central office codes and thousands-blocks into the database used by the industry to configure the network for the proper routing and rating of calls. This is an enterprise service; i.e., a service for which NANPA is permitted to charge a fee and a contract between the service provider and NANPA is required. NANPA currently provides this service for over 200 service providers.

Although NANPA is required to provide this service, service

providers are not required to select NANPA. The service provider may select another company to enter this information or may elect to enter the data themselves.

Providers of this data entry service are identified by numbers, called Administrative Operating Company Numbers (AOCNs). Over time, the company providing the data input service has come to be called the service provider's "AOCN."

### AOCN QUALITY MEASUREMENTS

NANPA's AOCN primary service objective is to accurately complete data entry within five business days of receiving a request. NANPA's performance in 2013, shown in Table 15, reflects outstanding service, ensuring that service providers' routing data is input into the appropriate databases to enable the proper routing of calls.

**Table 15: 2013 AOCN Quality Results**

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Percentage of AOCN inputs completed in 5 days	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%
Percentage of AOCN phone calls returned by the end of the next business day	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%
Total number of AOCN calls	28	31	46	47	39	43	40	34	41	34	44	37

### ENTRY OF PAPER SUBMISSIONS OF RESOURCE APPLICATIONS

**Contact: John Manning, 571-434-5770,  
john.manning@neustar.biz**

NANPA will enter paper submissions (faxed, scanned or mailed copies) of resource applications into NAS on behalf of the applicant. This includes the application form as well as the in-service confirmation forms (e.g., for central office code administration, the Part 1 and Part 4 forms). In 2013, NANPA processed no paper resource applications.

### ENTRY OF PAPER NRUF SUBMISSIONS

NANPA will enter paper submissions (faxed, scanned or mailed copies) of the NRUF Form 502 into NAS on behalf of the service provider. Normally, respondents submit data through email, FTP or on-line via NAS. For a fee, NANPA will accept and input data submitted by mail, scan or by fax. In 2013, no service provider used this service.

### NANPA TESTIMONY IN STATE REGULATORY HEARINGS

NANPA will prepare, file and present oral and written testimony at no charge. Should the state require a NANPA witness(es) to attend the hearing in person, NANPA will require the state to reimburse it for associated expenses (e.g., travel, lodging, meals, local transportation, etc.) for the witness(es) and legal counsel. If the state requires local counsel to represent NANPA at state regulatory hearings, these costs will be passed along to the state. In 2013, no state used this service.

# OTHER NANPA SERVICES

## CUSTOMIZED REPORTS

Contact: Tom Foley, 571-434-5726,  
thomas.foley@neustar.biz

NANPA offers customized reports for publicly-available NPA, central office code and other resource assignment data. Specifically, NANPA can create and provide publicly-available data in different formats to accommodate requests to cull data and provide customized reports for a fee that is reasonable and based on its costs. NANPA negotiates a reasonable price with each requestor. Pricing for this service is based upon report development time and effort, frequency, delivery mechanism and other variables. In 2013, NANPA created no customized reports.

## FINANCIAL RESULTS

Ernst & Young audits NANPA's statements of revenues and direct expenditures associated with NANPA's enterprise

services. The audit is conducted in accordance with auditing standards generally accepted in the United States and the standards applicable to financial audits in Government Auditing Standards. The statements of revenues and direct expenditures are prepared for the purpose of complying with the March 2012 NANPA Technical Requirements Document.

## INC PARTICIPATION

Contact: Beth Sprague, 571-434-5513,  
beth.sprague@neustar.biz

NANPA was an active participant in the Industry Numbering Committee during 2013, introducing eight new issues and submitting nine contributions. A list of NANPA-sponsored issues is shown in Table 16. NANPA continued to provide the INC with updates on NANP resources, written communications concerning the approval for reclamations and updates on international numbering activities.

Table 16: NANPA INC Issues Introduced in 2013 and Supporting Contributions

Issue #	Issue Statement
753*	Add Clarifications to the COCAG Section 7.2 for Voluntary Code Transfers
754*	Contact Service Provider with Most Ports for Returned and Abandoned Non-Pooled Central Office Codes
755*	Update Appropriate Interconnection Documentation in Section 4.3.1.2 of the TBPAG and 4.2.2 of the COCAG
758	Move the 550, 535, 536, 546 and 558 NPAs from the General Purpose Category to Set Aside For Future Non-Geographic 5XX-NXX Use
762	CO Code Assigned/Transferred Only to Providers who Own Switching Facilities
766*	Supporting Evidence of Authorization to Provide Service must be Linked to Application for Thousands-blocks/Codes
769	Direct Petition by NANPA for Overlay NPA Codes – New or Additional and Addition of LNPA WG Best Practice Supporting the utilization of overlays as the preferred form of area code relief
773	Allocation of a 5XX NPA to Canadian Service Providers

\* Indicates additional INC participant(s) sponsored the issue.

In mid-2013, the INC eliminated its three standing subcommittees (Resource Assignment and Management Subcommittee (RAM), Number and Addressing Resource Planning Subcommittee (NARP) and the Document Management/Maintenance (DMM) Subcommittee). All issues are now addressed and resolved by the full committee.

# OTHER NANPA SERVICES

## NANPA WEBSITE

Contact: John Manning, 571-434-5770,  
john.manning@neustar.biz

The NANPA website, [www.nanpa.com](http://www.nanpa.com), is the primary public source for numbering information. It provides a complete description of the different services offered by NANPA. These services include resource administration, area code relief planning, NRUF data collection and analysis and enterprise services. All of the various numbering resources administered by NANPA, including a description of their use and links to their associated administration guidelines, can be easily accessed via the website. Area code maps, planning letters, newsletters and other NANPA publications are readily available. The NANPA website is also the gateway into NAS.

Popular on the website are the numerous downloadable reports on the various resources NANPA administers. Many of the reports are available real-time, providing the most up-to-date source on resource availability. Some of the most frequently-accessed reports include the following:

- The Central Office Code Availability and Utilization Reports provide up-to-date lists of all central office codes generally available or unavailable for assignment by geographic area code. The data is also available by NPA in a downloadable format (text and Excel™).
- The Central Office Code Assignment Activity Records provide the quantity of central office codes assigned and returned for each geographic area code on a monthly basis.
- The Part 3 Disconnect report provides a daily listing of central office codes with a pending disconnect date.
- The Central Office Code Activity Status Report provides the total number of new applications processed by NANPA by month for each state, including assignments, denials and return requests.
- The 5XX-NXX Availability, Aging and Utilized Reports provide real-time lists of all 5XX-NXX codes available or unavailable for assignment by non-geographic area code. The data is also available by NPA in a downloadable format (text and Excel™).
- Downloadable reports containing assignment information for CICs, 555 line numbers and 9YY resources.
- Geographic Area Codes sorted by number and location.
- Planned area codes not yet in service as well as area codes introduced since 1995.
- The NPA Relief Activity Status Report provides information on all active and pending NPA relief projects in the United States.

- The NPA Relief Planning Triggers Report identifies specific actions to be initiated based on a related event or trigger point expected to occur sometime in the future.

Throughout the website, there are various documents available to assist the user. As an example, for Area Code Relief Planning, the following documentation is available: Basics of NPA Relief Planning, FAQs on Area Code Relief, NPA Relief Planning Responsibilities, Jeopardy Procedures and the Industry Consensus Process, which is used in NPA relief planning meetings. Similar types of documents are available for Central Office Code Administration and NRUF reporting. NAS User Guides, which provide detailed instructions on the use of the system, are continuously updated and posted on the website. Attachment 8 provides a listing of where important numbering information is available on the internet.

The home page of the website offers links to recent information or activity, under the “What’s New” section. Also included is a section called “NANPA Fast Track,” containing links to the most visited pages on the website. Included under the “NANPA Fast Track” section is a capability that allows the user to search for information about a specific NPA. Information that can be found includes if and/or when the area code was assigned, the location of the NPA, the in-service date where applicable, the NPA that it relieved, the time zone associated with the area code, the NPA dialing plan and other valuable data. The NPA database may also be downloaded from the NANPA website.

The website also provides the ability for interested parties to submit questions related to numbering issues and receive responses. Many such questions are received by NANPA daily. In 2013, NANPA received 380 inquiries via its feedback mechanism; all were responded to within one business day. Inquiries range across many topics, from questions concerning the identification of wireline vs. wireless numbers to answering questions from companies and individuals desiring a specific vanity number. Often the general public requests assistance to end harassing calls. Both individuals and companies also want information to assist them in complying with various telemarketing regulations. Responding to these questions is a valuable service provided by NANPA to the general public.

Enhancements made to the website in 2013 include:

- With the implementation of NANPA Change Order 1 (Update the 5YY Requirements for Resources) in September, new 5XX-NXX public website reports were made available, including 5XX-NXX Available Codes,

## OTHER NANPA SERVICES

Utilization Codes and Aging Codes reports. These reports are updated real-time.

- In addition to the new 5XX-NXX public website reports, a new 5XX-NXX User Guide was created and posted to the website. The user guide provides instructions for requesting an assignment, changing and/or the returning of a non-geographic 5XX-NXX code via NAS. It also summarizes the 5XX-NXX queries and reports in NAS.
- As part of its Program Improvement Plan, NANPA produced its second NAS training video. Available under the "Tools" section of the website, this video provides an overview of the NRUF Form 502.
- The NPA Relief Planning Activities Status Report and NPA Relief Planning Triggers Report are now daily reports (previously these reports were updated monthly). In addition, the NPAs Exhausting in 36 Months Report was added to the NANPA website.

### NANPA NEWSLETTERS

NANPA publishes quarterly newsletters and posts them on the NANPA website. These newsletters provide up-to-date information on resource assignments and trends, area code relief planning activities, notifications concerning NRUF submission requirements and other general number administration information. In 2013, articles addressed enhancements associated with NAS technical refresh that occurred in April, the new capabilities associated with NANPA Change Order 1 and the 5XX-NXX resource and avoiding errors when submitting an NRUF Form 502. Articles addressing specific issues are also included such as describing NPA jeopardy, NANPA's role in state public meetings addressing area code relief and acceptable proof of readiness when submitting a central office code application for initial resources. Each newsletter typically includes a section titled "News Brief." This section provides short updates on various numbering issues such as rate center modifications, changes to a specific NPA exhaust projections and the availability of NANPA reports.

### SUPPORT FOR NANP COUNTRIES OTHER THAN THE U.S.

The NANP is unique among the world's numbering plans in that it serves 20 independent countries. These countries include the United States and its territories, Canada, Bermuda, Anguilla, Antigua and Barbuda, the Bahamas, Barbados, the British Virgin Islands, the Cayman Islands, Dominica, the Dominican Republic, Grenada, Jamaica, Montserrat, Sint Maarten, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Trinidad and Tobago, and Turks and Caicos.

One of NANPA's roles is to coordinate the assignment of numbering resources that must be shared equitably by all of the participating countries. Area codes are, of course, the primary shared resource, but there are others. For example, entities in the U.S., Canada, Anguilla, St. Maarten and Bermuda use CICs. U.S. and Canadian entities offer 900 services and thus share the supply of 9YY-NXX codes. NANPA may interface with other countries' national numbering administrators during the resource request and assignment process. Normally, the national administrator receives the requests, ensures that their country's regulatory requirements are met, and forwards the requests to NANPA. NANPA verifies that industry requirements are met and assigns the resources if appropriate to do so.

### SUPPORT TO THE FCC, STATE COMMISSIONS AND THE NANC

In order to ensure the proper and efficient administration of NANP resources, NANPA communicates regularly with the FCC, state regulatory authorities and the North American Numbering Council (NANC) in support of their needs for numbering information.

Ongoing communications between NANPA and the FCC are necessary to ensure proper administration and management of NANP resources. Under the FCC contract, NANPA provides numerous reports and other documentation required by the contract. These reports consist of monthly reports on central office code assignments, assignment of other NANP resources such as 5XX-NXX codes, area code relief planning projects, NAS performance and NANPA staffing. NANPA provides the FCC with service provider-specific utilization and forecast data submitted by carriers via the NRUF reporting process. NANPA reviews with the FCC issues concerning authorized access to numbering resources. As necessary, NANPA will meet with the FCC to discuss numbering in general and highlight those activities impacting number resource use and optimization.

In June 2012, Neustar was selected to serve as the NANPA under a new contract covering the period from July 9, 2012 through July 8, 2017. Continuing a practice started in 2012, Neustar provided the FCC monthly reports summarizing the progress made on the NAS enhancements that were deployed in April 2013. In addition, prior to the start of the Voice over Internet Protocol (VoIP) trial in June, NANPA met with the FCC to confirm its understanding of the trial parameters and provided regular updates to the FCC throughout the duration of the trial.

## OTHER NANPA SERVICES

NANPA continued to support state regulatory authorities by providing them with the number utilization data collected via semi-annual NRUF reporting and assisted state regulators in following up with the appropriate service providers with regard to this data. This included providing real-time access to NRUF data via NAS, with various reports and queries available to search and analyze the data, as well as providing ongoing assistance with using the NRUF reporting capabilities available to them in the system. In December 2013, NANPA conducted NRUF refresher training to state representatives. Eleven states participated in this training.

NANPA continued to supply state regulators with Part 1 and Part 3 reports, which provided a listing on a daily, weekly or monthly basis of all Part 1s and Part 3s processed by NANPA for their respective area codes. These reports include the Pooling Administration System tracking number, the Parent Company Name and Parent Company Operating Company Number (OCN) associated with the application and the application type (e.g., LRN request, pool replenishment, dedicated customer).

NANPA interfaced with state regulators to address specific issues or concerns associated with individual service provider requests for resources. Further, as NPA exhaust approached, NANPA ensured the state regulators were kept informed of the latest exhaust projections and provided updated information concerning NPA relief alternatives, to include refreshing the projected lives of proposed relief alternatives. NANPA representatives and state commissions regularly discuss specific activity and issues associated with active, pending or planned NPA relief projects. In 2013, at the request of the Public Utilities Commission of Ohio, NANPA assumed the NPA relief planning role for Ohio. The state commission had previously retained this function. NANPA participated in a California 415 NPA local jurisdiction meeting and three public meetings in San Francisco and San Rafael. NANPA met with the North Carolina Public Service Commission and staff to review the status of NPA relief planning in North Carolina and to specifically discuss the 336 NPA. NANPA filed an amendment to the original relief petition of the Texas 281/713/832 overlay complex in Houston. For the Indiana 812 NPA relief project, NANPA

filed testimony addressing the NPA relief planning process and the specific recommendation of the industry included in the relief petition. NANPA provided guidance to numerous state regulators on issues such as the scheduling of public meetings on NPA relief options and providing notification to the industry, obtaining maps containing county, city and rate center boundaries, participating in state technical meetings and workshops discussing NPA implementation and responding to state commission inquiries and data requests.

NANPA continued to participate in conference calls with the state commission staffs, providing updates on its activities and soliciting input on any numbering-related matters. This opportunity was used to review internal processes and to ensure a complete understanding of the responsibilities of NANPA, service providers and the state regulators.

NANPA provided monthly reports to the NANC throughout 2013. These reports highlighted central office code assignment activity, NPA relief planning efforts, status reports on other NANP resources administered by NANPA as well as NAS performance. NANPA also provided the results of the semi-annual NPA and NANP exhaust analysis and notified the NANC of the potential exhaust of the specific NPA resources.

NANPA interfaced with the NANC's subtending organizations as well. NANPA participated in monthly meetings with the Numbering Oversight Working Group (NOWG), providing reports on performance measurements, NAS updates, a review of relevant numbering activities and NANPA performance improvement efforts. NANPA continued the use of its Monthly Operational Report to provide a repository of various NANPA activities and events occurring throughout the year. NANPA also participated in NANC's Future of Numbering (FoN) Working Group and provided assistance to the group in their numbering discussions. Finally, NANPA continued to manage the NANC-Chair web page, which is used for posting NANC and subtending working group documentation.

# ATTACHMENT 1 – AREA CODE INVENTORY

NPA codes are in NXX format, where N is any digit 2-9 and X is any digit 0-9, yielding  $8 \times 10 \times 10 = 800$  combinations. Of these, 119 are not assignable or have been set aside by the Industry Numbering Committee (INC) for special purposes. These 119 codes are listed below.

N11 (8)	Abbreviated dialing
N9X (80)	Reserved for use during expansion of the NANP
37X and 96X (20)	Reserved by the INC for future use where contiguous blocks of codes are required
555 and 950 (2)	Not used as NPA codes to avoid possible confusion
880–887 and 889 (9)	Set aside for next series of toll-free codes.

Subtracting 119 from 800 leaves 681 assignable NPA codes. Of these, 400 have been assigned. Of these 400, 371 are in service and 29 are awaiting introduction. Of the 371 NPA codes in service, 356 are geographic and 15 are non-geographic.

Of the 681 assignable NPA codes, 281 are currently unassigned. Of these codes, 46 are easily recognizable codes (ERCs) currently allocated for non-geographic use, and 235 are general-purpose codes. Of these 235, 171 are reserved<sup>1</sup>, leaving 64 available, unreserved, general-purpose codes.

Of the 46 unassigned ERCs, 9 are reserved<sup>2</sup>, leaving 37 available.

Future geographic NPA codes are listed below.

NPA	NPA	NPA	NPA
220	389	582	764

387	576	761	987

1. These codes have been designated for the relief of NPAs that NRUF projects will exhaust in the next 10 years. Also included are additional NPA codes reserved for use in Canada at the request of the CRTC as well as 26 NPAs reserved for future 5XX-NXX expansion (521, 523, 524, 525, 526, 527, 528, 529, 532, 535, 538, 542, 543, 545, 546, 547, 549, 550, 552, 553, 554, 556, 558, 569, 578 and 589).
2. These include the 3 codes reserved for future 5XX-NXX expansion (577, 588 and 522) and 6 of the codes reserved for Canada (622, 633, 644, 655, 677 and 688). Canada has also reserved 699, which is counted as an expansion code.

## ATTACHMENT 4 – NON-GEOGRAPHIC NPAs IN SERVICE

The table below lists the non-geographic NPAs in service as of December 31, 2013, along with the service for which each is used.

NPA	Service
456	Inbound International
500	Non-Geographic Services
533	Non-Geographic Services
544	Non-Geographic Services
566	Non-Geographic Services
600	Canadian Services
700	Interexchange Carrier Services
710	US Government
800	Toll-Free
844	Toll-Free
855	Toll-Free
866	Toll-Free
877	Toll-Free
888	Toll-Free
900	Premium Services

NPA code 456 allows callers to select a carrier for international calls terminating in a NANP country. Carriers implement this service by activating 456 numbers in each country of origin.

In 2013, the purpose of 500, 533, 544 and 566 numbers (known as 5XX NPA resources) was changed. 5XX-NXX codes are to be used for applications which are non-geographic in nature, are not assigned to rate centers and may or may not traverse the PSTN, but do require an E.164 addressing scheme. The use of this NANP numbering resource is to communicate with both fixed and mobile devices, some of which may be unattended. This resource may be used for applications enabling machines, which would include but not be limited to wireless devices and appliances, with the ability to share information with back-office control and database systems and with the people that use them. Service is limited only by terminal and network capabilities and restrictions imposed by the service provider. NPA codes 577, 588, 522, 521, 523, 524, 525, 526, 527, 528, 529, 532, 535, 538, 542, 543, 545, 546, 547, 549, 550, 552, 553, 554, 556, 558, 569, 578 and 589 have been reserved for this use.

NPA code 600 is used within Canada and assigned to Canadian telecommunications service providers in the provisioning of non-geographic services.

NPA code 700 was assigned in 1983 for use by all interexchange carriers. Each carrier has the use of all 7.92 million numbers in the 700 NPA. When a call is made to a 700 number, the local exchange carrier passes the call to the caller's interexchange carrier, selected either through presubscription or override. Note that 700 numbers, unlike other NANP numbers, may terminate in different ways, depending on how the interexchange carrier has allocated the numbers.

NPA code 710 was assigned in 1983 to the U.S. Government for emergency services. The 710 NPA is treated as non-geographic with per-call compensation provided by the U.S. Government.

NPA codes 800, 888, 877, 866, 855 and 844 are used as toll-free codes. The 844 NPA was opened in December 2013. NPA codes 833 and 822 have been assigned for future use as toll-free codes and will be introduced as needed.

900 numbers are used for premium services, with the cost of each 900 call billed to the calling party.

The dialing plan associated with all geographic area codes in service in the NANP can be found on the NANPA website ([http://www.nationalnanpa.com/reports/reports\\_npa.html](http://www.nationalnanpa.com/reports/reports_npa.html)).

## NOTES:

1. Other dialing plans may apply at the discretion of the local service provider.
2. The Florida Keys retained 7D local dialing.
3. Home NPA local calls are 7D in Brevard County.
4. See Planning Letter 291 for local dialing into the 954-754 NPAs.
5. All Extended Calling Service (ECS) calls directed to a presubscribed carrier will be dialed as 1+10D (PL 311).
6. Some cross-boundary 7D local dialing exists.
7. Calls between the 551 and 201 NPAs may be dialed as 10D.
8. Calls between the 732 and 848 NPAs may be dialed as 10D.
9. Calls between the 973 and 862 NPAs can be dialed as 10D.
10. Carriers must provide permissive 1+10D dialing for Foreign NPA Local Calls in areas where they provide optional Extended Area Service (EAS).
11. All calls within and between the 215, 267, 484, and 610 NPAs can be dialed as 10D or 1+10D. Calls to other NPAs must be dialed as 1+10D.
12. All calls within and between NPAs 412, 724, and 878 can be dialed as 10D or 1+10D. Calls to other NPAs must be dialed as 1+10D.
13. Note that some local calls may require dialing 10D or 1+10D depending on area and service provider.

# ATTACHMENT 6 – 2013 NRUF AND NPA EXHAUST ANALYSIS

NANPA projects NPA exhaust on a semi-annual basis. These projections were produced in April and October 2013. The tables below show the current quarter/year in which each NPA is projected to exhaust, based on analysis performed in October 2013. The table also provides forecasted NPA exhaust information from previous exhaust projections developed by NANPA. The current forecast is based on NRUF data as it existed on October 1, 2013 for the US and January 1, 2013 for Canada, except where noted. Forecasts marked "R" are based on rationed assignment limits. The change between the current and previous forecasts is given in quarters. A positive number indicates that the exhaust date has moved out to a later date. A negative number indicates that the exhaust is now projected to occur sooner than previously expected.

## NOTES:

- a. Reduced historical and projected demand.
- b. Increased historical and projected demand.
- c. Forecast based upon information provided by the Canadian Numbering Administration (CNA). The CNA normally provides only one projection per year. Change is from last forecast provided.
- d. Canadian NPA. With an exhaust date beyond 2035, there is no exhaust date provided.
- e. NPA is at exhaust. No codes available except for returns.
- f. New NPA added.
- g. Area Code 321A includes only Brevard County Florida; 407/321 includes the Counties around Orlando in Central Florida
- h. Area Code 305A includes only the Keys area of Florida; Area Code 305/786 is the Miami-Dade area of Florida.
- i. "Intentionally left blank."
- j. "Intentionally left blank."
- k. Reflects Delta NRUF forecast.
- l. The "R" refers to the forecast projection made at the published ration level alone.
- m. New NPA overlay complex in Illinois; 872 overlays 312 and 773; 773 and 312 are not overlaying each other.
- n. "Intentionally left blank."
- o. Exhaust beyond 30 years or the NPA exhaust moves to less than 30 years.
- p. NPA 404 (Atlanta) is no longer shown separately but included with the overlay complex 404/770/678/470.

# ATTACHMENT 7 – 2013 NANP EXHAUST ANALYSIS

## INTRODUCTION

NANPA projects the exhaust of the NANP based upon the utilization and forecast data submitted by service providers via the NRUF process. The following assumptions were used in this exhaust analysis.

## OCTOBER 2013 NANP EXHAUST PROJECTION ASSUMPTIONS

The following is a list of assumptions used in the development of the October 2013 NANP exhaust projection prepared by NANPA. These are the same assumptions used in previous NANP exhaust studies.

1. The NANP exhaust study uses as its basis the CO code demand, which includes service provider and Pooling Administrator forecasts, historical CO code assignments and other NPA-specific information, calculated for each respective NPA. The monthly CO code demand as calculated in the NPA exhaust analysis is straight-lined to determine demand outside the five-year time frame included in NRUF submissions.
2. For NPAs in rationing, NANPA compared the actual CO code demand over the past year(s) with the rationed amount. In addition, NANPA compared the forecasted CO code demand provided by service providers and/or the Pooling Administrator to the rationed amount. Based upon this analysis, NANPA identified an average annual CO code demand rate for the NPA.
3. A new NPA will be required when the number of assigned and unavailable CO codes reaches 800.
4. It is assumed that each new NPA will require the same number of unassignable codes as the current NPA. It appears that most of the unassignable codes in the existing NPAs are duplicated in the new NPA. There may be times, however, when additional codes in the new NPA are marked unassignable.
5. No assumptions were made with regard to the relief method implemented (i.e., NPA split vs. overlay). However, it was assumed that the selected relief method did not require the duplication or protection of central office codes other than those identified in number 4 above.
6. The CO code demand for an exhausting NPA will be continued after NPA relief. By doing so, the demand for both the existing and new NPAs will be taken into account for the geographic area covered by the original NPA.
7. The total quantity of available NPA codes will be 666 NPAs. This figure is derived as follows: 800 NPAs less NPAs reserved for NANP expansion (80), N11 codes (8), 555 and 950 NPAs (2), toll-free NPAs (9)<sup>1</sup> and non-geographic NPAs (35)<sup>2</sup>.
8. To account for the variability of demand, a sensitivity analysis was performed to the CO code demand (i.e., demand will be increased and decreased by increments of 10%) to understand the impact on NANP exhaust.

## RESULTS BASED ON ASSUMPTIONS

As recognized in previous NANP exhaust analyses, the model is sensitive to the yearly CO code demand rate. Using the monthly CO code demand for each U.S. NPA as calculated in the October 2013 NPA Exhaust Analysis, and straight-lining this demand beyond the five-year time frame included in NRUF submissions, creates an average yearly demand rate of 4,400 CO codes. This yearly demand rate was compared with demand rates in 2004 through 2013.

## 2013 NANP EXHAUST ANALYSIS

Year	Annual Gross CO Code Demand	Annual Net CO Code Demand
2004	3,100	2,100
2005	3,300	2,300
2006	4,100	3,400
2007	3,200	2,900
2008	2,900	2,200
2009	2,100	1,600
2010	2,800	2,500
2011	2,900	2,400
2012	2,600	2,100
2013 (est.)	2,800	2,500

To project NANP exhaust, an average annual demand of 4,400 CO codes was used. Although this number is higher than the gross U.S. CO code demand as compared to previous years, it factors in the forecast data submitted as part of the August 2013 NRUF process, the demand in non-U.S. NANP member area codes<sup>3</sup> and the possible increase in CO code demand that may occur over the remaining years of the NANP life.

### MODEL BASED ON PROJECTED DEMAND

Using an average CO code demand rate of 4,400 codes assigned per year, the projected NANP exhaust date is beyond 2043, assuming the quantity of NPAs available remains 666<sup>4</sup>.

### SENSITIVITY ANALYSIS

For comparison purposes, NANPA performed a sensitivity analysis using an average annual demand of 5,300 CO codes, which represented a 20% increase in the base model demand. This resulted in a projected exhaust beyond 2043.

1. NPAs 880, 881, 882, 883, 884, 885, 886, 887 and 889.
2. These include the 29 codes reserved for non-geographic services (522, 577, 588, 521, 523, 524, 525, 526, 527, 528, 529, 532, 535, 538, 542, 543, 545, 546, 547, 549, 550, 552, 553, 554, 556, 558, 569, 578 and 589) and 6 of the codes reserved for Canada (622, 633, 644, 655, 677 and 688).
3. NANPA included an annual forecast of 1,000 CO codes for non-U.S. NANP member countries.
4. The base model used in the April 2013 study used an average demand rate of 4,400 codes and projected an exhaust date beyond 2043.

# ATTACHMENT 8 – WHERE TO FIND NUMBERING INFORMATION

Many key numbering documents are available through the Internet. Here are some useful sites.

## WWW.NANPA.COM

This is the official NANPA website. Its contents include:

- Assignment listings for NANP numbering resources, including area codes, CICs, 5XX-NXX codes, 900-NXX codes, N11 codes, and vertical service codes.
- Relief planning information for the U.S. and its territories, including an NPA relief planning status chart, planning letters, and information on the relief planning process.
- Central office code assignment information for the U.S. and its territories.
- Contact information for numbering resources.
- Information for NRUF submissions.
- Area code maps.

## WWW.CNAC.CA

This is the Canadian Numbering Administrator's site. This site is the master reference for Canadian numbering assignment information and includes information similar to that provided by [www.nanpa.com](http://www.nanpa.com) for the U.S. and its territories.

## WWW.NATIONALPOOLING.COM

This is the National Thousands-Block Pooling Administration's site. Information concerning thousands-block assignments and availability can be found here.

## WWW.NPAC.COM

This is the site for the Number Portability Administration Center or NPAC. The NPAC facilitates local number portability, the ability to change your service provider while retaining your telephone number.

- [www.npac.com/the-npac/portable-open-codes](http://www.npac.com/the-npac/portable-open-codes) – provides a listing of central office codes open in the NPAC.

## WWW.FCC.GOV

Sections of the FCC's website of particular interest are:

- [www.fcc.gov/wireline-competition-bureau](http://www.fcc.gov/wireline-competition-bureau) – the home page of the Wireline Competition Bureau. Orders related to numbering topics, including the Number Resource Optimization (NRO) orders, can be found here.
- [www.fcc.gov/encyclopedia/north-american-numbering-council](http://www.fcc.gov/encyclopedia/north-american-numbering-council) – the home page for the North American Numbering Council (NANC), a federal advisory committee of the FCC that provides analysis and recommendations to the FCC on numbering issues. This site contains their charter, meeting minutes and membership lists.
- <http://apps.fcc.gov/cgb/form499/499a.cfm> – provides an address and telephone number for service providers and identifies whether the provider offers local, wireless or toll services. The listed providers are those filing FCC Form 499-A, Telecommunications Reporting Worksheets.

## WWW.CRTC.GC.CA

This is the site for the Canadian Radio-television and Telecommunications Commission, the Canadian regulator.

## WWW.NANC-CHAIR.ORG

This is the home page for the Chair of the NANC. It contains presentations and reports provided to the NANC on issues currently being addressed by the Council. Also included is documentation from the various NANC working groups and issue management groups.

## WWW.ATIS.ORG

This is the Alliance for Telecommunications Industry Solutions (ATIS) site. It has several sections of interest for numbering. Of particular interest is the Industry Numbering Committee (INC). All finalized INC documents are available for download, including assignment guidelines for numbering resources.

# WHERE TO FIND NUMBERING INFORMATION

## [WWW.ITU.INT](http://WWW.ITU.INT)

This is the home page of the International Telecommunications Union in Geneva, Switzerland, the group that sets international standards for telephone numbers. Although much of the information on the site is available to ITU members only, some documents are available to all, including a list of assigned country codes.

## [WWW.NARUC.ORG](http://WWW.NARUC.ORG)

This is the home page of the National Association of Regulatory Utility Commissioners. NARUC and its committees frequently take positions on numbering issues. Links to all of the state commissions' websites can be found at this site.

- [www.naruc.org/commissions.cfm](http://www.naruc.org/commissions.cfm) – provides links to state regulatory commission websites.

## [WWW.SMS800.COM](http://WWW.SMS800.COM)

This site contains information about the 800 Service Management System (SMS/800) which is the central administration system for the management of Toll Free Services.

## [WWW.NATIONALPANI.COM](http://WWW.NATIONALPANI.COM)

This is the site of the permanent Routing Number Administrator (RNA) for the pseudo Automatic Number Identification (p-ANI) codes which are used for routing emergency calls for Voice over Internet Protocol (VoIP) services.

## [WWW.MBIADMIN.COM](http://WWW.MBIADMIN.COM)

This is the home page for the USA and Puerto Rico wireless number resource administrator for Mobile Identification Numbers (MIN), called the MIN Block Identifier (MBI). MBI Administration was created in 2002 when the MIN was separated from the Mobile Directory Number (MDN) and became a new number resource to support nationwide roaming, wireless number portability and number pooling.

## [WWW.NECA.ORG](http://WWW.NECA.ORG)

This is the site of the National Exchange Carriers Association (NECA). NECA administers the FCC's "access charge" plan. (Access charges are the fees long distance companies pay to access the local phone network to complete calls.)

## [WWW.NANPFUND.COM](http://WWW.NANPFUND.COM)

The North American Numbering Plan (NANP) is a numbering scheme for the public switched telecommunications networks (PSTN) within the United States, Canada and participating Caribbean countries. The NANP Fund was established to cover the costs of the NANP and is funded by United States telecommunication service providers, and from Canada and Caribbean member countries. Section 52.17 of the Federal Communications Commission's rules state that all telecommunications carriers in the United States shall contribute on a competitively neutral basis to meet the costs of establishing numbering administration.

## [WWW.TRAINFO.COM](http://WWW.TRAINFO.COM)

This is the home page for Telecom Routing Administration, compilers and publishers of the LERG™ Routing Guide and other numbering documentation.
